Salt Crystals

Salt Crystals (sodium chloride) is a state restricted use pesticide and is to be distributed only by licensed pesticide dealers. Only certified applicators or persons under the direct supervision of a certified applicator may use or apply Salt Crystals (sodium chloride).

KEEP OUT OF REACH OF CHILDREN
CAUTION

For use only in the City of Lacey’s Stormwater Retention Pond #1 by applicants approved under the Aquatic Invasive Species Management / National Pollutant Discharge Elimination System Waste Discharge General Permit (NPDES Permit No. WAG-993002) issued by the Washington State Department of Ecology. For management of Prohibited Level 3 Non-Native Species in City of Lacey’s SRP (#1) located in Thurston County. Treatment of SRP #1 allowed only between September 26, 2016 and October 28, 2016. This label for Salt Crystals expires and must not be distributed or used in accordance with this 25b registration after November 30, 2016.

African clawed frogs (all members genus *Silurana* and *Xenopus*) are classified as “Prohibited level 3” species under RCW 77.135.030 (1)(c) and WAC 220-12-090(1)(a)(iii) for non-native aquatic animal species considered to pose a “moderate to high invasive risk” and which may require management by the department or other affected landowner. Prohibited level 3 species, under RCW 77.135.040(1), “may not be possessed, introduced on or into a water body or property, or trafficked, without department authorization, a permit, or as otherwise provided by rule.”

**Active Ingredients:** Sodium chloride .......................... 100%
Total .................................................. 100%

**PRECAUTIONARY STATEMENTS**

**Skin Contact:** Mild skin irritant.
**Eye Contact:** Moderate irritant.
**Inhalation:** Inhalation of dust may cause mild irritation to mucous membranes, nose and throat. **Ingestion:** Very large doses can cause nausea, vomiting, diarrhea, cramps, dehydration, water retention, high blood pressure and prostration. Symptoms may include coughing, dryness and sore throat. Avoid contact with skin and eyes and do not inhale or ingest. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet. Remove and wash contaminated clothing before reuse.

**PERSONAL PROTECTIVE EQUIPMENT:** Wear safety glasses or goggles and rubber or nitrile gloves when mixing or handling the product.

**FIRST AID**

**IF ON SKIN:** Wash exposed area with soap and water. Get medical advice if irritation develops.
**IF IN EYES:** Immediately flush eyes with plenty of water for at least 15 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call physician if irritation persists.
**IF INHALED:** Remove to fresh air. Get medical attention for any breathing difficulty.
**IF INGESTED:** Give one or two glasses of water if patient is alert and able to swallow. Get medical attention if symptoms occur. If large amounts were swallowed, get medical advice.

**Environmental Hazards** Reference Non-Project Environmental Impact Statement (EIS) Aquatic Invasive Species Control, Publication no. 10-10-010 (page 64-68).
DIRECTIONS FOR AQUATIC USE

Notifications
An internet notification and information must be posted on the Washington State Department of Fish and Wildlife’s (WDFW) website about the locations, timing, and organisms to be treated as well as the chemicals/products proposed for use. A notice must be provided by mail, newsletter, or handbills delivered directly to all landowners (e.g. City of Lacey) within one quarter mile in each direction along the shoreline. A copy of said notice must be provided to Ecology headquarters including the date of distribution.

Posting
The Washington Department of Fish and Wildlife must post signs in treated and potentially affected areas up to 72 hours before application. The signs will describe any water use restrictions or advisories. Applicator must adhere to the Treatment Windows, which is available at http://www.ecy.wa.gov/programs/wq/pesticides/final pesticide permits/aquatic plants/permitdocs/wdfwtiming.pdf.

General Information: Apply Salt Crystals for management of Invasive Pests, including African clawed frogs.

Application Directions
Direct application: Use 2 oz. of this product per gallon of water in the SRP to achieve a salinity of 16 parts per thousand. Maximum volume of water to be treated in the SRP is 170,000 gallons. To have a more uniform application, use the pre-mixing method.

Pre-mixing method of application: Pre-mix 28.97 oz of this product/gallon in a tanker to generate a brine solution at 23.3% salt. About 12,000 gallons of brine solution will be needed to achieve a salinity of 16 parts per thousand. Uniformly apply the pre-mix to the existing water in the SRP (est. 170,000 gallons).

Use Restrictions: Do not apply this product within 1,000 ft of the treatment site. Treated water must be contained until natural rainfall and stormwater runoff fills the SRP which will dilutes the salinity to less than 2 part per thousand. Treated water must first be discharge to the adjacent retention ponds. Properly dispose of Invasive Pests. Do not use dead pests as food or feed.

Storage and Disposal: Do not contaminate water, food or feed by storage or disposal.
Storage: Store in original tightly closed container, well-ventilated place and away from incompatible materials. Avoid humid or wet conditions as product will cake and become hard. Follow all requirements for pesticide distribution, transportation, application, storage and disposal in WAC 16-228-1200 http://apps.leg.wa.gov/WAC/default.aspx?cite=16-228-1200. Disposal: To avoid waste, use all product by application according to label directions. If wastes cannot be avoided, offer remaining product to a waste disposal facility or pesticide disposal program.
