DIRECTIONS FOR USE
BRANDT INSECT BAITS is a corn derived, proteinaceous liquid that
enhances the effectiveness of agricultural insecticides. The protein
bait acts as a food attractant and its success in an IPM program is
based on the immature female fruit flies' need of a protein meal for
developing mature eggs.
Read and follow the precautions, restrictions and recommendations
on the labels of insecticides used with BRANDT INSECT BAITS. Use
according to the most restrictive label directions for each product in
any tank mix.

BRANDT INSECT BAITS may be used on agricultural, aquatic, forestry,
turf and ornamental, industrial and non-cropland sites. NOT FOR
AQUATIC USE IN WASHINGTON.

COMPATIBILITY: BRANDT INSECT BAITS is compatible with most
insecticides. However, if the desired combination has not been
previously used, a compatibility test is recommended. Using this
product with copper compounds or shortly after an application of
copper may reduce effectiveness.

MIXING: Shake well before using. Although this product may contain a
small amount of suspended solids, they should not interfere with spray
nozzle performance. Fill spray tank ½ full of water and begin agitation.
Add pesticides as directed by label or in the following sequence and
continue filling tank: (1) Dry flowables or water dispersing granules,
(2) Wettles powders, (3) Flowables, (4) Solutions, (5) Emulsifiable
concentrates. Add BRANDT INSECT BAITS last and continue agitation
until spray solution is completely mixed. Continuous agitation of
finished spray is recommended. If spray solution has been allowed to
stand, thoroughly agitate and remix before application.

RECOMMENDATIONS: Specific use rates will vary with conditions of
application such as water hardness, application method, equipment,
spray droplet size, condition of foliage, etc. Also, higher rates than
those below may be used if recommended by pesticide labeling. Follow
pesticide label directions. However, do not add this product at a rate
which exceeds 5% of the finished spray volume.

AIR OR GROUND: Use 2-8 pints per acre with sufficient water for
thorough coverage. Due to the attractant mode of action, overall
coverage of the plant canopy is unnecessary and a 'spot spraying
technique' is adequate. Bait spraying is most effective in 'area'
treatment programs. It is ideal for medium to large fields and orchards
or where adjacent properties use the technique.

KEEP OUT OF REACH OF CHILDREN

WARNING

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
WARNING: Causes serious eye irritation. Causes skin irritation. Wear
protective eyewear, long sleeved shirt, long pants, shoes plus socks
and chemical resistant gloves made of any waterproof material when
mixing or handling concentrate. Wash thoroughly with soap and water
after handling and before eating, drinking, chewing gum, or using
tobacco. Remove and wash contaminated clothing before reuse.

ENVIRONMENTAL HAZARDS
Do not contaminate water when cleaning equipment or disposing of
equipment washwaters.

FIRST AID
Have the product container or label with you when calling a poison
control center or doctor or going for treatment.

IF IN EYES: Rinse cautiously with water for several minutes. Remove
contact lenses, if present and easy to do. Continue rinsing. If eye
irritation persists, get medical attention.

IF ON SKIN: Wash with plenty of water. If skin irritation occurs, get
medical attention.

STORAGE AND DISPOSAL
Do not contaminate water, food or feed by storage or disposal.

STORAGE: Store in original container away from children, animals,
foods, feeds, seeds and incompatible materials. Handle in accordance
with Precautionary Statements. In the event of spillage or leakage, soak
up the material with absorbent clay, sand, sawdust or other absorbent
material. Scrape up and dispose in accordance with Product Disposal.

PRODUCT DISPOSAL: Wastes resulting from the use of this product
may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL: Triple rinse (or equivalent) during mixing
and loading. Recycling decontaminated containers is the best option
of container disposal. The Agricultural Container Recycling Council
(ACRC) operates the national recycling program. To contact your state
or local ACRC recycler, visit the ACRC web page at www.acrecycle.org.
Decontaminated containers may also be disposed of in a sanitary landfill.

WARRANTY: Seller warrants that the product conforms to its chemical description and is
reasonably fit for the purpose stated on the label when used in accordance with directions
under normal conditions of use; but neither this warranty nor any other warranty of
merchantability or fitness of a particular product expressed or implied, extends to the use of
this product contrary to label conditions, or under conditions not reasonably foreseeable to
the seller, and buyer assumes the risk of any such use.
