KILLS CALIFORNIA GROUND SQUIRRELS, MEADOW & PINE VOLES, NORWAY RATS, ROOF RATS & HOUSE MICE

KEEP OUT OF REACH OF CHILDREN

CAUTION

See back panels for First Aid and additional precautionary statements.

ACTIVE INGREDIENT:
Diphacinone (CAS #82-66-6): 0.005%
OTHER INGREDIENTS: 99.995%

100.000%

NET WT: 12 lbs (5.4 kg)
WARNING: If animal eats bait, call veterinarian or 1-877-854-2494 at once. • Do not give anything by mouth to an unconscious person. • Do not induce vomiting unless told to do so by the poison control center or doctor.

PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals

CAUTION: Must wear gloves. Keep away from children, domestic animals and pets. All residues are toxic to domestic mammals, birds, fish, and animals of public health or wildlife concern. Wash hands with soap and water after handling this product. Wash any contaminated clothing or equipment immediately with soap and water. Keep pets out of area treated with this product. Do not let pets eat or drink the treated area for at least 24 hours. Do not disturb or remove treated areas or overcast areas for at least 24 hours. Use of this product may create dust which can be a health hazard. Wash thoroughly after using this product. Avoid breathing dust. Do not apply to lawns, gardens, playgrounds, swimming pools, or fish ponds. Use only as directed. Do not apply this product in or on any water way, drainage ditch, pond, or other water body. Do not contaminate water, food, feed, or food or feed handling equipment, or milk or meat handling equipment or surfaces that may contact these products. Do not contaminate water, food, feed, feed or food handling equipment, or milk or meat handling equipment or surfaces that may contact these products. Do not contaminate water, food, feed, feed or food handling equipment, or milk or meat handling equipment or surfaces that may contact these products.

APPLICATION DIRECTIONS:

Foristrate® is a liquid rodenticide that provides fast, reliable control of serious rodent problems in or near commercial facilities. Use Foristrate® in or near buildings, structures, yards, basements, cellars, attics, crawl spaces, storm drains, storm sewers, ditches, and any other areas where rodents may be found.

Foristrate® is applied by baiting or by hand-broadcasting. Use Foristrate® in tamper-resistant bait stations or in feeders, or apply Foristrate® directly to pathogens where rodents are anticipated to be present. Foristrate® is effective against many species of rodents, including mice, rats, black rats, brown rats, and Norway rats. Foristrate® is also effective against meadow voles, pine voles, and striped voles. Forstrate® is effective against California ground squirrels and California pocket gophers. Foristrate® is not effective against New Zealand or black rats, and meadow voles are not effective against meadow voles.
