CaviWipes™ Bleach

1:10 bleach dilution disinfecting towelettes

- Sporicidal
- Tuberculocidal
- Bactericidal
- Virucidal
- Fungicidal
- Mildewcidal
- One-step* cleaner/disinfectant
- Fragrance free

Net Contents: ___ lbs. ___ oz.
___ Pre-Saturated Towelettes (___ " x ___")

CaviWipes Bleach are effective against the following microorganisms on hard, non-porous surfaces when used as directed:

**Bacteria**
- Ustilago sacchari
- Staphylococcus aureus
- Serratia marcescens
- Proteus vulgaris
- Neisseria gonorrhoeae

**Drug-Resistant Bacteria**
- Enterobacter cloacae
- Pseudomonas aeruginosa
- Burkholderia cepacia
- Escherichia coli

**Mold, Mildew, Fungi**
- Candida albicans
- Aspergillus brasiliensis

**Non-enveloped Viruses**
- Adenovirus
- Poliovirus
- Rotavirus
- Enterovirus

**Enveloped Viruses**
- Herpes simplex virus
- Human Coronavirus
- Influenza A virus
- Influenza B virus
- Duck hepatitis B virus
- Bovine viral diarrhea virus
- HIV-1

**Non-enveloped Paroviruses**
- Canine Parovirus

Active Ingredient:
Sodium Hypochlorite

Other Ingredients:

Total

Does not include the weight of the towelette.

Net Contents:
Pre-Saturated Towelettes

KEEP OUT OF REACH OF CHILDREN
DESCRIPTION
CaviWipes Bleach are recommended for use on hard non-porous surfaces of infant incubators (interior and exterior surfaces), operating room tables and lights, physical therapy (PT) equipment surfaces, patient support equipment, external surfaces of ultrasound machines, external surfaces of ultrasound monitors, external surfaces of ultrasound transducers, exterior surfaces of dialysis machines, external surfaces of glucometers, IV poles, ambulance equipment surfaces, workstations, veterinary care surfaces, computer keyboards, external surfaces of IV pumps, and exterior surfaces of dental equipment lines. For use as a cleaner and disinfectant on cured, set and hardened, hard nonporous dental impression materials.
CaviWipes Bleach is recommended for use on hard non-porous surfaces in medical facilities, ambulatory surgery centers (ASC), endoscopy centers, isolation areas, long-term care facilities, neonatal intensive care units (NICU), skilled nursing facility, home healthcare, schools, dental office, ambulances, physicians' offices, animal care facilities. Always refer to manufacturer's care instructions before using on equipment or devices.

DIRECTIONS FOR USE
It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
To clean and disinfect hard, non-porous surfaces:
Wipe hard, nonporous surface to be disinfected. Use enough wipes for treated surface to remain visibly wet for 3 minutes. Let air dry. Gross filth and heavy soil loads must be removed prior to disinfecting.
To disinfect external surfaces of ultrasound transducers:
Pre-clean ultrasound gel from external transducer to be disinfected, by using a clean washcloth. Then thoroughly wet the probe with a CaviWipes Bleach towelette. Repeated use of the product may be required to ensure that the surface remains visibly wet for 3 minutes.
Special Instructions for Cleaning Prior to Disinfection against Clostridium difficile spores.

**Personal Protection:** Wear appropriate barrier protection such as gloves, gowns, masks and eye covering.

**Cleaning Procedure:** Fecal matter/waste must be thoroughly cleaned from surfaces/objects before disinfection by application with CaviWipes™ Bleach. Cleaning is to include vigorous wiping and/or scrubbing, until all visible soil is removed. Special attention is needed for high-touch surfaces. Surfaces in patient rooms are to be cleaned in an appropriate manner, such as from right to left or left to right, on horizontal surfaces, and top to bottom, on vertical surfaces, to minimize spreading of the spores. Restrooms are to be cleaned last. Do not reuse soiled cloths.

**Infectious Materials Disposal:** Materials used in the cleaning process that may contain feces/wastes are to be disposed of immediately in accordance with local regulations for infectious materials disposal.

This product is not to be used as a terminal sterilant/high level disinfectant on any surface or instrument that (1) is introduced directly into the human body, either into or in contact with the bloodstream, or normally sterile areas of the body, or (2) contacts intact mucous membranes, but which does not ordinarily penetrate the blood barrier or otherwise enter normally sterile areas of the body. This product may be used to preclean or decontaminate critical or semi-critical medical devices prior to sterilization or high level disinfection.

**(y)**CaviWipes Bleach effectively kills Human Immunodeficiency Virus* Type 1 (HIV-1), Hepatitis B Virus* (HBV), and Hepatitis C Virus* (HCV) on pre-cleaned environmental surfaces/objects previously soiled with blood/body fluids in healthcare settings or other settings in which there is an expected likelihood of soiling of inanimate surfaces/objects with blood/body fluids, and in which the surfaces/objects can be associated with the potential for transmission of HIV-1*, HBV*, and HCV*.

**Special Instructions for Cleaning and Decontamination Against HIV-1*, HBV*, and HCV* of Surfaces or Objects Soiled With Blood or Body Fluids:**

**Personal Protection:** When handling items soiled with blood or body fluids, wear appropriate barrier protection: disposable protective gloves, gowns, face masks and eye coverings.

**Cleaning Procedure:** Blood and other body fluids must be thoroughly cleaned from surfaces and objects before application of this disinfecting towelette. A CaviWipes Bleach towelette can be used for this purpose.

**Contact Time:** Thoroughly wet surface with a new CaviWipes Bleach towelette. Repeated use of the product may be required to ensure that the surface remains visibly wet for 3 minutes.

**Disposal of Infectious Materials:** Dispose of used wipe in accordance with Federal, State or local regulations for infectious materials disposal.

**Physical and Chemical Hazards:** This product contains bleach. Do not use this product with other chemicals such as ammonia, toilet bowl cleaners, rust removers, or acid, as this releases hazardous gases.

For Chemical Emergency ONLY (spill, leak, fire, exposure or accident), call CHEMTREC at 1-800-424-9300.

For all other inquiries about this product, call Metrex Customer Care at 1-800-841-1428, Monday through Friday, between 6 a.m. and 4 p.m. Pacific Time.
Infectious Materials Disposal:

- Soiled cloths.
- Restrooms are to be cleaned last. Do not reuse

Cleaning Procedure:

- Vigorous wiping and/or scrubbing, until all visible soil is removed. Special attention is needed for vertical surfaces, to minimize spreading of the spores.
- Disinfection by application with CaviWipes™ Bleach.
- Thoroughly cleaned from surfaces/objects before

Special Instructions for Cleaning Prior to

- Personal Protection: Wear appropriate barrier protection
