EasyDefense™ Herbal Squeeze-On for Cats uses natural active ingredients to effectively repel fleas, ticks and mosquitoes and to avoid bites, rashes and hot spots. This topical formula is easy to apply and contains no deet, ensuring natural, effective long-term protection against fleas, ticks and other pests.

**INSTRUCTIONS:**
1. Snap the cap off the tip of the tube.
2. Lift or spread the fur between the shoulder blades of the cat until you can see the skin.
3. Place the tip on the skin of the cat and apply. Hold the cat briefly, allowing the liquid to absorb. If needed, tube contents may be applied in this manner over several days, resaturating the tube daily until entire dose is applied. To resaturate, turn the cross-shaped cap upside down, inserting it back in tube.
4. Work any excess oil into hair before allowing your pet near furniture. Avoid bathing or submerging your cat in water for 24 hours after application. Apply once a month for continuous protection. Reapply after bathing with soap or shampoo.

**WATER RESISTANCE:** EasyDefense Herbal Squeeze-On is water resistant but not waterproof. Reapply after bathing with soap or shampoo.

**IMPORTANT:** EasyDefense Herbal Squeeze-On Treatment protects against new fleas and will not eliminate an existing infestation. If your pet currently has fleas please use Only Natural Pet All-In-One Flea Remedy to eliminate them prior to using the squeeze-on treatment.

**SENSITIVITIES:** May occur. We recommend testing the product by applying a few drops on the nape of the neck, and waiting 24 hours before applying the full dose. If an adverse reaction occurs, bathe your pet with shampoo or a mild detergent, rinsing with large amounts of water. Contact your veterinarian if adverse symptoms continue or worsen.

**ACTIVE INGREDIENTS**
