**PRECAUTIONARY STATEMENTS**

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS**

**DANGER:** Keep product out of reach of children and pets. Do not get in eyes or on clothing. Use gloves when handling. Wash thoroughly with soap and water after handling and before eating, drinking, smoking, or using the toilet. Keep children and pets away from pool while performing maintenance or cleaning operations. If swallowed, call a poison control center. Do not use if product is damaged, deformed, or if bag is torn.

**WARNING:** If this product is inhaled, get fresh air. If eye contact occurs, flush with water for 15 minutes. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.

**CAUTION:** Do not get in eyes. Wash thoroughly with soap and water after exposure. Call a poison control center for treatment advice. Do not use around fish or wildlife. Avoid breathing dust. If this product is on skin, wash with water and soap. If on clothing, wash thoroughly before reuse.

**STORAGE AND DISPOSAL**

**STORAGE:** Do not store near heat or open flame. Do not store in direct sunlight or under freezing conditions. If long-term storage is required, keep container and product under control for protection against freezing. Do not use in presence of an open flame or other ignition source. Protect from freezing and sun. Do not use if product is contaminated or decomposed.

**DISPOSAL:** Do not dispose of product into the environment. Follow state, local, and federal waste disposal regulations. Call your local waste disposal service provider for information on appropriate handling procedures. This product contains a hazardous chemical and must be properly disposed of to prevent contamination of the environment. Check hazardous waste regulations before disposing of this chemical. Fertilizer, pesticide, or other chemicals may cause a fire or explosion. Do not mix this product with other chemicals, including any other pool maintenance products or any other “shock” products. This product contains hazardous chemical substances that may cause a fire or explosion when mixed with other chemicals.

ZAPPIT Shock Treatment and Super Clarifier for Swimming Pools

DIRECTIONS FOR USE

CALCIUM HYPOCHLORITE, HYDRATED
UN2880 RQ

1. Pour rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip.

2. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank. Fill the container ¼ full with water and recap. Shake for 10 seconds. Pour rinsate into application equipment or a mix tank or store rinsate for later use or disposal.

3. Keep the container closed when not in use. Store in a cool, dry, well ventilated area away from heat or derivatizing agents.

4. Use a dropper, pump or other suitable equipment to distribute the entire contents of the container uniformly into the pool. Do not pour solids directly into the pool. Dump the container into a large container of water and stir to disperse the entire contents.

5. Use at night or during a period when the pool is not in use.

6. Treat pool water prior to addition of this product and maintain pool water parameters in the ranges noted below.

7. Never add water into product. Do not add this product to any dispensing device containing remnants of any other product or pool chemical. Such use may cause violent reaction leading to fire or explosion.

8. For any application method you choose: No one can be in the pool when chemicals are being added directly to the pool.

9. This product will raise the pH of pool water. For best results, test your pool water prior to addition of this product. If your pH measures 7.4 or higher, adjust it downward so that it is between 7.2 to 7.4. This will help avoid clouding of water and allow for faster dispersion of the product.

10. This product will destroy the natural and synthetic oils and lotions. If left untreated, the build-up of these contaminants can lead to the development of noxious odors, irritating water, and unsightly water clarity problems. These organic wastes serve as nutrients for bacteria, algae, and other organisms, and should be removed from the pool on a regular basis to prevent their build up. This product will effectively reduce organic contamination in swimming pool water resulting in increased water clarity.

11. Pool water is subject to a build-up of a wide variety of organic contaminants including swimmer wastes, such as perspiration, ammonia compounds, and natural and synthetic oils and lotions. If left untreated, the build-up of these contaminants can lead to the development of noxious odors, irritating water, and unsightly water clarity problems. These organic wastes serve as nutrients for bacteria, algae, and other organisms, and should be removed from the pool on a regular basis to prevent their build up. This product will effectively reduce organic contamination in swimming pool water resulting in increased water clarity.

12. The Manufacturer warrants, for a period of 1 year from purchase, that when this Product is stored and used, all in accordance with label directions, it will be fit for its intended purpose. THE MANUFACTURER EXPRESSLY DISCLAIMS ALL OTHER WARRANTIES, INCLUDING ANY IMPLIED WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, OR NONINFRINGEMENT.

13. Total: .............................................................................................................................................................. 100%

FIRST AID

DANGER: Strong oxidizing agent! Mix only with water. Do not mix this product with any other chemicals, including any other disinfection or "shock" pool products. Always add product to large quantities of water to dissolve product. Do not pour water into product. Do not add this product to any dispensing device containing remnants of any other product or pool chemical. Such use may cause violent reaction leading to fire or explosion.

Note to Physician:

- Minimum 65% Available Chlorine.
- Probable mucosal damage may contraindicate the use of gastric lavage.
- For Swimming Pools
- Shock Treatment
- Destroys Organic Contaminants
- No Need to Predissolve

If Inhaled:

- Do not induce vomiting. Seek medical attention immediately.

If in Eyes:

- Hold eye open and rinse slowly and gently with water for 15–20 minutes. Remove contact lenses, if present, and continue rinsing.

If Swallowed:

- Never give anything by mouth to an unconscious person. Seek medical attention immediately.

KEEP OUT OF REACH OF CHILDREN

See additional precautionary statements on back label.
