PRECAUTIONARY STATEMENTS

Hazard to Humans and Domestic Animals.
Caution: Not for Swimmers. Thoroughly wash with water after handling.

DIRECTIONS FOR USE

PoolPro® Hexaborate Water Harmonizer is a pH balanced, non-hazardous trace element than provides the following benefits:

- Balanced pH (Corrected Level 7.6-7.8) to keep:
  - Alkalinity in Level
  - Calcium Hardness in Level
- Natural, slow-acting, non-toxic, organic acid breakdown
- Buffer pH level
- Reduces water hardness
- Balanced water quality
- Does not affect existing products

PoolPro® Hexaborate Water Harmonizer serves as a neutralizer, ready-to-use liquid. It is compatible with all moderate levels in the normal maintenance of swimming pools, including chlorinated pool and spas.

Leaving the cables below, add the correct amount of material to your pool water to achieve a minimum of 30 parts per million. For the first application, use 1 pool gallon of PoolPro® Hexaborate Water Harmonizer to every 3000 gallons of pool water.
