FIRST AID

If eye or skin contact occurs, immediately flush eye or rinse skin with plenty of water. If swallowed, rinse mouth with clean water. Call a Poison Control Center or doctor for treatment advice.

PRECAUTIONARY STATEMENTS

CAUTION. May cause eye and skin irritation. Avoid contact with skin, eyes or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove and wash contaminated clothing before reuse.

PERSONAL PROTECTIVE EQUIPMENT (PPE)

Applicators and other handlers must wear long-sleeved shirt and long pants, waterproof gloves, eye goggles and shoes plus socks. Keep and wash PPE separately from other laundry. Wash with detergent and hot water.

DIRECTIONS FOR USE

Shake well before use. Apply as a foliar treatment for crops and at the application rates listed in the table. For maximum effectiveness, apply FUNGOUT when conditions are conducive to disease development, or at the early stages of, disease development. Use nozzles and high pressure that will provide excellent coverage of the plant foliage (e.g., ConeJet nozzle at 150 to 200 PSI). The spray quality should be in the very fine category. Both sides of leaves should be covered with the product. Use the minimum spray volume to obtain full coverage. For greenhouse crops, apply with a hydraulic sprayer. The use of an ultra low volume sprayer is NOT recommended. The product can leave a white or shiny hydrosoluble residue on plants; the use of a silicone-based surfactant greatly reduces the presence of residues. The pH of the water used in the spray solution should be below 6.5. Reduce water pH with acidifier or water conditioner if necessary.

STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal. Pesticide Storage: Keep at room temperature, away from direct sun. Keep from freezing. Store in original container out of reach of children. Pesticide Disposal: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility. Container Handling: Nonrefillable container: Do not reuse or refill this container. Triple rinse container (or equivalent) promptly after emptying. Triple rinse as follows: Empty the remaining contents into the application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container ¼ full with water and recap. Shake for 10 seconds. Pour rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Drain for 10 seconds after flow begins to drip. Repeat this procedure two more times. Offer for recycling or reconditioning, or puncture and dispose of in a sanitary landfill, or by incineration, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.

WARRANTY

To the extent consistent with applicable law, seller makes no warranty, express or implied, of merchantability, fitness or otherwise concerning the use of this product other than as indicated on the label. User assumes all risks of use, storage or handling not in strict accordance with accompanying directions.

1 The use of a surfactant improves product performance. It is recommended that a phytotoxicity test be conducted on a small group of representative plants before applying to a large number of plants. Surfactant tested: Nonionic surfactant: Oroboost (for use in Organic Agriculture), Agral 90 and Liberate, at the rate of 0.1% Silicon-based surfactant: Sylgard 309 at the rate of 2 fl oz per 100 gallons.
