PRECAUTIONARY STATEMENTS

May be fatal if swallowed or absorbed through skin. Causes skin irritation and substantial but temporary eye injury. Do not get in eyes, on skin, or on clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Wear protective nitrile gloves ≥ 14 mils or butyl rubber ≥ 14 mils, short sleeved or long sleeved shirts, and long pants when handling this product. Remove and wash contaminated clothing before reuse. Prolonged or frequently repeated skin contact may cause allergic reactions in some individuals.

Treatment for Pet Ingestion: If an animal consumes bait, and adverse health effects are observed, call a veterinarian.

Note to Physician or Veterinarian: This product has been formulated for fertility control in rats. It may possibly induce transient infertility in small male and female mammals capable of reproduction.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

READ THIS LABEL: Read label attached to product. Follow all use directions and use precautions. Use only for sites, pests, and application methods described on this label.

FOR INDOOR NON-FOOD USE ONLY: For use inside and within 1 ft around external perimeters of transit systems, public and private buildings, and commercial residential buildings.

USE RESTRICTIONS

1. Store unused bait inserts out of reach of children, pets, and livestock.
2. Bait stations must not be placed in areas where the contamination of food or surfaces that come in direct contact with food is possible.
3. Apply bait inserts only in a JT Eaton 903TP tamper resistant bait station.
4. To avoid damage to the bait station, do not use bait stations in areas open to hooved livestock or potentially destructive wildlife.
5. Bait station must be secured when placed in areas where children, pets, non-target animals (including livestock), or the general public may be present. Bait stations must also be secured when placed within 1 ft of the exterior perimeter of a building or transit station.
6. Bait station must be inside, or within 1 ft of the exterior perimeter of, a man-made structure
7. Do not place bait stations where they are likely to become submerged or inundated with water, or on an uneven surface.

SELECTION OF TREATMENT AREAS: Determine areas where target animals are most likely to find and consume bait. It is recommended that chew cards or non-toxic bait blocks be used to determine these locations. Reassess, if foraging locations change (e.g., due to seasonal changes or construction).

APPLICATION DIRECTIONS: Place bait station on a firm, level surface in an area of target pest activity. Do not place bait stations where they are likely to become submerged (e.g., below the mean higher high water mark in tidal areas, in storm sewers, or in catch basins), or on an uneven surface. Bait station must be secured when placed in areas where children, pets, non-target animals (including livestock), or the general public may be present. Bait stations must also be secured when placed within 1 ft of the exterior of a building or transit station. Do not dilute or add anything to the product. Maintain an uninterrupted supply of bait in bait stations. Keep filled bait station clean, dry and on a level surface. Check bait stations and replace bait insert as necessary, or at least every 30 days. Collect and properly dispose of any leftover bait, as instructed in the Storage and Disposal section of this label.

Installing Bait Inserts in Bait Stations:

To use new bait insert (tank and feeder tray):
1. Remove cap, keeping the opening down, screw tank onto tray while keeping it level.
2. The flow of liquid should begin immediately. Do not squeeze tank to encourage flow of bait.
3. Place insert into the appropriate side of the bait station (R or L).

To re-use feeder tray with new tank:
1. Remove insert (tank and tray) from bait station. Keep insert level to limit spills.
2. Slowly rotate insert away from you, as indicated by arrow on top of the tank, until feeder tray is on top.
3. Hold insert in this position for approximately 5 seconds to ensure all bait flows back into tank.
4. Unscrew feeder tray from tank and flip tray over until it is in upright position.
5. Remove cap on the new tank and keeping the opening down, screw the tank onto the tray.
6. The flow of liquid should begin immediately. Do not squeeze tank.
7. Place insert into the appropriate side of the bait station (R or L).
8. Screw new tank cap onto old tank and dispose in trash.

WARRANTY

To the extent consistent with applicable law, seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions. Patent Pending PCT/US2013/056428.
