FIRST AID

IF SWALLOWED: Call a poison control center or doctor/health professional for treatment advice. Have the person drink a glass of water if able to swallow (do not induce vomiting unless told to do so by a poison control center or a doctor). Be sure to give any necessary mouth to mouth resuscitation to an unconscious person.

IF IN EYES: Hold eyes open and rinse slowly with water for 15 to 20 minutes. Remove contact lenses if present after 5 minutes then continue rinsing eye. Call a poison control center or doctor for treatment advice.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for at least 15 minutes.

IN CASE OF EMERGENCY CALL: 1-800-555-0111

DIRECTIONS FOR USE:

This is a violation of federal law to use this product in a manner inconsistent with its labeling. READ ALL PRECAUTIONARY STATEMENTS BEFORE USE.

WHY YOU SHOULD USE THIS PRODUCT: This non-fuming, long-lasting concentrated algaecide prevents and kills green and yellow algae. One treatment of this patented formula will prevent algae growth in your swimming pool for up to 30 days.

HOW TO USE:

Always apply chemicals separately. Never combine with other products. This is a concentrated product and it works best when added in several places directly to the pool water with the pump running. After addition of algaecide, keep the pump running for several hours and wait 15 minutes before entering pool. Pools with heavy growth of algae must be cleaned prior to use of this product. Maintain pool water in the pH range of 7.2 to 7.8. Adjust pH to 7.2 for severe algae.

INITIAL DOSE: Use Applied Biochemists® AlgaeX® sequencing agent to prevent scale and stain formation. Next, add 16 fl. oz. of Swimtrine® 90 by 10,000 gallons of pool water.

MAINTENANCE DOSE: Add 16 fl. oz. of Swimtrine® 90 by 10,000 gallons of pool water every three months to prevent algae growth.

EPA REG. NO. 88994-U
