Getting Started

1. Where To Use:
   - Intended for control of house flies outdoors around houses, garbage cans, and non-commercial animal housing including poultry houses, barns, and stables.

How Much To Use:

- Scatter bait evenly in areas where flies are observed to be resting or feeding. Scatter uniformly at the rate of 1 oz. per 125 sq. ft. of area.

Bait Stations: Use in any commercially available bait station approved at least 4 feet above the ground and inaccessible to children, pets, and livestock animals.

Stop

READ THE ENTIRE LABEL FIRST. OBSERVE ALL PRECAUTIONS AND FOLLOW DIRECTIONS CAREFULLY.

PRECAUTIONARY STATEMENTS

Hazard to Humans & Domestic Animals

CAUTION: May be harmful if swallowed or absorbed through skin. Avoid contact with eyes, skin or clothing. Wash hands before eating, drinking, driving, or using tobacco or using the toilet.

Physical & Chemical Hazard

Do not mix or allow to come into contact with existing agents. Hazardous chemical reaction may occur.

3. Use Precautions:
   - Fly Bait contains a baiting agent. It also contains a beneficial organism that makes live and solid waste attractive to flies. Wetted fly baits are recommended when handling fly bait to avoid skin or clothing contamination.
   - Keep in original container and store out of direct sunlight in a cool and dry location away from children, pets and livestock animals. To preserve effectiveness, follow instructions immediately after removing and using the product.
   - Do not allow Fly Bait to contact food, feedstuffs, and water. Protect exposed food, feedstuffs, and water, where necessary, to avoid contamination.
   - Do not allow pets to enter or garbage treated with Fly Bait.
   - Keep Fly Bait station located where inaccessible to children, livestock animals, and pets where bait granules cannot be picked up or where animals and pets cannot reach stations so that the bait has been placed.

3. How To Use

- One or a combination of the following bait application methods may be used:
  - Scatter Bait: Scatter Fly Bait evenly in areas where flies are observed to be resting or feeding. Scatter uniformly at the rate of 1 oz. per 125 sq. ft. of area. Do not put into piles. Do not use the scatter bait application method inside houses or other areas where children, animals, or pets could come in contact with the granules. Replace entire bait if no longer effective in controlling flies.
  - Bait Stations: Use in any commercially available bait station approved at least 4 feet above the ground and inaccessible to children, pets, and livestock animals. No 1 oz. of product to each of 4 bait stations and space the 4 stations as evenly as possible within a 600 sq. ft. treatment area. Add product to replace each consumed before the station is empty. Do not exceed 1 oz. of product per station at any time. Reapply on a daily basis to maintain control when the fly population is large enough to consume 1 oz. of product within a 500 square foot area in 1 day. However, when controlling nuisance consumption of the bait also decreases, so reapply every 2 to 3 days to maintain adequate fly control. Replace bait stations if they are physically damaged.

Storage and Disposal

- Do not contaminate water, food, or feed by storage and disposal.

PESTICIDE STORAGE: Store in original container, tightly closed in a secure place. Keep out of the reach of children and domestic animals.

CONTAINER HANDLING: Nonrefillable container. Do not re-use or refill this container. If empty: Place in trash or other refuse disposal. May be鉴别. Call your local solid waste agency or 1-800-926-9664 for disposal instructions. Never place unused product near any hitter or outdoors
