One Step Cleaner / Disinfectant / Deodorizer / Sanitizer

- Cleans and disinfects in one easy step
- Does not contain bleach or ammonia
- Effective in the presence of 5% serum contamination
- Kills bacteria****
- Strong wipe for heavy duty cleaning
- These wipes will not harm most surfaces

Kills 99.9% of bacteria² in 15 seconds!

Antibacterial Formula Starts Killing Bacteria on Contact

Active Ingredients:
- Octyl decyl dimethyl ammonium chloride 0.069%
- Dioctyl dimethyl ammonium chloride 0.028%
- Didecyl dimethyl ammonium chloride 0.042%
- Alkyl (C14, 50%; C12, 40%; C16, 10%) dimethyl benzyl ammonium chloride 0.093%

Other Ingredients: 99.768%
Total 100.00%

¹ Includes weight of absorbent wipe.
²Staphylococcus aureus (Staph)
Klebsiella pneumoniae (Klebsiella)
Campylobacter jejuni

Net Wt: 11 lbs 12 ounces

See back panel for Precautionary Statements and First Aid
Use Monk Disinfectant Wipes on washable hard, nonporous surfaces of: appliances-exteriors, computer keyboards, bathroom fixtures, countertops, sinks, shower stalls, Toilet Seats, desks, doorknobs, floors, telephones, lab benches, and other hard nonporous surfaces made of: Acrylic, Finished woodwork, Glass, Metal, Plastic, and Upholstery-vinyl and plastic.

TO OPEN PACKAGE: Remove cover. Pull up wipe from center of roll. Thread through hole in the cover. Replace cover. Open center cap on cover to remove wipes. When not in use, close center cap to prevent moisture loss.

DIR ECTIONS FOR USE:
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

SanitiZi ng:
To sanitize hard, non-porous, non-food contact surfaces; wipe surface, using enough wipes to allow treated surface to remain wet for 15 seconds for Staphylococcus aureus ([Staph] ATCC 6538), Klebsiella pneumoniae (ATCC 4352), and Campylobacter jejuni (ATCC 29428).

Let surface dry. For highly soiled surfaces, clean excess dirt first.

To clean and Deodoriz e:
Wipe surface with wipe. Let air dry. Discard used wipes in trash. Do not flush in toilet.

To clean and Decontam i nation aga inst HIV-1 or HBV or HCV on surfaces / objects soiled with blood / body fluids:
Wipe surface with wipe until surface is visibly wet. Allow surface to remain wet for 10 minutes. Let air dry. If surfaces are extremely dirty, clean first with another wipe before disinfecting. Discard used wipe in trash. Do not flush. Rinse food contact surfaces with clean, potable water after disinfecting. Do not use to disinfect dishes, glassware or utensils.

For fungicidal activity, MONK Disinfectant Wipes are an effective fungicide against Trichophyton mentagrophytes ([the athlete’s foot fungus]) in areas such as locker rooms, dressing rooms, shower and bath areas and exercise facilities. MONK Disinfectant Wipes is a one-step fungicide.

For mold and mildew, MONK Disinfectant Wipes will effectively inhibit the growth of mold and mildew and the odors caused by them when applied to hard, nonporous surfaces. Follow disinfection instructions. Repeat treatment every seven days, or more often if new growth appears.

**KILLS HIV AND HBV AND HCV ON PRE-CLEANED ENVIRONMENTAL SURFACES / OBJECTS PREVIOUSLY SOILED WITH BLOOD / BODY FLUIDS in health care settings or other settings in which there is an expected likelihood of soiling of inanimate surfaces / objects with blood or body fluids, and in which the surfaces / objects likely to be soiled with blood or body fluids can be associated with the potential for transmission of Human Immunodeficiency Virus Type 1 (HIV-1) (associated with AIDS) or Hepatitis B Virus (HBV) or Hepatitis C Virus (HCV).

**SPECIAL INSTRUCTIONS FOR CLEANING AND DECONTAMINATION AGAINST HIV-1 OR HBV OR HCV ON SURFACES / OBJECTS SOILED WITH BLOOD / BODY FLUIDS:
Personal protection: Clean-up must always be done wearing protective gloves, gowns, masks and eye protection.

Cleaning procedure: Blood and other body fluids containing HIV or HBV or HCV must be thoroughly cleaned from surfaces and objects before application of MONK Disinfectant Wipes. MONK Disinfectant Wipes can be used for this purpose.

Contact time: Leave surface wet for 1 minute (60 seconds) for HIV-1 and 10 minutes for HBV and HCV. Use a 10-minute contact time for disinfection against all other viruses, bacteria and fungi claimed.

Disposal of infectious material: Blood, body fluids, cleaning materials and clothing must be autoclaved and disposed of according to local regulations for infectious waste disposal.

This product is for use on hard nonporous surfaces not conducive to treatment by immersion or excess liquid against Avian Influenza A.

FIRST AID:
If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after first 5 minutes, then continue rinsing eye.

Call a poison control center or doctor for treatment advice. Have the product container or label with you when calling poison control center or doctor or going for treatment.

MONK Disinfectant Wipes are effective against:

**Bacteria**
Staphylococcus aureus - Community Associated Methicillin-Resistant [CA-MRSA] [NRS384] [USA300]
Staphylococcus aureus - Community Associated Methicillin-Resistant [CA-MRSA] [NRS123] [USA400]
Staphylococcus aureus (Staph)
Salmonella enterica (Salmonella)
Enterococcus faecalis - Vancomycin Resistant [VRE]
Escherichia coli [E. coli]
E. coli ESBL - [Extended spectrum beta-lactamase producing E. coli]
Klebsiella pneumoniae [Klebsiella]
Legionella pneumophila
Burkholderia cepacia
Salmonella schottmuelleri (Salmonella)
Salmonella typhi (Salmonella)
Serratia marcescens [Serratia]
Shigella dysenteriae (Shigella)
Staphylococcus aureus-Vancomycin Intermediate Resistant - [VISA]
Streptococcus pyogenes [Strep] (a cause of scarlet fever)
Vibrio cholerae

**Viruses**
* Rotavirus (Diarrhea-causing virus)
* Hepatitis B Virus (HBV)
* Hepatitis C Virus (HCV)
* Herpes Simplex Virus Type 1
* Herpes Simplex Virus Type 2
* HIV-1 [AIDS Virus]
* Human Coronavirus
* Influenza Type A Virus / Brazil [I influenza]

**Respiratory Syncytial Virus [RSV]**
**SARS Associated Coronavirus [SARS] (cause of Severe Acute Respiratory Syndrome)**
**Vaccinia Virus [Pox Virus]**

**Animal Viruses:**
Avian Influenza A [H5N1]
Avian Influenza A [H3N2]
Avian Infectious Bronchitis Virus
Canine Distemper Virus
Newcastle’s Disease Virus
Pseudorabies Virus

**Fungi**
Aspergillus niger
Trichophyton mentagrophytes ([the athlete’s foot fungus]) (A cause of Ringworm of the foot)

Storage and Disposal:
Store in original container in areas inaccessible to children. Keep securely closed. Refillable container. Refill empty container only with MONK Disinfectant Wipes. Do not reuse this container except as described. If not refilling, discard empty container in trash or recycle.
