ACTIVE INGREDIENTS:
Capsicum oleoresin extract* ...................................... 7.6%
Garlic oil .................................................................. 23.4%
Soybean oil .............................................................. 59.3%
OTHER INGREDIENTS: .............................................. 9.7%
TOTAL: ..................................................................100.0%

*Contains 0.26% nominal concentration of Capsaicin and related capsaicinoids.

KEEP OUT OF REACH OF CHILDREN
CAUTION
See back booklet label for additional directions for use, precautionary statements and first aid.

NET CONTENTS 1 Quart (946 ml)
FIRST AID
If in eyes or on clothing:
• Take off contaminated clothing.
• Rinse skin immediately with plenty of water for 15-20 minutes.
• Call a poison control center or doctor for treatment advice.

STORAGE AND DISPOSAL
Do not contaminate water, food, or feed by storage or disposal.

Pesticide Storage:
Store in a cool, dry place away from heat or open flame.

Pesticide Disposal:
To avoid waste, use all material in this container for application according to label directions. If wastes cannot be avoided, offer remaining pesticide or waste disposal program (often such programs are run by state or local governments or industry).

Container Reuse:
Nonrefillable container. Do not reuse or refill this container. Triple rinse container promptly after emptying. Triple Rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip.

If on skin or clothing: • Take off contaminated clothing. • Rinse skin immediately with plenty of water for 15-20 minutes. • Call a poison control center or doctor for treatment advice. Have the product container or label with you when calling a poison control center or doctor, or going for treatment. You may also contact 1-866-839-8518 for emergency medical treatment information.

General Hydroponics PREVASYN™ Insect Repellant/Insecticide has a repellant effect on soft bodied insects and mites. Increases pest vulnerability to insecticides or miticides. This product acts on contact to weaken the cuticle of some immature stages of insect and mite pests. For best preventative results, this product must be applied at least once a week on a regular and continuous basis. The repellant effect of this product protects the crops from pest population establishment by its anti-feedant and anti-egg laying properties.
KEEP OUT OF REACH OF CHILDREN

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS & DOMESTIC ANIMALS

CAUTION: Harmful if absorbed through skin. Avoid contact with skin, eyes or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet. Remove and wash contaminated clothing before reuse. Wear chemical resistant gloves. Prolonged or frequently repeated skin contact may cause allergic reactions in some individuals.

PERSONAL PROTECTIVE EQUIPMENT (PPE)

Applicators and other handlers must wear:
- Long-sleeved shirt and long pants
- Shoes plus socks
- Chemical resistant gloves

USER SAFETY RECOMMENDATIONS

Users should:
- Remove clothing/PPE immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing.
- Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

ENVIRONMENTAL HAZARDS

For terrestrial uses: Do not apply directly to water or to areas where surface water is present, or to tidal areas below the mean highwater mark. Do not contaminate water when disposing of equipment washwater or rinsates.

DIRECTIONS FOR USE

It is a violation of federal law to use this product in a manner inconsistent with its labeling. For any requirements specific to your State or Tribe, consult the State or Tribal agency responsible for pesticide regulation. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. Read all Directions for Use carefully before applying.

Agricultural Use Requirements

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR Part 170. This Standard contains requirements for the protection of agricultural workers on farms, forests, nurseries, greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE) and restricted-entry intervals. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted entry interval (RED) of 4 hours.

PPE required for early entry into treated areas that is permitted under the Worker Protection Standard and involves contact with anything that has been treated such as plants, soil, or water is:
- Coveralls
- Waterproof gloves
- Shoes plus socks

Non-Agricultural Use Requirements

The requirements in this box apply to uses of this product that are NOT within the scope of the Worker Protection Standard for Agricultural Pesticides (40 CFR Part 170). The WPS applies when this product is used to produce agricultural plants on farms, forests, nurseries, or greenhouses.

Do not enter or allow people (or pets) to enter the treated area until sprays have dried.

USE INFORMATION

This product is a repellent and insecticide formulated using concentrated plant extracts that can be used alone as a repellent or in tank mixes with other biological or conventional insecticides or miticides to improve the level of control.

The repellent effect of this product protects the crops from pest population establishment by its antifeedant and anti-egg laying properties. The irritant effect of this product increases pest mobility, exposure and vulnerability to insecticides or miticides that act on contact. This product weakens the outside of some immature stages of soil and mite pests.

Read all directions before using this product. Apply this product directly to any food or non-food crop growing in field or greenhouse, use to and, including the day of harvest, at a maximum rate of...
MIXING AND APPLICATION:

GROUND APPLICATIONS:

1. This product has a repellent and irritant effect on adult and immature stages of soft bodied insects and mites.
2. Apply with most types of ground spray equipment.
3. This product must come into contact with the targeted pests to be effective. For best results coverage typically requires a minimum of 70 gallons of total spray volume per acre. Higher volumes will be required for larger perennial crops.
4. For best preventive results, this product must be applied at least once a week on a regular and continuous basis.
5. When pest pressure is heavy or plant canopy is dense, use higher rates and increase spray frequency. Repeat application if measurable rain occurs within two to three hours of spraying.

PHYTOTOXICITY: This product has been evaluated for phytotoxicity on a wide range of crops and ornamentals. However, since testing on all varieties of all crops and ornamentals is not feasible, testing a small portion of the area to be treated for phytotoxicity is recommended before treating the entire area. Further, all possible combinations or sequences of pesticide sprays, including other fertilizers, surfactants, adjuvants and other pesticides, have not been tested. Thus, testing for phytotoxicity of spray mixtures is recommended. It is further recommended that spray equipment used to apply this product be thoroughly cleaned before use. The addition of spray adjuvants enhances control in some crops under ideal conditions. Addition of certain adjuvants may cause phytotoxicity. Therefore, the addition of crop oils and other adjuvants should be thoroughly tested before using. The addition of crop oils to spray mixtures is NOT recommended on ornamental crops, Citrus, Bordeaux mixtures, and highly alkaline products can cause unacceptable phytotoxicity and/or reduced effectiveness on target pests. Avoid tank mix combinations of this product with compounds known to be incompatible with oil-based formulation to prevent phytotoxicity. "Way of bloom" on certain crops and ornamental plants may be reduced after a GENERAL HYDROPHONIC PREVASYN INSECT REPELLANT / INSECTICIDE application.

PREHARVEST INTERVAL: This product can be applied up to and including the day of harvest.

INSECTICIDAL AND MITICIDAL USES

Use this product as a foliar spray to repel and suppress pests. For best results use at lower rates when pest pressure is low or use as a preventative management tool in an integrated pest management system. When pest pressure is high use the product alone at its medium to high rates or tank mix with other contact insecticides or miticides.

RATES

Rates indicated are for uses in agricultural and ornamental crops grown in the field or in greenhouses.

Stand-Alone:
1. Dilute up to 5 pints of this product per 100 gallons of water and apply by spraying every 4-7 days, when used as a preventative management tool or in an integrated pest management system.
2. For best results use a spreader/sticker with this product when applied alone.
3. When tank mixing, read and carefully follow all applicable use directions, precautions, and limitations on the respective product labels. In interpreting all labels for the tank mix, the most restrictive situations must apply.
4. When pest pressure is heavier or canopies are dense, use higher rates and consider tank mixes with other insecticides or miticides.

Tank Mix:
1. When tank mixed with other insecticides or miticides, this product will provide improved levels of control by increasing pest exposure to those products due to its irritant effect.
2. Mix this product at a rate of 7 to 14 ounces per acre with other chemical or biological insecticides or miticides. Follow the use directions of all products used in the tank mix including use directions and additive/adjunct requirements or constraints.

GREENHOUSE AND ORNAMENTAL USES

Stand Alone:
1. Dilute up to 5 pints of this product per 100 gallons of water and apply by spraying every 4-7 days when used as a preventative management tool or in an integrated pest management system.
2. For best results use a spreader/sticker with this product when applied alone.
3. When tank mixing, read and carefully follow all applicable use directions, precautions, and limitations on the respective product labels. In interpreting all labels for the tank mix, the most restrictive situations must apply.
4. When pest pressure is heavier, use higher rates and consider tank mixes with other insecticides or miticides.

Tank Mix:
1. When tank mixed with other insecticides or miticides, this product will provide improved levels of control by increasing pest exposure to those products due to its irritant effect.
2. Mix this product at a rate of 4 to 14 ounces per 100 gallons of water with other chemical or biological insecticides or miticides.
3. When pest pressure is heavier, use higher rates.
**TARGETED PESTS:**

Use this product in a foliar spray to repel or suppress soft-bodied pests.

- *Mites* (such as *Tetranychus spp.*, *Oligonychus spp.*, *Panonychus spp.*, *Polyphagotarsonemus latus*, *Phyllocoptes citri!* *,* *Brevipalpus phoebe*, *Sidneytarsonemus spink*!)*
- *Thrips* (such as *Thrips spp.*, *Frankliniella spp.*, *Heliothrips spp.*, *Scirtothrips citri!*)
- *Psyllids* (such as *Bacteriella spp.*, *Tetranychus cinnabarinus*, *Coccus spp.*!*)
- *Leafhoppers* (such as *Empoasca spp.*, *Macrosiphus*, *and* *Graphocephala spp.*!)
- *Leptodora larva* (such as *Spodoptera spp.*, *Heliothis spp.*, *Ida abaxi!* *,* *Theca spp.*, *Sphingon basalis!*)
- *White fly* (such as *Diaschis drosophila*, *Trialeurodes*, *Bemisia spp.*!)
- *Other pests* such as *Drosophila, Hypoderma spp.*, *headed bugs* (*Phloeococcinius**, *Pseudococcinius*, *Pyromicanse brevis**, *and* *plant bugs* (*Lophostethus**, *Neora***)

**CROP GROUPS** | **USE SITES**
--- | ---
**TOBACCO** | Eggplant, Groundcherry, Paprika, Pepper (including bell pepper, chilli pepper, cooking pepper, dill, sweet pepper, tomato, tomato leaf, tomato stem)
**FRUITING VEGETABLES** | Alspice, Angelica, Anise (anise seed and stem), Anetho (seed), Bahia (also known as the Climbing Bahia), Basils (Lemon basil, Sweet basil), Basil, Borago, Burley, Chamomile, Caper buds, Caraway, Caraway (black), Cardamom, Cassia bark, Cassia buds, Celosia, Celery seed, Cherries (dried), Chinese Chive, Cinnamon, Clove buds, Coriander (also known as the Coriander leaf), Coriander (Coriander seed), Costmary, Cumin (also known as the Coriander leaf), Dill, Dill flower, Dill seed, Fennel (common, Florence), Fenugreek, Ginger, Grains of paradise, Honeysuckle, Hyssop, Juniper berry, Lavender, Lemongrass, Lovage, Leek leaf and seed, Mace, Marigold, Marjoram, Mustard (seed), Mustard leaf, Mustard leaf and seed, Nutmeg, Parsley (dried), Penicuvi, Pepper (black and white, pepper), Poppy seed, Poppy seed, Rosemary, Rue, Saffron, Sage, Savory (summer and winter), Savory (summer and winter), Sweet basil leaf, Tansy, Thyme, Thyme, Vanilla, Wintergreen, Woodruff, Wormwood
**HERBS AND SPICES GROUP** | Amaranth, Angelica, Broccoli, Broccoli raib (rapini), Brussels Sprouts, Cabbage, Cauliflower, Carrot, Cavolo broccoli, Celery, Chinese Broccoli (gai lan), Chinese Cabbage (broccoli, Napa), Chinese mustard Cabbage (gaio choy), Chinese Cabbage (Cellota, Cabbage), Chervil, Chrysanthemum (edible-leaved, Garland), Collards, Corn salad, Cress (garden, upland), Daikon, Dock (cornel), Endive (escarole), Fennel (fronce), Kale, Kohlrabi, Lettuce (head and leaf), Mizuna, Mustard Greens, Mustard Sprouts, Orach, Parsley, Purslane (garden, winter), Radish (red chicory), Rape Greens, Rhubarb, Spinach, Spinach (New Zealand, red), Swiss Chard, Turnip Greens
**BRASSICA(COLE) LEAFY VEGETABLES** | Amaranth, Angelica, Broccoli, Broccoli raib (rapini), Brussels Sprouts, Cabbage, Cauliflower, Carrot, Cavolo broccoli, Celery, Chinese Broccoli (gai lan), Chinese Cabbage (broccoli, Napa), Chinese mustard Cabbage (gaio choy), Chinese Cabbage (Cellota, Cabbage), Chervil, Chrysanthemum (edible-leaved, Garland), Collards, Corn salad, Cress (garden, upland), Daikon, Dock (cornel), Endive (escarole), Fennel (fronce), Kale, Kohlrabi, Lettuce (head and leaf), Mizuna, Mustard Greens, Mustard Sprouts, Orach, Parsley, Purslane (garden, winter), Radish (red chicory), Rape Greens, Rhubarb, Spinach, Spinach (New Zealand, red), Swiss Chard, Turnip Greens

**GREENHOUSE USE SITES**

| GREENHOUSE VEGETABLE PRODUCTION | Tomatoes, cucumbers, leaf and Bibb lettuce, bell peppers, eggplant, and herbs and grown vegetables in greenhouses. |

**ORNAMENTAL USE SITES**

| REPRESENTATIVE COMMODITIES | Amaranthus, Aster, Azalea, Berries, Fuchsia, Calendula, Carnation, Chrysanthemum, Dahlia, Daisy, Lilies, Ivy, Ficus, Gardenia, Impatiens, Irises, Jasmine, Lilies, Marigold, Philodendron, Poinsettia, Rose, Zinnia |

**STORAGE AND DISPOSAL**

Do not contaminate water, food, or feed by storage or disposal.

**Pesticide Storage:** Store in a cool, dry place away from heat or open flame.

**Pesticide Disposal:** To avoid waste, use all material in this container by applying according to label directions. If wastes cannot be avoided, offer remaining product to a waste disposal facility or pesticide disposal program (often such programs are run by state or local governments or by industry).

**Container Handling:** Nonreturnable container. Do not reuse or refill this container. Triple rinse container promptly after emptying. Triple Rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container 1/4 full with water and recap. Shake for 10 seconds. Pour rinse into application equipment or a mix tank or store rinse for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Then offer for recycling if available or puncture and dispose of in a sanitary landfill, or by incineration.
KEEP OUT OF REACH OF CHILDREN

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS & DOMESTIC ANIMALS

CAUTION: Harmful if absorbed through skin. Avoid contact with skin, eyes, or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove and wash contaminated clothing before reuse. Wear chemical resistant gloves. Prolonged or frequently repeated skin contact may cause allergic reactions in some individuals.

ENVIRONMENTAL HAZARDS

To protect the environment, do not allow pesticide to enter or run off into storm drains, ditches, gutters or surface waters. Applying this product in calm weather when rain is predicted for the next 24 hours will help to ensure that wind or rain does not blow or wash the pesticide off the treatment area. Rinsing application equipment over the treated area will help avoid runoff to water bodies or drainage systems.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

HOME AND GARDEN USE DIRECTIONS

This product is a repellent and insecticide that can be used alone as a repellent or in tank mixes with other biological or conventional insecticides or miticides to improve the level of control.

The repellent effect of this product protects the crops from pests population establishment by its antifeedant and anti-egg laying properties.

The irritant effect of this product increases pest mobility, exposure and vulnerability to insecticides or miticides that act on contact. This product weakens the cuticle of some immature stages of insect and mite pests.
