MouseX

SAFE & EFFECTIVE CONTROL OF MICE

- Formulated for Indoor and Outdoor Use
- Non-Toxic Mouse Control
- 100% Naturally Derived
- Safe for Use Around Livestock & Pets
- Reduces Threat of Secondary Kills

MADE IN USA
PERFECT FOR BOTH PROFESSIONAL AND DIY USE

KEEP OUT OF THE REACH OF CHILDREN
Net Weight: 8 oz. / 227 gm.
SAFE & EFFECTIVE CONTROL OF MICE

MouseX®

DIRECTIONS FOR USE

INDOOR USE: Prior to treatment, all likely food sources must be removed or made unavailable to mice. Place bait trays at bait points where there are signs of mouse activity, like fresh droppings, inside or near mice runs and feeding areas. Place 10 to 15 grams or 1/2 to 1/2 ounce of MouseX into small bowls or feeding trays approximately 6 feet apart throughout the infested area. Protect bait points from non-target animals and from water. Inspect bait points frequently and replace any eaten bait. Replace any baits which become wet and re-site in a dry location. Keep topping up bait points until there are no moreakes for 48 hours.

OUTDOOR USE: Place bait points where there are signs of mouse activity, like fresh droppings or near burrows, runways, feeding places and at points of entry around the perimeter of buildings. Place 10 to 15 grams or 1/2 to 1/2 ounce of MouseX into bait stations or wrap in clinging food packaging film and place in drains, pipes, open ended boxes or under sheets of metal/wood secured at an angle against a wall (to keep the bait point dry) at intervals of approximately 6 feet, reducing to approximately 4 feet in areas of high infestation. Protect bait points from non-target species and (as the baits must be kept dry) from water. Inspect bait points frequently and replace any eaten bait. Replace any baits which become wet and re-site in a dry location. If you require more bait trays within the activity area, we suggest you use flowerpot saucers or something similar.

MouseX® can also be placed directly into mouse holes, nesting or feeding areas. Wrap 10 to 15 grams or 1/2 to 1/2 ounce of MouseX in clinging food packaging film and push down the burrow. Mouse carry disease so never use unprotected hands. Place product in burrows with a long stick or similar. Replenish packets daily until there are either no moreakes, or no mouse activity, for 48 hours.

Mouse carry disease. Therefore, remove all remains of bait and bait containers after treatment and dispose of safely. Search for mouse bodies and dispose of safely (e.g. burn or bury). Do not dispose in refuse sacks, dumpsters and transfer stations.

When handling, use precautions to avoid the possibility of disease transmission. Use disposable plastic gloves. Apply household disinfectants at recommended concentrations to mouse droppings, nest and surrounding area, and allow for at least 15 minutes contact time before removal. Clean the area with paper towels or a mop. Thoroughly wash hands with soap and water and dispose of gloves.

This product is exempt from registration with the Federal EPA under section 25(b) of FIFRA, and as such, is not registered with the Environmental Protection Agency. Ceesal International, Inc. represents that this product and its ingredients qualify for exemption from registration under FIFRA.

FORMULATED FOR INDOOR AND OUTDOOR USE

NON-TOXIC MOUSE CONTROL

100% NATURALLY DERIVED

SAFE FOR USE AROUND LIVESTOCK & PETS

REDUCES THREAT OF SECONDARY KILLS

SUGGESTED BAITS LOCATIONS FOR THE EFFECTIVE CONTROL OF MICE:

Access Points to Buildings
Attics
Holes Under Patios, Stairs, Walkways
Under Garden Structures
Holes in Lawns
Around Ponds & Water Features
Near Livestock & Poultry Housing
