**KEEP OUT OF REACH OF CHILDREN**

**FIRST AID**

**IF IN EYES:** Hold eye closed and slowly rinse with cool water for 15 min.:

- Remove contact lens, if present, after 5 min. then continue rinsing.

- Call a poison control center or doctor for treatment advice.

**IF INHALED:**

- Move person to fresh air.

- If person is not breathing, call 911 or an ambulance, then give:
  - Artificial respiration, preferably mouth-to-mouth.
  - Do not give anything by mouth to an unconscious person.

**IF SWALLOWED:**

- Call a poison control center or doctor for treatment advice.

- Do not induce vomiting unless told to do so by a poison control center.

- Hold eye open and rinse slowly and gently with water for 15 min.

- If person is not breathing, call 911 or an ambulance, then give:
  - Artificial respiration, preferably mouth-to-mouth.
  - Do not give anything by mouth to an unconscious person.

**MAY BE FATAL IF ABSORBED THROUGH THE SKIN OR SWALLOWED**

**NOTICE:**

- Women who are pregnant or nursing should not handle this product. If such contact occurs, wash the outside of gloves before cleaning/maintaining PPE. If no such instructions for washables exists, use detergent and hot water, soap, water, and detergent. Use cleaning procedures approved by state and local authorities.

**STORAGE AND DISPOSAL**

**RESTORATION**

- Do not contaminate water, food, or feed by storage, disposal, or cleaning of equipment. Do not apply this product in a manner inconsistent with its labeling.

**CONTAINER DISPOSAL**

- Follow manufacturer's instructions for packaging and disposing of this product.

**INDUSTRIAL WASTEWATER TREATMENT SYSTEMS AND SEWAGE SYSTEMS**

- Not registered for this use in the State of California.

**PRODUCT LABELING**

- Label language for product supplied as powder in general packaging: For the control of microbial/biofilms, bacteria, fungi, and algae in industrial wastewater treatment and sewage systems. Do not discharge effluent containing this product to sewer systems without previously notifying the sewage treatment plant authority. Add 7.5 to 190 ppm of product to the system, depending on the severity of contamination. Badly fouled systems should be cleaned before treatment begins.

**INDUSTRIAL WATER SYSTEMS**

- Not registered for this use in the State of California.

**ENVIRONMENTAL HAZARDS**

- The chemical is toxic to fish and wildlife. Do not discharge effluent containing this product into streams, lakes, ponds, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the applicable federal, state, or local authority. All effluent is subject to regulation by the state environmental control agency or the Hazardous Waste representative at the nearest EPA Regional Office.

- For the control of microbial/biofilms, bacteria, fungi, and algae in industrial wastewater systems, industrial process water systems, brewery pasteurizers, can warmers, retort water systems, industrial scrubbing systems, hydrostatic sterilizer water systems, coal slurry systems, immersion heaters, industrial equipment washdown, maintenance of industrial equipment water balls and influent water filtration systems. Add 7.5 to 190 ppm product at some point in the system to insure uniform mixing. Badly fouled systems should be cleaned before treatment begins.

- To maintain product quality, store at temperatures below 35°C. Keep container tightly closed to prevent contamination. Do not contaminate water by cleaning of equipment or disposal of waste.

- If these wastes cannot be disposed of by use procedures approved by state and local authorities.

**PESTICIDE STORAGE**

- Do not contaminate water, food or feed by storage, disposal or cleaning of equipment. Do not apply this product in a manner inconsistent with its labeling.

**PESTICIDE DISPOSAL**

- To maintain product quality, store at temperatures below 35°C. Keep container tightly closed to prevent contamination. Do not contaminate water by cleaning of equipment or disposal of waste.

- For the control of microbial/biofilms, bacteria, fungi, and algae in industrial wastewater treatment and sewage systems. Do not discharge effluent containing this product to sewer systems without previously notifying the sewage treatment plant authority. Add 7.5 to 190 ppm of product to the system, depending on the severity of contamination. Badly fouled systems should be cleaned before treatment begins.
