PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS & DOMESTIC ANIMALS

CAUTION: Harmful if swallowed, inhaled or absorbed through skin. Avoid contact with eyes, ears or clothing. Avoid breathing spray mist. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet. Remove contaminated clothing and wash before reuse.

FIRST AID

IF swallowed: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. For adults or children over 6 months, give 1 fluid ounce (30 mL) of water by mouth in one application.

IF inhaled: Move person to fresh air. If person is not breathing, call 911 or do artificial respiration. If person is breathing, give 2 to 4 mL per minute of 21% oxygen and 79% air.

IF on skin: Wash skin immediately with plenty of water for 15-30 minutes. Call a poison control center or doctor for further treatment advice.

IF in eyes: Hold eyelids open and rinse slowly and gently with water for 15-30 minutes. Call a poison control center or doctor for further treatment advice.

IF on clothing: Take off contaminated clothing. Rinse all immediately with plenty of water for 15-30 minutes.

IF on hair: Wash hair repeatedly with plenty of water for the remainder of the day.

IF on exposed skin: Wash exposed skin extensively for 15-30 minutes. Take shower or bathe. Call a poison control center or doctor for further treatment advice.

IF on eyes: Hold eyelids open and rinse slowly and gently with water for 15-30 minutes. Call a poison control center or doctor for further treatment advice.

IF on clothing: Take off contaminated clothing. Rinse all immediately with plenty of water for 15-30 minutes. Call a poison control center or doctor for further treatment advice.

IF on hair: Wash hair repeatedly with plenty of water for the remainder of the day.

IF on exposed skin: Wash exposed skin extensively for 15-30 minutes. Take shower or bathe. Call a poison control center or doctor for further treatment advice.

IF on eyes: Hold eyelids open and rinse slowly and gently with water for 15-30 minutes. Call a poison control center or doctor for further treatment advice.

IF on clothing: Take off contaminated clothing. Rinse all immediately with plenty of water for 15-30 minutes. Call a poison control center or doctor for further treatment advice.

IF on hair: Wash hair repeatedly with plenty of water for the remainder of the day.

IF on exposed skin: Wash exposed skin extensively for 15-30 minutes. Take shower or bathe. Call a poison control center or doctor for further treatment advice.

IF on eyes: Hold eyelids open and rinse slowly and gently with water for 15-30 minutes. Call a poison control center or doctor for further treatment advice.

IF on clothing: Take off contaminated clothing. Rinse all immediately with plenty of water for 15-30 minutes. Call a poison control center or doctor for further treatment advice.

IF on hair: Wash hair repeatedly with plenty of water for the remainder of the day.

IF on exposed skin: Wash exposed skin extensively for 15-30 minutes. Take shower or bathe. Call a poison control center or doctor for further treatment advice.

IF on eyes: Hold eyelids open and rinse slowly and gently with water for 15-30 minutes. Call a poison control center or doctor for further treatment advice.

IF on clothing: Take off contaminated clothing. Rinse all immediately with plenty of water for 15-30 minutes. Call a poison control center or doctor for further treatment advice.

IF on hair: Wash hair repeatedly with plenty of water for the remainder of the day.

IF on exposed skin: Wash exposed skin extensively for 15-30 minutes. Take shower or bathe. Call a poison control center or doctor for further treatment advice.

IF on eyes: Hold eyelids open and rinse slowly and gently with water for 15-30 minutes. Call a poison control center or doctor for further treatment advice.

IF on clothing: Take off contaminated clothing. Rinse all immediately with plenty of water for 15-30 minutes. Call a poison control center or doctor for further treatment advice.

IF on hair: Wash hair repeatedly with plenty of water for the remainder of the day.

IF on exposed skin: Wash exposed skin extensively for 15-30 minutes. Take shower or bathe. Call a poison control center or doctor for further treatment advice.

IF on eyes: Hold eyelids open and rinse slowly and gently with water for 15-30 minutes. Call a poison control center or doctor for further treatment advice.

IF on clothing: Take off contaminated clothing. Rinse all immediately with plenty of water for 15-30 minutes. Call a poison control center or doctor for further treatment advice.

IF on hair: Wash hair repeatedly with plenty of water for the remainder of the day.

IF on exposed skin: Wash exposed skin extensively for 15-30 minutes. Take shower or bathe. Call a poison control center or doctor for further treatment advice.

IF on eyes: Hold eyelids open and rinse slowly and gently with water for 15-30 minutes. Call a poison control center or doctor for further treatment advice.

IF on clothing: Take off contaminated clothing. Rinse all immediately with plenty of water for 15-30 minutes. Call a poison control center or doctor for further treatment advice.

IF on hair: Wash hair repeatedly with plenty of water for the remainder of the day.

IF on exposed skin: Wash exposed skin extensively for 15-30 minutes. Take shower or bathe. Call a poison control center or doctor for further treatment advice.

IF on eyes: Hold eyelids open and rinse slowly and gently with water for 15-30 minutes. Call a poison control center or doctor for further treatment advice.

IF on clothing: Take off contaminated clothing. Rinse all immediately with plenty of water for 15-30 minutes. Call a poison control center or doctor for further treatment advice.

IF on hair: Wash hair repeatedly with plenty of water for the remainder of the day.

IF on exposed skin: Wash exposed skin extensively for 15-30 minutes. Take shower or bathe. Call a poison control center or doctor for further treatment advice.

IF on eyes: Hold eyelids open and rinse slowly and gently with water for 15-30 minutes. Call a poison control center or doctor for further treatment advice.

IF on clothing: Take off contaminated clothing. Rinse all immediately with plenty of water for 15-30 minutes. Call a poison control center or doctor for further treatment advice.

IF on hair: Wash hair repeatedly with plenty of water for the remainder of the day.

IF on exposed skin: Wash exposed skin extensively for 15-30 minutes. Take shower or bathe. Call a poison control center or doctor for further treatment advice.

IF on eyes: Hold eyelids open and rinse slowly and gently with water for 15-30 minutes. Call a poison control center or doctor for further treatment advice.

IF on clothing: Take off contaminated clothing. Rinse all immediately with plenty of water for 15-30 minutes. Call a poison control center or doctor for further treatment advice.

IF on hair: Wash hair repeatedly with plenty of water for the remainder of the day.

IF on exposed skin: Wash exposed skin extensively for 15-30 minutes. Take shower or bathe. Call a poison control center or doctor for further treatment advice.

IF on eyes: Hold eyelids open and rinse slowly and gently with water for 15-30 minutes. Call a poison control center or doctor for further treatment advice.

IF on clothing: Take off contaminated clothing. Rinse all immediately with plenty of water for 15-30 minutes. Call a poison control center or doctor for further treatment advice.

IF on hair: Wash hair repeatedly with plenty of water for the remainder of the day.

IF on exposed skin: Wash exposed skin extensively for 15-30 minutes. Take shower or bathe. Call a poison control center or doctor for further treatment advice.

IF on eyes: Hold eyelids open and rinse slowly and gently with water for 15-30 minutes. Call a poison control center or doctor for further treatment advice.

IF on clothing: Take off contaminated clothing. Rinse all immediately with plenty of water for 15-30 minutes. Call a poison control center or doctor for further treatment advice.

IF on hair: Wash hair repeatedly with plenty of water for the remainder of the day.

IF on exposed skin: Wash exposed skin extensively for 15-30 minutes. Take shower or bathe. Call a poison control center or doctor for further treatment advice.

IF on eyes: Hold eyelids open and rinse slowly and gently with water for 15-30 minutes. Call a poison control center or doctor for further treatment advice.

IF on clothing: Take off contaminated clothing. Rinse all immediately with plenty of water for 15-30 minutes. Call a poison control center or doctor for further treatment advice.

IF on hair: Wash hair repeatedly with plenty of water for the remainder of the day.

IF on exposed skin: Wash exposed skin extensively for 15-30 minutes. Take shower or bathe. Call a poison control center or doctor for further treatment advice.

IF on clothing: Take off contaminated clothing. Rinse all immediately with plenty of water for 15-30 minutes. Call a poison control center or doctor for further treatment advice.

IF on hair: Wash hair repeatedly with plenty of water for the remainder of the day.

IF on exposed skin: Wash exposed skin extensively for 15-30 minutes. Take shower or bathe. Call a poison control center or doctor for further treatment advice.
APPLICATION INSTRUCTIONS

To keep insects away from entering the house, use a hose and spray a 2 foot band of soil around the house next to the foundation. Also spray the foundation of the house at a height of 2 feet. Repeat application every 14 days if necessary.

PEEKS AND TIPS

- Do not spray around pets. To control the source of flies and mosquitoes, you must be treated with a product registered for application to animals.

APPLICATION THROUGH A HOSE END READY-TO-SPRAY CONTAINER

This method of application is fast, easy, and convenient. Apply to areas where insects congregate. To use, point the nozzle into the area to be treated and spray. This method is also used to treat small areas where insects are present.

APPLICATION INSTRUCTIONS

1. Connect sprayer to hose and run water on the water tank. 2. Install the hose at the water tank so that water is directed to the desired area. 3. Place the parts in the container to be sprayed, then fill small plastic bag with water and add liquid to Container. 4. Follow APPLICATION INSTRUCTIONS on each can appearing on this book.
