For use on almond, brassica leafy vegetables crop group 5, celery and Chinese celery, corn, cotton, cucurbit vegetables, grain sorghum, grapes, leafy vegetables, except brassica, crop group 4, peanuts, pecan, soybeans, stone fruit, strawberry, sugar beets, tomatoes, tree nuts, vegetable, fruiting, group 8-10, wheat, and triticale.

ACTIVE INGREDIENTS:                                        By Wt.
Azoxystrobin: methyl (E)-2-{2-[6-(2-cyanophenoxy) pyrimidin-4-yloxy]phenyl} -3-methoxyacrylate* ........................................ 25.30%
Flutriafol.......................................................... 18.63%
OTHER INGREDIENTS:.................................... 56.07%
TOTAL:                                                                100.00%

Contains 1.82 lb. of flutriafol and 2.47 lb. of azoxystrobin active ingredient per gallon.
Suspension Concentrate.

FIRST AID

If in eyes
• Hold eye open and rinse slowly and gently with water for 15-20 minutes.
• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing.
• Call a poison control center or doctor for treatment advice.

If on skin
• Take off contaminated clothing.
• Rinse skin immediately with plenty of water for 15-20 minutes.
• Call a poison control center or doctor for treatment advice.

If swallowed
• Call a poison control center or doctor immediately for treatment advice.
• Have person sip a glass of water if able to swallow.
• Do not induce vomiting unless told to by a poison control center or doctor.
• Do not give anything to an unconscious person.
• Hold eye open and rinse slowly and gently with water for 15-20 minutes.
• Remove contact lenses, if present, after the first 5 minutes, then continue rinsing.
• Call a poison control center or doctor for treatment advice.

HOTLINE NUMBER
Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 1-800-331-3148 for emergency medical treatment information.

Note to Physician: No specific antidote. Treat symptomatically.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND DOMESTIC ANIMALS
CAUTION. Causes moderate eye irritation. Avoid contact with skin, eyes or clothing. Harmful if absorbed through skin. Harmful if swallowed. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove and wash contaminated clothing before reuse. Prolonged or frequent skin contact may cause allergic reactions in some individuals.

PERSONAL PROTECTIVE EQUIPMENT (PPE)
Applicators must wear:
long-sleeved shirt and long pants, and shoes plus socks.
Mixers and Loaders must wear:
long-sleeved shirt and long pants, shoes plus socks, and chemical-resistant gloves (such as Natural Rubber,) and protective eyewear.

Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry.

ENGINEERING CONTROLS STATEMENT
When handlers use closed systems, enclosed cabs, or aircraft in a manner that meets the requirements listed in the Worker Protection Standard (WPS) for agricultural pesticides [40 CFR 170.240(d)(4-6)], the handler PPE requirements may be reduced or modified as specified in the WPS.

ENVIRONMENTAL HAZARDS
This product is toxic to fish, mammals, and aquatic invertebrates. Azoxystrobin and flutriafol can be persistent for several months or longer. For terrestrial uses: Do not apply directly to water or to areas where surface water is present, or to intertidal areas below the mean
high water mark. Drift and run off may be hazardous to aquatic organisms in water adjacent to treated areas. Do not contaminate water when disposing of equipment washwater or rinse.

**Ground Water Advisory:** Azoxystrobin, a degrade of azoxystrobin, and flutriafol are known to leach through soil to groundwater under certain conditions as a result of label use. These compounds can leach into groundwater if used in areas where soils are permeable, particularly where the water table is shallow.

**Surface Water Advisory:** This product may impact surface water quality due to runoff of rain water. This is especially true for poorly draining soils and soils with shallow groundwater. This product is classified as having a high potential for reaching surface water via runoff for several months or more after application. A level, well-maintained vegetative buffer strip between areas to which this product is applied and surface water features such as ponds, streams, and springs will reduce the potential loading of azoxystrobin and a degrade of azoxystrobin from runoff water and sediment. Run off of this product will be reduced by avoiding applications when rainfall or irrigation is expected within 48 hours. Notify State and/or Federal authorities and FMC immediately if you observe any adverse environmental effects due to use of this product.

**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in any manner inconsistent with its labeling. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the agency responsible for pesticide regulation.

**FAIL U R E  TO  FO L L O W  THE  D IR E C TIO N S FO R  U SE  AN D  PR E C AU -

**DIS E ASE  C O N TR O L , C R O P IN JU RY AN D /O R  IL L E G AL  R E SID U E S.**

**PRODUCT DIRECTIONS**

**READ ENTIRE LABEL. USE STRICTLY IN ACCORDANCE WITH PRECAUTIONARY STATEMENTS AND DIRECTIONS, AND WITH APPLICABLE STATE AND FEDERAL REGULATIONS.**

**Product Restrictions:**
Chemigation: Do not apply this product through any type of irrigation. Greenhouses: Do not use for disease control in food crops grown in greenhouses.

**Crop Rotation Interval:** Treated areas may be rotated to the following crops based on plant back intervals outlined in the table below. Rotation to any other crop not listed in the table is not allowed.

<table>

**Compatibility Jar Test:**

**TOPGUARD EQ FUNGICIDE** is compatible with most products, however not all have been tested. Use the following compatibility test to ensure physical compatibility.

It is recommended before adding TOPGUARD EQ FUNGICIDE along with other additives or pesticide products to a spray tank that a compatibility jar test is conducted. Using a quart jar, add the proportionate amounts of the products to approximately one quart of water with agitation. Add wettable powders and water dispersible granular products first, next liquid flowables, then emulsifiable concentrates, and last liquid soluble products. After thorough mixing, allow this mixture to stand for 5 minutes. If the combination remains mixed or can be readily remixed, it is physically compatible.

Once compatibility has been proven, use the same procedure for adding products to the spray tank. Use tank mix combinations on a small number of plants before using on a larger scale. After tank mixing, follow more restrictive labeling of any tank mix partner. Do not tank mix with any product that contains a prohibition on tank mixing.

**Use of Adjuvants:** An adjuvant may be used with TOPGUARD EQ FUNGICIDE unless otherwise specified in the crop use directions. Please note that some phytotoxic effects have been demonstrated when tank mix with adjuvants that contain some form of silicone.

**TOPGUARD EQ FUNGICIDE** is compatible with most products; however, not all have been tested. Use the compatibility jar test to ensure...
physical compatibility.

Tank Mixing: TOPGURAD EQ FUNGICIDE has demonstrated some phytotoxic effects when tank mixed with emulsifiable concentrate (EC) products. These effects are enhanced if applications are made under cool, cloudy conditions that exist for several days following application. TOPGURAD EQ FUNGICIDE may be tank mixed with most fungicides, herbicides, insecticides, and/or other additives unless prohibited on the label of the tank mix partner. Follow more restrictive labeling of any tank mix partner. Although TOPGURAD EQ FUNGICIDE is compatible with most products, not all combinations have been tested. Use the compatibility chart to ensure physical compatibility. Before applying any tank mixture not specifically recommended on this label, the crop safety of the target crop should be confirmed by applying the mixture to a small area of the target crop in accordance to the label instructions.

Resistance Management: TOPGURAD EQ FUNGICIDE is a mixture that consists of two modes of fungicide action, a Group 3 (flutriafol) and a Group 11 (azoxystrobin). Repeated use of the same group of fungicides for a targeted disease may lead to the selection of resistant strains of fungi and result in reduced disease control. Utilizing premixes such as TOPGURAD EQ FUNGICIDE and/or rotating to fungicides with different modes of action are reliable disease resistance management practices.

For assistance on a particular crop and disease control situation, consult your local agricultural dealer, consultant, applicator, or state extension personnel for specific practices or recommendations in your area. FMC encourages proper use rates, timing, and alternation with other effective fungicides to ensure long-term control of the fungal diseases on this label.

Water Volumes: Use the following spray volume guidelines, unless otherwise specified in the specific Use Directions on this label:

For ground application, use a minimum of 10 gallons of spray solution per acre by ground sprayer.

For aerial application use a minimum of 10 gallons of spray solution per acre for trees and vine crops, and a minimum of 2 gallons of spray solution for row crops. Higher spray volumes will result in better coverage and thus improved disease control.

High Disease Pressure: Where a product rate range is listed, use the higher rate of TOPGURAD EQ FUNGICIDE and/or reduced spray interval when disease pressure is high and/or conditions are favorable for disease development.

Phytotoxicity to Apples: Any product containing azoxystrobin (including TOPGURAD EQ FUNGICIDE) is extremely phytotoxic to certain apple and crabapple varieties. Extreme caution must be used to prevent injury to apple trees (and apple fruit) from spray drift. AVOID SPRAY DRIFT that may reach apple trees. See Spray Management sec tion in this label for ways to reduce spray drift or contact your State extension agent for spray drift prevention guidelines in your area.

Even trace amounts of azoxystrobin may cause phytotoxicity to certain apple and crabapple varieties. DO NOT use spray equipment which has been previously used to apply azoxystrobin to spray apple trees.

THE APPLICATOR AND GROWER ARE RESPONSIBLE FOR SPRAY DRIFT MANAGEMENT.

SPRAY DRIFT MANAGEMENT

To avoid spray drift, do not apply when conditions favor drift beyond the target area. The interaction of equipment and weather related factors determine the potential for spray drift.

DO NOT spray when conditions favor drift beyond the area intended for application. Conditions that may contribute to drift include thermal inversion, wind speed and direction, sprayer nozzle/pressure combinations, spray droplet size, etc. Contact your State extension agent for spray drift prevention guidelines in your area.

Do not apply when weather conditions favor drift from treated areas to non-target aquatic habitat.

AVOIDING SPRAY DRIFT AT THE APPLICATION SITE IS THE RESPONSIBILITY OF THE APPLICATOR AND THE GROWER.

APPLICATION METHODS AND INFORMATION

Spray Equipment/Volume:

TOPGURAD EQ FUNGICIDE can be applied with equipment commonly used for ground or aerial application of pesticides. Choice of method must be in accordance with this label.

TOPGURAD EQ FUNGICIDE must be applied in sufficient water volume to ensure thorough coverage and penetration for good disease control. Avoid over-spray and physical compatibility. Before applying any product

(See please Water Volumes section and specific crop use directions.)

Mixing Order instructions:

1. Equipment must be clean before preparing spray solution.

2. Fill spray tank with clean water to reach ¾ of the final spray solution required.

3. Do not prepare more spray solution than required for immediate operation.

5. Add tank mix products in the following order:

   a. Products in PVA bags. If using a product that is in PVA bags, add this to the spray tank first, ensuring the bags are completely dissolved before adding the next product.

   b. Water dispersible products (such as TOPGURAD EQ FUNGI-
      CIDCE, dry flowables, wettable powders, suspension concentrates, or suspo-emulsions) should be added to the tank next.

   c. Water soluble products.

   d. Emulsifiable concentrates (such as oil concentrates, when applica-

   e. Water soluble additives (such as ammonium sulfate or urea

   f. Add remaining water to fill the tank to 100% of spray solution

   required.

   Ensure that each product added to the spray tank is thoroughly mixed

   and suspended prior to adding the next product. Thoroughly clean

   spray tank after each day’s use and dispose of pesticide rinsate by

   application to an already treated area.

Use Directions for Tomatoes

Target Diseases | Product Rate (fl oz/A) | Application Directions
--- | --- | ---
Anthracnose (Colletotrichum spp.) | 4.0 – 8.0 | For Late Blight apply preventatively or when conditions are favorable for disease development and continue throughout the season at 7 day application intervals. For all other diseases apply preventatively or when conditions are favorable for disease development and continue throughout the season at a 7 – 21 day application interval. For multiple applications refer to the guidelines under Resistance Management.
Powdery Mildew (Leveillula taurica) (Oidium neolycopersici) | | 
Black Mold (Alternaria alterna) | | 
Early Blight (Alternaria spp.) | | 
Late Blight (Phytophthora infestans) | | 
Septoria Leaf Spot (Septoria lycopersici) | | 
Target Spot (Corynespora cassicola) | | 

Restrictions:
- No single application may exceed 8 fl. oz. of product/A.
- Do not apply more than 4 applications per year.
- Do not apply more than 0.45 lb a.i. of flutriafol per acre per year.
- Do not apply more than 0.6 lb a.i. of azoxystrobin per acre per year.
- Restricted Entry Interval (REI): The REI is 12 hours.
- Preharvest Interval: May be applied the day of harvest (0 day PHI).

List of Tomatoes: Bush Tomato, Cocona, Currant Tomato, Garden Huckleberry, Goj Berry, Groundcherry, Nannajilla, Sunberry, Tomatillo, and Tree Tomato. Including cultivars, varieties and/or hybrids of these crops.

Use Directions for Tree Nuts. See below for list of crops. See specific use directions for Almonds and Pecans. Not for use in CA

Target Diseases | Product Rate (fl oz/A) | Application Directions
--- | --- | ---
Alternaria Leaf Spot (Alternaria alternata) | 5.0 – 8.0 | Apply preventatively or when conditions are favorable for disease development. Repeat as necessary if conditions are favorable for disease development on a 7 – 21 day interval. For multiple applications refer to the guidelines under Resistance Management.
Anthracnose (Colletotrichum acutatum) | | 
Brown Rot Blossom Blight (Monilinia fructicola) | | 
Eastern Filbert Blight (Anisognomma anomala) | | 
Septoria Leaf Spot (Septoria pisi) | | 
Scab (Cladosporium carpopophilum) | | 
Shot Hole (Wilsonomyces carpophilus) | | 

Restrictions:
- No single application may exceed 8 fl. oz. of product/A.
- Do not apply more than 4 applications per year.
- Do not apply more than 0.45 lb a.i. of flutriafol per acre per year.
- Do not apply more than 0.6 lb a.i. of azoxystrobin per acre per year.
- Restricted Entry Interval (REI): The REI is 12 hours.
- Preharvest Interval: Do not apply within 45 days of harvest.

Use Directions for Vegetable, Fruiting, Group 8-10. See below for list of crops. See specific directions for use on Tomatoes.

Target Diseases | Product Rate (fl oz/A) | Application Directions
--- | --- | ---
Anthracnose (Colletotrichum spp.) | 4.0 – 8.0 | Apply preventatively or when conditions are favorable for disease development. Repeat on a 7 – 14 day interval as necessary if conditions are favorable for disease development. For multiple applications refer to the guidelines under Resistance Management.
Cercospora Leaf Spot (Cercospora capsioides) | | 
Powdery Mildew (Leveillula taurica) | | 

Restrictions:
- No single application may exceed 8 fl. oz. of product/A.
- Do not apply more than 4 applications per year.
- Do not apply more than 0.45 lb a.i. of flutriafol per acre per year.
- Do not apply more than 1.0 lb a.i. of azoxystrobin per acre per year.
- Restricted Entry Interval (REI): The REI is 12 hours.
- Preharvest Interval: May be applied the day of harvest (0 day PHI).

List of Fruiting Vegetables: African Eggplant, Bell Pepper, Eggplant, Martynia, Non-Bell Pepper, Okra, Pea Eggplant, Peppers, Roselle, Scarlet Eggplant. Including cultivars, varieties and/or hybrids of these crops.

Use Directions for Wheat and Triticale Not for use in CA

Target Diseases | Product Rate (fl oz/A) | Application Directions
--- | --- | ---
Leaf Rust (Puccinia spp.) | 4.0 – 7.0 | Apply preventatively or when conditions are favorable for disease development. Repeat as necessary if conditions are favorable for disease development.
Powdery Mildew (Blumeria graminis tritici) | | 
Septoria Leaf and Glume Blotch (Septoria spp.) | | 
Stem Rust (Puccinia graminis) | | 
Stripe Rust (Puccinia striiformes) | | 
Tan Spot (Pyrenophora triticireperta) | | 

Restrictions:
- No single application may exceed 7 fl. oz. of product/A.
- Do not apply more than 2 applications per year.
- Do not apply more than 0.22 lb a.i. of flutriafol per acre per year.
- Do not apply more than 0.40 lb a.i. of azoxystrobin per acre per year.
- Restricted Entry Interval (REI): The REI is 12 hours.
- Preharvest Interval: Do not apply within 30 days of harvest when grown for grain, 15 days of harvest when grown for hay, 7 days when grown for forage.

WARRANTY DISCLAIMER
FMCo warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes stated on the label when used in strict accordance with the directions, subject to the inherent risks set forth below. TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, FMCo MAKES NO OTHER EXPRESS OR IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE OR ANY OTHER EXPRESS OR IMPLIED WARRANTY.

INHERENT RISKS OF USE
It is impossible to eliminate all risks associated with use of this product. Crop injury, lack of performance, or other unintended consequences may result because of such factors as use of the product contrary to label instructions (including conditions noted on the label, such as unfavorable temperatures, soil conditions, etc.), abnormal conditions (such as excessive rainfall, drought, tornadoes, hurricanes), presence of other materials, the manner of application, or other factors, all of which are beyond the control of FMCo or the Seller. All such risks shall be assumed by Buyer and User. Buyer and User agree to hold FMCo and the Seller harmless for any claims related to such factors.

LIMITATION OF REMEDIES
To the extent consistent with applicable law, the exclusive remedy for losses or damages resulting from this product (including claims based on contract, negligence, strict liability, or other legal theories), shall be limited to one of the following, at FMCo’s election:

1. Refund of purchase price paid by buyer or user for product bought, or
2. Replacement of amount of product used.

To the extent consistent with applicable law, FMCo shall not be liable for consequential, incidental, or special damages or losses.

The terms of the Warranty Disclaimer above and this Limitation of Remedies cannot be varied by any written or verbal statements or agreements. No employee or sales agent of FMCo or the Seller is authorized to vary or exceed the terms of the Warranty Disclaimer or this Limitation of Remedies in any manner.
