Stabilized Chlorinating

GRANULES

Active Ingredient:
Sodium Dichloro-s-Triazinetrione Dihydrate ........ 99%
Other Ingredients ........................................ 1%
Total .......................................................... 100%

Available Chlorine ....................................... 55.5%

Robelle
everything for your swimming pool

ITEM NO. 1325 L0089FP

25 POUNDS
DIRECTIONS FOR USE: It is a violation of federal law to use this product in a manner inconsistent with its labeling. This product is designed to dissolve quickly and completely providing a steady source of available chlorine in swimming pools to control the growth of algae, kill bacteria and destroy organic contaminants.

READ THE PRECAUTIONARY STATEMENTS BEFORE USE:

METHOD OF APPLICATION: Broadcast the product evenly over a wide area in the deepest part of the pool/ spa with water circulating. Routine Chlorination: Throughout the pool season, adjust pH to 7.2-7.6 with a pH increaser or pH decreaser. Follow label directions. Broadcast 3 cc. of this product per 10,000 gallons pool water every other day or as often as needed to maintain chlorine residual at 2-4 ppm. This quantity may vary depending on bather load, temperature and other conditions. Re-entry into treated pools is prohibited above levels of 3 ppm chlorine. As a preventative treatment, you should shock treat weekly to prevent pool problems which may occur when bather loads are high, water appears hazy or dull, unpleasant odors or eye irritation occur, after heavy winds and rain storms, when temperatures are high, in case of colored water, or if algae develops with resulting green color and slimy feeling.

SHOCK TREATMENT: Adjust pH to 7.2 to 7.4 with a pH increaser or pH decreaser. Follow label directions. For Start-up or Initial Shocking: With pump running and pool not in use, broadcast 1 pound of this product per 10,000 gallons of water directly into the deep end of the pool. To prevent possible damage to pool surface, use a pool brush to disperse any granules that may have settled at the bottom of the pool. Repeat procedure after 24 hours if needed, to establish a chlorine residual of 2-4 ppm as determined by a test kit.

For Routine Shocking: Every two weeks with pump running and pool not in use, broadcast 1 pound of this product per 10,000 gallons of water directly into the deep end of the pool. To prevent possible damage to pool surface use a pool brush to disperse any granules that may have settled at the bottom of the pool.

Re-entry into treated pools is prohibited above levels of 3 ppm chlorine.

OPENING YOUR POOL: Adjust pH to 7.2 to 7.6 with pH increaser or pH decreaser. Follow label directions. Shock treat following directions above. The next day, stabilize your pool. Follow label directions. As an alternative, three shock treatment dosages with this product will raise your stabiliser level by approximately 25 ppm, which is the normal starting level of stabiliser.

WINTERIZING: While the water is still clear and clean, prepare for long periods of disuse by gradually adding 50% of the product this product per 10,000 gallons of water (to provide a dosage of 15 ppm free available chlorine). Follow Method of Application above. Run pump and filter until completely dispersed. Cover the pool with a plastic pool cover and prepare the heater, pump and filter components for wintering by following manufacturer’s directions.

WATER BALANCE: To provide optimum product performance, swimmer comfort and crystal clear water, always maintain pH in the 7.2-7.8 range, total alkalinity in the 90-125 parts per million (ppm) range and calcium hardness above 200 ppm. Use a reliable test kit that measures all these ranges. Make necessary adjustments with the appropriate pool care products.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER: Corrosive. Causes irreparable eye damage. May be fatal if inhaled. Harmful if swallowed or absorbed through skin. Do not get in eyes, on skin, or on clothing. Do not breathe dust, vapor or spray mist. Wear goggles, face shield or safety glasses. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, or using tobacco. Remove and wash contaminated clothing before reuse.

CHEMICAL HAZARDS:

DANGER: Strong oxidizing agent. Use only clean, dry utensils. Mix only with water. Contaminates with moisture, dirt, organic matter, or other chemicals (including other pool chemicals), or any other foreign matter may start a chemical reaction with generation of heat, liberation of hazardous gases, and possible generation of fire or explosion. Avoid any contact with flammable or igniting material, such as a lighted cigarette. Do not use this product in any chlorinating device which has been used with any ignitants or uninstalled chlorinating compounds (e.g., calcium hypochlorite). Such use may cause fire or explosion.

ENVIRONMENTAL HAZARD:

This pesticide is toxic to fish and aquatic organisms.

STORAGE AND DISPOSAL:

STORAGE: Keep product dry in a tightly closed container when not in use. Store in a cool, dry, well-ventilated area away from heat or open flames. Do not reuse or refill empty container.

DISPOSAL: If empty: Nonhazardous container. Do not reuse or refill this container. Place in trash or offer for recycling, if available. If partly filled: Call your local solid waste agency or 1-800-CLEANUP (800-253-2687) for disposal instructions. Never place used product down any indoor or outdoor drain.

EMERGENCY HANDLING: In case of contamination or decomposition do not reseal container. If possible, isolate container in open and well-ventilated area. Flood with large volumes of water. Dispose of contaminated material in an approved landfill area.

FIRST AID

FINISHED:

Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth. Call a poison control center or doctor for further treatment advice.

FINISHED:

Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for treatment advice.

FINISHED:

Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person.

IF INHALED:

Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 1-800-253-2687 for emergency medical treatment recommendations.

NOTE TO PHYSICIAN:

Probable mucosal damage may contraindicate the use of gastric lavage.
