For use as an algicide, bactericide, fungicide, for the control of algae, aerobic bacteria, bacteria suppressing bacteria, and fungi in industrial water systems, recirculating cooling water and process water systems including cooling towers, evaporative condensers, boiler feedwaters, cooling systems, and hydrostatic steamer and return. Non-toxic contact paper and paperboard paper stock (e.g., letter paper, corrugated sheet, Kraft paper, newsprint, etc.), reinforced vinyl or terylene sheets, ad ad glass or production or finishing pipes and systems, gas storage tanks and systems, hydrophobicizing of pipes and tanks, plumbing and switching operations and oil and gas well drilling and maintenance fluids.

FORMULA 3355

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS: DANGEROUS. Causing irreversible eye damage and skin burns. Harmful if swallowed or inhaled through skin. May be irritating to nose and throat. Do not get in eyes, on skin or on clothing. Harmless effect on swallowing. May be irritating to mouth and throat. Acute effects may cause irritation, burning, and/or redness in skin, eyes, or mucous membranes. Washing with soap and water after handling and before eating, drinking, smoking, or coming near patients. PHYSICAL OR CHEMICAL HAZARDS: Do not mix with other chemicals. Mix only with water.

ENVIRONMENTAL HAZARDS: This pesticide is toxic to fish and aquatic organisms. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of the National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

DIRECTIONS FOR USE

APPLICATIONS: Acquire the product in any manner, consistent with the labeling. Read this label and use strictly in accordance with the precautionary statements and directions. This product must be kept and transferred only using a metering-system pump. Open pumping is prohibited.

This product must be kept and transferred only using a metering-system pump. Open pumping is prohibited.

PRODUCT NO. 0335556
NET WEIGHT 400 lb (228.7 KG)

F I N E D

F IN EYES

• Mask eye, open, and close softly with gentle pressure for 10-15 minutes.
• Remove contamination, if present, after first 5 minutes, then continue massage,
• Call a person control center or doctor for treatment advice.

F O N D I N G CLOTHINGS

• Wear all clothing with plenty of water for 15-30 minutes.
• Call a person control center or doctor for treatment advice.

F N H A R I E

• Wear a person control center or doctor for treatment advice.
• Wear all clothing with plenty of water for 15-30 minutes.
• Call a person control center or doctor for treatment advice.

F S W I M L A N C N

• Call a person control center or doctor for treatment advice.
• Wear a person control center or doctor for treatment advice.
• Do not touch any water with your hands.
• Do not give anything mouth to an unknown person.

Use the product container or bottle with which you are familiar to warn or control,
• Notify the responsible person in the case of medical emergency, call 1-800-424-1188 (HEATED).
• Notify the responsible person in the case of medical emergency, call 1-800-424-1188 (HEATED).
• Notify the responsible person in the case of medical emergency, call 1-800-424-1188 (HEATED).

DOSE RATES FOR ABOVE APPLICATIONS:

INITIAL DOSE: When the system is not in use, 5 to 7.5 milliliters of this product per 1000 gallons (259 to 1768 liters/750 liters) of water contained in the system. Repeat until control is achieved.

SUBSEQUENT DOSE: When residual control is indicated, 1 to 3.5 milliliters of this product per 1000 gallons (259 to 1768 liters/750 liters) of water contained in the system. Repeat as needed to maintain control.

SOLD BY: GARRATT-CALLAHAN COMPANY

ENHANCED OIL RECOVERY SYSTEMS:

DOSE RATES FOR ENHANCED OIL RECOVERY SYSTEMS:

When the system is routinely tested, or to maintain control in the system, add 42 to 420 gallons of this product per 1000 barrels of water as a slug dose for 1-6 hours per day, 1-4 times per week.

NOT FOR USE IN ESTUARINE OR MARINE OIL RECOVERY SYSTEMS:

When used as directed this product effectively controls slime-forming and sulfatereducing bacteria in injection and produced water systems, water disposal systems, and other oilfield water systems. Treat water at critical points in the system such as water or oil storage tanks, surge tanks, oil-water separators, before or after injection pumps, and injection well heads.

OIL AND GAS PRODUCTION AND TRANSMISSION PIPELINES AND SYSTEMS:

This product must be added at a point in the pipeline where uniform mixing will occur. The application must be conducted to ensure maximum distribution of the product through the entire internal surface of the pipeline. Follow dosing instructions for enhanced oil recovery systems.

GAS STORAGE WELLS AND SYSTEMS:

Individual injection wells must be treated with a sufficient quantity of this product to produce a concentration of 1000-10000 ppm of this product when diluted by the water present in the formation. Injections must be repeated as needed to maintain control. Individual drip points must be treated with a sufficient quantity of this product to produce a concentration of 1000-10000 ppm of this product when diluted by the water present in the drip points. Injections must be repeated as needed to maintain control.

HYDROTREATING:

Water used to hydrate pipelines or vessels must contain 1000-10000 ppm of this product, depending on water quality and length of time the equipment will remain idle.

PIPELINE DIPPING AND SCRAPPING OPERATIONS:

Add this product to a slug of water immediately following the scraper (ideally this water volume can be kept to a minimum and contained between the scraper and a trailing pipe). Sufficient product must be added to produce a concentration of 1000-10000 ppm of product in the water at the discharge point or pig trap depending on the length of the pipeline and the severity of biofouling.

DRILLING, Packer COMPLETION, WORKOVER AND FRACTURING FLUIDS:

This product must be added to these fluids at a point where uniform mixing will occur. Add 1000-10000 ppm of this product to a freshly prepared fluid depending on the severity of the contamination.

FIRE PROTECTION SYSTEMS:

This product is effective at controlling microbial growth in water and on pipe surfaces in the protection system. This product must be added to the fire protection system using a chemical metering pump capable of variable pump rates. The product must be injected at a point, such as a riser, manifold or makeup feed water line, where uniform mixing and distribution will occur. Add 100-800 ppm of product (0-30 ppm active ingredient) depending on severity of microbial contamination in the system. Repeat as needed.

FIRE PROTECTION SYSTEMS ARE NOT REGISTERED FOR USE IN CALIFORNIA.

FORMULA 3355

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

PEGGIDIC STORAGE:

Keep product dry and store in a cool dry well-ventilated area away from heat or open flame. Store in original container.

PEGGIDIC DISPOSAL:

Pesticide waste are acutely hazardous. Improper disposal of excess pesticide, empty containers, or the inert is a violation of Federal Law. These wastes cannot be disposed of in any way according to the instructions, contact your State Pesticide or Environmental Control Agency or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL:

Disposal of container. Do not reuse or refill this container.

Offer for recycling, if available.

TRIPLE-TAP CONTAINERS (OR EQUIVALENT) PROMPTLY AFTER EMPTIING. TRIPLE-TAP AS FOLLOWS:

<table>
<thead>
<tr>
<th>Step</th>
<th>Action</th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Fill container half full with water.</td>
</tr>
<tr>
<td>2</td>
<td>Replace and tighten cover.</td>
</tr>
<tr>
<td>3</td>
<td>Tip container (on its side) and roll 10 times in each direction.</td>
</tr>
<tr>
<td>4</td>
<td>Stand container upright and roll 10 times in each direction.</td>
</tr>
<tr>
<td>5</td>
<td>Turn the container over onto its other end and roll 10 times in each direction.</td>
</tr>
<tr>
<td>6</td>
<td>Empty the container into the appropriate disposal facility or a new tank or store container for future use or disposal.</td>
</tr>
</tbody>
</table>

Repeat this procedure two or more times.

NOTE:

You are responsible for the safety and use not in accordance with directions.

UN2922 CORROSIVE LIQUID, TOXIC, N.O.S.

(Contains Tributyl Tetraethyl Phosphonium Chloride)

8 (8.1), 9, MARINE POLLUTANT
