The pesticide injection pipeline must contain a functional, automatic, quick-closing check valve to prevent the flow of fluid back toward the injection pump.

Remove scale, pesticide residues, and other foreign matter from the intake side of the injection pump and injectors. Clean the water before use. Failure to clean a tank, filter, or pesticide disposal program.

Do not apply when wind speed favors drift beyond the area intended for treatment.

Storage and Disposal

Do not contaminate water, food, or feed by storage and disposal.

Pesticide storage

Store the product in original sealed container is a cool, dry place. Store in a protective container below 86 °F (30 °C). Bioactivity may be impaired by freezing. Store frozen under cold or freezing conditions. Thaw at 70 °F (21 °C), stirring thoroughly prior to use. Do not apply when water is cold or freezing conditions will result in adverse effects.

Sprinkler Chemigation

The system must contain a functional check valve, a suction check valve, and low pressure switches which will stop the water pump motor when the irrigation system is either automatically or manually shut down. The system must contain functional interlocking controls to automatically shut off the pesticide injection pump when the water pump motor stops.

The irrigation line or water pump must include a functional pressure switch which will stop the water pump motor when the water pressure decreases to the point where pesticide distribution is adversely affected.

Systems must use a metering pump, such as a positive-displacement pump, when the water pressure decreases to the point where pesticide distribution is adversely affected. Systems must use a metering pump, such as a positive-displacement pump, when the water pressure decreases to the point where pesticide distribution is adversely affected.

The system must contain functional interlocking controls to automatically shut off the pesticide injection pump when the water pump motor stops.
CAUSES MODERATE EYE AND SKIN IRRITATION. AVOID DIRECT CONTACT WITH SKIN OR EYES. WASH THOROUGHLY WITH SOAP AND WATER AFTER HANDLING OR USING. WASH WASTE WATER FROM CLEANING EQUIPMENT OR DUMPING INTO STREAMS CAN BE ADVERSE TO WILDLIFE. USE CLEANING SOLUTIONS WITHOUT PHOSPHATE.
