Supplemental Label

Priaxor®
Xemium® Brand Fungicide

For soilborne/seedling disease control using in-furrow applications to sunflower

This supplemental label expires December 31, 2017 and must not be used or distributed after this date.

Powered by Xemium® and F500® fungicides

Active Ingredients:
fluxapyroxad*: 1H-Pyrazole-4-carboxamide, 3-(difluoromethyl)-1-methyl-N-(3',4',5'-trifluoro[1,1'-biphenyl]-2-yl)- ................................................................. 14.33%
pyraclostrobin**: (carbamic acid, [2-[[1-(4-chlorophenyl)-1H-pyrazol-3-yl]oxy]methyl]phenyl)methoxy-, methyl ester) .............................................................................. 28.58%

Other Ingredients: ........................................................................................................................................... 57.09%
Total: ............................................................................................................................................................... 100.00%

* Equivalent to 1.39 pounds of fluxapyroxad per gallon
** Equivalent to 2.78 pounds of pyraclostrobin per gallon

EPA Reg. No. 7969-311

Directions For Use

- It is a violation of federal law to use this product in a manner inconsistent with its labeling.
- The supplemental labeling and the entire Priaxor® Xemium® brand fungicide container label, EPA Reg. No. 7969-311, must be in possession of the user at the time of application.
- Read the label affixed to the container for Priaxor before applying.
- Use of Priaxor according to this labeling is subject to the use precautions and limitations imposed by the label affixed to the container for Priaxor.

Product Information

Priaxor provides soilborne and seedling disease control if applied at planting or early in the season. Refer to Table 2. Priaxor® Xemium® brand fungicide In-furrow and Soil-directed Banded Sprays for list of diseases controlled or suppressed. Specific applications for soilborne diseases include in-furrow applications and soil-directed banded applications applied over the row shortly after plant emergence or during herbicide applications or cultivations. Seedling diseases are generally controlled by in-furrow applications while banded applications are more effective against soilborne disease that develops later in the season. Consult your local expert for guidance regarding application type. Under cool, wet conditions, crop injury from in-furrow or soil-directed applications can occur.
Application Instructions

Refer to the Priaxor® Xemium® brand fungicide container label for specific use directions, recommendations and restrictions in registered crops.

In-furrow Applications

Use 0.1 to 0.6 fl oz of Priaxor per 1000 row feet. Rate per 1000 row feet is dependent on the crop row spacing. Refer to Table 1. Priaxor® Xemium® brand fungicide In-furrow and Soil-directed Banded Application Rates to determine the rate per acre. Apply at planting as an in-furrow application by directing the spray into the furrow before the seed is covered. Use a minimum volume application of 2.5 gallons of water per acre.

Soil-directed Banded Applications

Apply Priaxor prior to infection as a directed spray to the soil, using single or multiple nozzles adjusted to provide thorough coverage in a band width of 7 inches or less. Apply Priaxor at a rate of 0.1 to 0.6 fl oz per 1000 row feet. Rate per 1000 row feet is dependent on the crop row spacing. Refer to Table 1. Priaxor® Xemium® brand fungicide In-furrow and Soil-directed Banded Application Rates to determine the rate per acre. As an example, on 22-inch rows, the maximum Priaxor application rate is 0.3 fl oz per 1000 row feet. Use a minimum volume application of 2.5 gallons of water per acre.

Restrictions and Limitations

Priaxor is not for use in greenhouse or transplant production systems. Refer to the Priaxor container label for restrictions pertaining to resistance management practices.

Priaxor is not for sale, distribution, or use in Nassau and Suffolk counties in New York State.

**Application Directions.** Use Priaxor at the higher labeled rate when seed and seedling disease pressure is expected to be severe or if the field has a history of seed and seedling diseases.

DO NOT apply more than 8.1 fl ozs per acre of Priaxor when applied as an in-furrow or banded treatment.

The combination of an in-furrow Priaxor application or a banding application and any subsequent foliar applications must not exceed the maximum use rate per season listed on the container label.

If tank mixing Priaxor with insecticides, conduct a jar test to determine compatibility. Refer to the Additives and Tank Mixing Information section of the Priaxor container label for instructions on how to conduct a compatibility test for tank mix components. Always use constant tank agitation when using tank mixes of Priaxor with insecticide. DO NOT tank mix Priaxor with starter fertilizers.

BASF has not tested all possible tank mix combinations and rates of additives or adjuvants. Physical incompatibility, reduced disease control, crop injury or incompatibility due to additives, adjuvants or other products used in combination with Priaxor can result from mixing Priaxor with other products.

* For 36 to 38-inch rows, use a maximum of 0.5 fl oz per 1000 row feet.
* For 34-inch rows, use a maximum of 0.5 fl oz per 1000 row feet.
* For 30 to 32-inch rows, use a maximum of 0.4 fl oz per 1000 row feet.
* For 20 to 22-inch rows, use a maximum of 0.3 fl oz per 1000 row feet.
* For 15-inch rows, use a maximum of 0.2 fl oz per 1000 row feet.
* For 7-inch rows, use a maximum of 0.1 fl oz per 1000 row feet.

* In-furrow applications are not registered for use in California on sunflowers.
** Refer to the Application Instructions section of this supplemental label for directions and rates for in-furrow applications. Rates vary depending on row spacing used.
Conditions of Sale and Warranty

The Directions For Use of this product reflect the opinion of experts based on field use and tests. The directions are believed to be reliable and must be followed carefully. However, it is impossible to eliminate all risks inherently associated with the use of this product. Crop injury, ineffectiveness or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or use of the product in a manner inconsistent with its labeling, all of which are beyond the control of BASF CORPORATION (“BASF”) or the Seller. To the extent consistent with applicable law, all such risks shall be assumed by the Buyer.

BASF warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes referred to in the Directions For Use, subject to the inherent risks, referred to above.

TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, BASF MAKES NO OTHER EXPRESS OR IMPLIED WARRANTY OF FITNESS OR MERCHANTABILITY OR ANY OTHER EXPRESS OR IMPLIED WARRANTY.

TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, BUYER’S EXCLUSIVE REMEDY AND BASF’S EXCLUSIVE LIABILITY, WHETHER IN CONTRACT, TORT, NEGLIGENCE, STRICT LIABILITY, OR OTHERWISE, SHALL BE LIMITED TO REPAYMENT OF THE PURCHASE PRICE OF THE PRODUCT.

TO THE EXTENT CONSISTENT WITH APPLICABLE LAW, BASF AND THE SELLER DISCLAIM ANY LIABILITY FOR CONSEQUENTIAL, EXEMPLARY, SPECIAL OR INDIRECT DAMAGES RESULTING FROM THE USE OR HANDLING OF THIS PRODUCT.

BASF and the Seller offer this product, and the Buyer and User accept it, subject to the foregoing Conditions of Sale and Warranty which may be varied only by agreement in writing signed by a duly authorized representative of BASF.
