PREVASYN™ Insect Repellant / Insecticide

For control of listed insect and mite pests on indoor (greenhouse and artificially illuminated controlled atmosphere environments) and outdoor grown marijuana in compliance with all relevant Washington State laws.

EPA Reg. No. 91865-1
EPA SLN No. WA-170009

This label for General Hydroponics Prevasyn Insect Repellant / Insecticide expires and must not be distributed or used in accordance with this SLN registration after December 31, 2022.

### DIRECTIONS FOR USE

Refer to product label affixed to General Hydroponics Prevasyn Insect Repellant / Insecticide container for General Use Precautions, Mixing, and Application instructions.

Controls the following insects and mite pests on indoor (greenhouse and artificially illuminated controlled atmosphere environments) and outdoor grown marijuana:

**MITES** (Two-spotted spider mites)

**THRIPS** (such as Thrips spp., Frankliniella spp., and Heliothrips spp.)

### MIXING AND APPLICATION

**MIXING:**
Shake well before using. Add required amount of General Hydroponics Prevasyn Insect Repellant / Insecticide to a clean spray tank with at least one-half of the water to be sprayed. Agitate the mixture thoroughly, add other products and then fill the tank with the remaining water and continue agitation.

Always use this product promptly after mixing with water and do not let tank mix sit for more than 6 hours.

Use water for dilution with a pH less than 8.

General Hydroponics Prevasyn Insect Repellant / Insecticide has been found to be compatible with most commonly used pesticides. To avoid problems, conduct a compatibility test before using this product in a tank mix with other pesticides. To test for compatibility, mix a small amount of each product, in the appropriate proportions, in a small jar. All tank mix products must be allowed for use on marijuana in Washington.

### FIELD AND GREENHOUSE USE

**Stand Alone:**
Dilute 1-2 teaspoons (5-10 ml) of General Hydroponics Prevasyn Insect Repellant / Insecticide per gallon (3.8 liters) of water and apply by spraying every 4 – 7 days when used as a preventative management tool or in an integrated pest management system.
When tank mixing, read and carefully follow all applicable use directions, precautions and limitations on the respective product labels. In interpreting all labels for the tank mix, the most restrictive situations must apply.

When pest pressure is heavier, use higher rates and consider tank mixes with other insecticides or miticides.

Tank Mix:
When tank mixed with other insecticides or miticides, General Hydroponics Prevasyn Insect Repellant / Insecticide will provide improved levels of control increasing pest exposure to those products due to its irritant effect.

Mix General Hydroponics Prevasyn Insect Repellant / Insecticide at a rate of ½ teaspoon (2.5 ml) per gallon (3.8 liters) of water with other chemical or biological insecticides or miticides.

When pest pressure is heavier, use higher rates.

Restrictions/Precautions:
- Restricted Entry Interval (REI): Do not enter or allow worker entry into treated areas during the restricted entry interval (REI) of 4 hours.
- Pre-Harvest Interval (PHI): General Hydroponics Prevasyn Insect Repellant / Insecticide can be applied up to and including the day of harvest.
- Maximum use rate: Do not apply more than 1½ fl. oz. (43.5 ml) per 1,000 sq. ft. per application.
- Chemigation: For use under this SLN label do not apply this product through any type of irrigation system.
- This product should only be applied using equipment that was specifically designed and manufactured for applying pesticides.

WSDA Container Disposal Guidance
Pesticide containers must be properly cleaned prior to disposal. The best time to clean empty pesticide containers is during mixing and loading, because residue can be difficult to remove after it dries. Triple rinse (or pressure rinse) the pesticide container, empty all pesticide rinse water into the spray tank, and apply to a labeled crop or site. Recycling cleaned containers is the best method of container disposal. Information regarding the recycling of empty and cleaned plastic pesticide containers in Washington is available on the WSDA Waste Pesticide Program web site at agr.wa.gov/PestFert/Pesticides/WastePesticide.aspx. Cleaned containers may also be disposed of in a sanitary landfill, if permitted by the county. Burning is not a legal method of container disposal in Washington.

NOTICE ON CONDITIONS OF SALE
The directions for use of this product are believed to be adequate and must be followed carefully. However, it is impossible to eliminate all risks associated with the use of this product. Plant injury, ineffectiveness or other unintended consequences may result because of such factors as weather conditions, presence of other materials, method of use or application, and other factors, all of which are beyond the control of General Hydroponics. To the extent consistent with applicable law, all such risks shall be assumed by the user or buyer.
