Do not contaminate feed or food. Do not contaminate water when disposing of product or packaging.

Environment hazards

Never apply to or near eyes or mouth. Read precautions carefully. However, it is impossible to eliminate all risks associated with the use of this product.

If applied to eyes: wash with water for 15-20 minutes. Call a poison control center or doctor immediately if the solution enters the eyes.

If applied to mouth: rinse with water. Do not give anything by mouth to an unconscious person. Do not induce vomiting unless told to do so by the poison control center or doctor. Have person sip a glass of water if able to swallow. Call a poison control center or doctor for treatment advice.

If on skin: wash with soap and water. Call a poison control center or doctor immediately if the solution enters the skin.

If inhaled: get the person to the freshest air. If the person is not responsive, call the local poison control center or doctor immediately.

_{HOW TO OPEN}_

1. Prepare applicator as shown in "How to Open".
2. Apply the entire contents of the applicator evenly to three or four spots on the top of the back of the dog from the shoulder to the base of the tail as shown:
3. Discard empty applicator and packaging as described in the Storage and Disposal section.

Repeat steps 1 to 3 for each applicator.

DIRECTIONS FOR USE

_What is Advecta 3 for Dogs?_

Advecta 3 for Dogs is a Topical Flea and Tick Treatment for Dogs.

Advecta 3 for Dogs is a Topical Flea and Tick Treatment for Dogs. It is a combination of three active ingredients: Imidacloprid, Permethrin, and Pyriproxyfen.

Each applicator is designed to provide flea and tick control for one month when applied to dogs on Schedule A (up to 15 lbs) or Schedule B (15 lbs and over).

Schedule A: Apply at 7 days
Schedule B: Apply at 7 days

 Dogs more often than once every seven (7) days. Once flea control is attained, return to a monthly application schedule.

Dogs more often than once every seven (7) days. Once flea control is attained, return to a monthly application schedule.

_What is flea allergy dermatitis (FAD)?_

Flea allergy dermatitis is a hypersensitivity skin disorder that occurs when dogs are exposed to the saliva of fleas. The saliva of fleas contains a protein that, when ingested by a dog, can cause an allergic reaction and result in skin irritation.

_Flea Prevention Schedule_

(FAD). Treatment of dogs with Advecta 3 for Dogs rapidly kills fleas and may reduce the incidence of this condition.

In efficacy, injury, and other unintended consequences may result because of such factors as manner of use or application (including misuse), the presence of other materials, weather conditions, and other unknown factors, all of which are beyond the control of CAP IM Supply, Inc. All such risks shall be assumed by the user or buyer.
