FASTSTRIKE™
MODIFIED VEGETABLE OIL AND SURFACTANT BLEND

PRINCIPAL FUNCTIONING AGENTS
Methylated vegetable oil, polyether modified polysiloxane, alkylphenol ethoxylate .......................................................... 100%
TOTAL .................................................................................. 100%

All ingredients are exempt from tolerance requirements under 40 CFR 180.

STORAGE AND DISPOSAL
Do not contaminate water sources by cleaning of equipment or disposal of wash water.

FIRST AID
If On Skin Wash with plenty of water. If skin irritation occurs get medical attention.
If In Eyes Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists get medical attention.
If Inhaled Remove person to fresh air and keep comfortable for breathing.
If Swallowed Rinse mouth. Call a poison center / doctor if you feel unwell. Do NOT induce vomiting unless told to do so by a poison center / doctor.

NOTE: For optimum results, spray mixes containing FASTSTRIKE™ should be applied within 36 hours.

ENVIRONMENTAL HAZARDS
Do not contaminate water sources by cleaning of equipment or disposal of wash water.

DIRECTIONS FOR USE
FASTSTRIKE™ is intended for use with products registered for agricultural, forestry, industrial, non-cropland, rights-of-way and other uses. The use of FASTSTRIKE™ can increase pesticidal activity where the following factors occur, but is not limited to: (1) Low humidity and high temperatures; (2) Low water volume rates of less than 15 gallons per acre; and (3) When target species are larger than the label recommendations at time of application.

APPLICATION RATES PER 100 GALLONS
Aerial: 6 - 16 pints
Ground: 3 - 5 pints

NOTE: The application rates on this label are based on pesticide labels which recommend the use of a nonionic surfactant. Rates of this product may be increased or decreased for optimum results, follow pesticide labeling for proper recommendations. Before using FASTSTRIKE™ where a nonionic surfactant may not be recommended, the user or applicator advisor must have experience with the combination or must have conducted a phytotoxicity trial.

MIXING INSTRUCTIONS
Prior to pesticide application, clean mixing and application equipment according to pesticide label directions.

To Minimize Foaming: Fill spray tank 2/3 or 3/4 full of water and begin agitation. If Foaming is Anticipated: The addition of an antifoaming agent should be added before pesticides, nutrients, or FASTSTRIKE™. Mixing Procedure: Add pesticides and / or fertilizers as directed by label or in the following sequence: 1) Micronutrients and fertilizers, 2) Dry flowables and dispersible granules, 3) Flowables, 4) Water soluble pesticides, 5) Emulsifiable concentrates. Continue agitation and add FASTSTRIKE™. When completed, reduce agitation and allow to mix for 1 to 2 minutes. While under minimal agitation, continue filling tank and allow to mix for 10-15 minutes prior to application.

NOTE: For optimum results, spray mixes containing FASTSTRIKE™ should be applied within 36 hours.

NOT FOR AQUATIC USE

GENERAL INFORMATION
FASTSTRIKE™ is a unique blend of highly refined and modified spray oil and nonionic organosilicone. FASTSTRIKE™’s unique chemistry allows for enhanced wetting absorption of those pesticides or products which labels recommend the addition of a spray adjuvant to improve performance. The addition of FASTSTRIKE™ to a spray tank solution will improve a spray application by physically modifying the wetting and spreading characteristics, the result being a more uniform spray deposit. Observe the initial application to ensure thorough coverage without excessive runoff of the spray.
