EasyDefense Flea & Tick Collar for Cats is a natural alternative to conventional, synthetic made chemical pest control. Using the scientifically proven, pest repelling power of Geraniol on a PVC and phthalate-free collar, pests are effectively repelled up to 4 months.

INSTRUCTIONS:
1. Unwrap collar, remove and discard inner strip of nylon.
2. Fasten the collar around your cat's neck.
3. For a correct fit be sure that two fingers can fit comfortably between the collar and the neck of cat.
4. Once you've determined the fit is correct, cut off any excess length beyond the buckle and throw away. Replace collar every four months for maximum effectiveness.

Occasionally pets can be sensitive to natural essential oils. If your pet shows signs of sensitivity follow these instructions:
On the first day use the collar on your pet outside for one hour only, then remove. Each day following, increase the hours your pet wears the collar by one hour daily. Continue for four days to ensure the collar is well tolerated by your pet. If there is no sensitivity reaction, begin continuous wear.

IMPORTANT: EasyDefense Flea & Tick Collar protects against new fleas, ticks and mosquitoes but will not eliminate an existing flea infestation. If your pet currently has fleas please use Only Natural Pet All-In-One Flea Remedy to eliminate them prior to using the EasyDefense Flea & Tick Collar.

WARNINGS: PLEASE KEEP OUT OF REACH OF CHILDREN. When using this product avoid contact with eyes. If contact occurs, rinse eyes thoroughly with water. Avoid contact with clothing. Wash hands immediately with soap and water after attaching. If swallowed, contact a health care professional immediately.
