ACTIVE INGREDIENTS:
Poison Free Mouse Control
Formulated for Indoor & Outdoor Use
Naturally Derived
Safe for Use Around Livestock & Pets When Used as Directed

KEEP OUT OF THE REACH OF CHILDREN

KEEP OUT OF THE REACH OF CHILDREN

CAUTION

DIRECTIONS FOR USE:

INDOOR USE:
Prior to treatment, all likely food sources must be removed or made unavailable to mice. Place bait trays at bait points where there are signs of mouse activity, like fresh droppings, inside or near mice runs and feeding areas. Place 10 to 15 grams or 1/3 to 1/2 ounce of MouseX into small bowls, conventional bait stations or feeding trays approximately 6 feet apart throughout the infested area. Protect bait points from non-target animals and from water. Inspect bait points frequently and replace any eaten bait. Replace any baits which become wet and re-site in a dry location. If you require more bait trays within the activity area, we suggest you use flowerpot saucers or something similar.

OUTDOOR USE:
Access Points to Buildings
Attics
Holes Under Patios, Stairs, Walkways
Under Garden Structures
Holes in Lawns
Around Ponds & Water Features
Near Livestock & Poultry Housing

STORAGE AND DISPOSAL: Store only in original container in a cool, dry place inaccessible to children and pets. Do not reuse empty containers. Offer for recycling if available or discard in trash.

SUGGESTED BAIT LOCATIONS FOR THE EFFECTIVE CONTROL OF MICE:

Access Points to Buildings
Attics
Holes Under Patios, Stairs, Walkways
Under Garden Structures
Holes in Lawns
Around Ponds & Water Features
Near Livestock & Poultry Housing

RESEALABLE

FOR THE EFFECTIVE CONTROL OF MICE

Composed of the following ingredients:

Perfect for both Professional and Do-It-Yourself Use

ConSeal International, Inc. represents that this product and its ingredients qualify for exemption from FIFRA, and as such, is not registered with the Environmental Protection Agency. ConSeal International, Inc. by virtue of its registration as a Private Label Manufacturer, certifies that the product is manufactured in accordance with the private label manufacturer's quality systems and the code of federal regulations dealing with the quality assurance of products of this type.
FOR THE EFFECTIVE CONTROL OF MICE

For the effective control of mice, an attractive, consistent food source must be removed or replaced with a bait which has a high acceptance rate. Mice are opportunistic feeders, and they will readily eat a bait with a high acceptance rate, whereas mice may avoid a bait with a low acceptance rate even if it has a high nutritional value.

RESEALABLE

PERFECT FOR BOTH PROFESSIONAL AND DIY USE

Tear to Open/Press to Reseal

Safe for Use Around Livestock & Pets When Used as Directed

For the effective control of mice, the bait should be strategically placed throughout the infested area. Bait points should be located around walls and surfaces, away from pools of standing water, and in areas where mice travel and gather. Bait should be placed in areas where mice have been known to enter buildings, such as cracks and crevices.

FORMULATED FOR INDOOR & OUTDOOR USE

NATURALLY DERIVED

Safe for Use Around Livestock & Pets When Used as Directed

For the effective control of mice, the bait should be strategically placed throughout the infested area. Bait points should be located around walls and surfaces, away from pools of standing water, and in areas where mice travel and gather. Bait should be placed in areas where mice have been known to enter buildings, such as cracks and crevices.
