**BIOSPERE™ CX7250 FB microbiocide**

**KEEP OUT OF REACH OF CHILDREN**

**DANGERS**:

- **DANGER**: Harmful if ingested. May cause serious eye irritation.
- **WARNING**: May irritate skin, eyes, nose, or throat, and cause respiratory irritation or sensitization if inhaled.
- **CAUTION**: May cause some skin irritation when in contact with skin or eyes.

**ACTIVE INGREDIENTS**:

- Sodium hypochlorite

**INACTIVE INGREDIENTS**:

- **Sodium chloride**
- Other substances

**AVAILABLE CONTAINS**:

- 2.5% LIGHT 
- 1.25% LIGHT 
- 0.625% LIGHT 
- 0.375% LIGHT 
- 0.25% LIGHT 

**PRECAUTIONARY STATEMENTS**

**HUMANS AND DOMESTIC ANIMALS**

**DANGER**:

- **DANGER**: Causes irreversible eye damage and skin burns. May be harmful if inhaled, may be fatal if swallowed, inhaling to nose and throat. Avoid breathing vapor. Do not get in eyes, on skin or clothing. Do not handle with bare hands. Wear protective eyewear (goggles or face shield) and rubber gloves. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove contaminated clothing and wash before reuse to avoid fires.
- **CAUTION**: May be harmful if inhaled, may irritate skin, eyes, nose, or throat, and cause respiratory irritation.

**ENVIRONMENTAL HAZARDS**

- This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product to lakes, streams, ponds, estuaries, oceans, surface waters or watercourses in accordance with the requirements of the National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority. It is a violation of this product, generated in this product to wastewater systems without previous notification the local sewage treatment plant authority.

**FIRST AID**

- **IF IN EYES**
  - Wash eyes open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.
- **IF SKIN CONTAMINATED**
  - Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes. Call a poison control center or doctor for further treatment advice.
- **IF ON SKIN OR CLOTHING**
  - Take off contaminated clothing. Rinse skin immediately with plenty of water for 15-20 minutes.

**IN CASE OF EMERGENCY CALL**

- 1-844-SOLENIS (1-844-765-3647)

**STORAGE AND DISPOSAL**

- Do not contain water, food by feed or storage by dry, dry storage, or dry storage.
- **PESTICIDE STORAGE**: Keep product dry in tightly closed container when not in use. Do not drop, roll or vitrin. Keep closed. Always replace cover. Store this product in cool, dry area away from direct sunlight and heat to avoid destabilization in case of spill, flood, flood with large areas of water. Do not use this product after the expiration date.
- **PESTICIDE DISPOSAL**: Pesticide waste are extremely toxic. Improper or disposal of waste pesticide waste or residue is a violation of Federal law. If these wastes cannot be disposed of by use in accordance with state and local regulations, contact your Federal Pesticide or Environmental Protection Agency, the Environmental Protection Agency (EPA) Regional Office for guidance.

**CONTAINER HANDLING**:

- Non-returnable containers: Do not return to the field, and if possible, store in a container in a cold, well-ventilated area. Flood with large volume of water. If fire occurs, extinguish fire by applying large volumes of water. Any product in a container near the line of flowing water can be returned to the field for use as directed by the water.

**INDUSTRIAL COOLING WATER TREATMENT**

**USE**

- Use chlorine dioxide generated from this product in a chlorinated acid solution for controlling biofouling in industrial cooling water systems including reverse osmosis membranes. Clean lightly treated systems before starting treatment.

**APPLICATION**

- Use chlorine dioxide solution in the chlorinated acid solution for dilution and treatment of chlorine dioxide solution.

**LIMITED USE**

- The typical chlorine dioxide reaction concentration range is 0.1 - 0.5 ppm. The chlorine dioxide use-solution is not applied either intermittently or continuously.

**FUNCTION**

- 1. **FUNCTION**: Do not add chlorine dioxide solution to the system by any of the following methods:
- 2. **FUNCTION**: Do not add chlorine dioxide solution to the system by any of the following methods:
- 3. **FUNCTION**: Do not add chlorine dioxide solution to the system by any of the following methods:
- 4. **FUNCTION**: Do not add chlorine dioxide solution to the system by any of the following methods:
