HEALTHCARE SURFACE DISINFECTANT

Effectiveness Against:
Staphylococcus Aureus (ATCC 25923),
Methicillin-resistant Staphylococcus Aureus (MRSA),
and Vancomycin-Resistant Enterococci Faecalis (VREF)

THIS PATENTED PRODUCT KILLS NONVIRUS
including bacteria, viruses, and Norovirus-like virus
(Feline calicivirus) in 30 seconds

DIRECTIONS FOR USE:
It is a violation of Federal Law to use this product in a manner inconsistent with its labeling. This product is not to be used as a terminal, high-level disinfectant on any surface or instrument that is not thoroughly cleaned with a detergent or soap and water before use. The product may cause physical or chemical damage to non-watercompatible materials and should only be used for treatment in high-level disinfection.

DISINFECTANT PROPER:
For disinfecting and deodorizing hard, nonporous surfaces. Store this product 30 inches from sources of heat and water. Use this product to disinfect surfaces that are heavily soiled or affected by human activities:

TECHNICAL INSTRUCTIONS:
1. Spray the disinfectant 30 inches from the surface area to be treated. Allow the disinfectant to penetrate the surface for the time specified on the label. The disinfectant is not to be used as a disinfectant on high-level disinfection.

SPECIAL INSTRUCTIONS:
The product is not to be used as a terminal, high-level disinfectant on any surface or instrument that is not thoroughly cleaned with a detergent or soap and water before use. The product may cause physical or chemical damage to non-water-compatible materials and should only be used for treatment in high-level disinfection.

STORAGE AND DISPOSAL:
Store the product at room temperature. Do not mix with or use in conjunction with any other chemical or disinfectant except as directed by the manufacturer. Do not use this product for infectious waste disposal. This product is not to be used as a terminal, high-level disinfectant on any surface or instrument that is not thoroughly cleaned with a detergent or soap and water before use. The product may cause physical or chemical damage to non-water-compatible materials and should only be used for treatment in high-level disinfection.

BACTERIA:
30 second contact time

VIRUS:
30 second contact time

USE:

In Soft-Surface Surfaces:
Ambulance
Restrooms
Kitchen

In Hospital Surfaces:
Bedside areas
Self-serve stations

In Outpatient Clinic:
Examination rooms
Exam rooms

In Healthcare Facilities:
Healthcare facilities
Laboratory facilities

In Hospitals:
Intensive Care Units
Special Care Units

In Medical Research Facilities:
Medical research facilities

In Veterinary Facilities:
Vaccination areas

In Food Handling Areas:
Kitchen

In Other Areas:
Office areas

DISTRIBUTION REGULATIONS:
This product is regulated by the United States Department of Health and Human Services, Food and Drug Administration. The product is not to be used as a terminal, high-level disinfectant on any surface or instrument that is not thoroughly cleaned with a detergent or soap and water before use. The product may cause physical or chemical damage to non-water-compatible materials and should only be used for treatment in high-level disinfection.
