KEEPS OUT OF REACH OF CHILDREN

See Safety Data Sheet (SDS) for more information.

NOT FOR AQUATIC USE

DIRECTIONS FOR USE:
RAWWAR™ improves the performance of certain herbicides. The product contains
small amounts of nonionic surfactants that maintain optimum pH of the ready-to-
use solution in the spray tank and when applied to the foliage.

May be used on agricultural, forestry, industrial, structural and non-agricultural sites
against nuisance plants.

APPLICATION RATE:
Use RAWWAR™ at a rate of 1 part concentrate to 50 parts to 100 parts of tank blend
herbicide solution unless an alternative recommendation is noted on the pesticide
label.

MIXING:
To reduce foaming, add the full quantity of the RAWWAR™ when spray tank is nearly
full. Mix thoroughly.

COMPATIBILITY:
RAWWAR™ is compatible with technical grade Glyphosate and Glyphosate containing
formulations. Do not use in any formulation which contains an ALS-inhibitor, such as
clomazone, metolachlor, or chloroxuron. If a second herbicide is used, it must be
compatible with RAWWAR™. All ingredients used in RAWWAR™ are approved as inert by the U.S. Environ-
mental Protection Agency (EPA) for inclusion in registered pesticide formulations and tank
blends.

Always consult herbicide product labels for proper rate.

LIMIT OF WARRANTY AND LIABILITY:
We warrant this material to comply with our published specifications and are of
good merchantable quality and such as will regularly pass in the trade for goods
within the description, and further warrant such goods to be for the normal pur-
pose for which goods are used. We assume no responsibility that the goods
concerned in this contract are fit for any particular purpose for which they are being
bought outside of the general purposes of goods of the description.

RAWWAR™
Activator Adjuvant Permission Pending
Liquid Concentrate

This adjuvant product must be tank blended only with EPA-registered herbicide products to
enhance the performance of the active ingredients of those products into nuisance plants
using low pressure spray application methods.

Principal Functioning Agents:
Coco dimethylamine oxide, potassium bicarbonate, potassium carbonate, 31.43%
38.57%
constituents ineffective as spray adjuvants 100.00%
100.00%
Ingredients exempt from the requirements of a tolerance under 40 CFR 180.

Read Warranty on side panel before using or reusing. If such items are not acceptable, re-
turn at once unopened.

PRECAUTIONARY STATEMENTS:

FIRST AID:
IF IN EYES: Immediately flush with plenty of water. After initial flushing, remove
any contact lenses and continue flushing for at least 15 minutes. Call a physician
or poison control center immediately.
IF ON SKIN: Wash off immediately with soap and plenty of water for at least 15
minutes while removing all contaminated clothing and shoes. Call a poison control
center or doctor for treatment advice. Remove and wash contaminated clothing
before re-use.
IF INHALED: Move victim to fresh air. Apply artificial respiration if victim is
not breathing. Call a physician or poison control center immediately.
IF SWALLOWED: DO NOT induce vomiting unless directed to do so by medical
personnel. Gently wash or rinse the mouth and then mouth with water. Never
give anything by mouth to an unconscious person. Call a physician or poison
control center immediately.

GENERAL ADVICE:
Avoid the safety data sheet to the doctor in attendance.
Wash or rinse the exposed skin and protective clothing with soap and
water. Safeguard any area exposed to skin or clothing.

STORAGE & DISPOSAL

Protect from freezing and extreme heat. To avoid waste, use all material in this
container by application according to label directions. If waste cannot be
avoided, send remaining product to a waste disposal facility.

Keep container tightly closed in a dry and well-ventilated place. Keep in properly
labeled container. Keep away from food, drink and animal feeding stuff. Keep
from freezing. Keep container tightly closed.
