**Application Directions.** Begin applications of Priaxor prior to onset of disease development and continue on a 14 to 21 day interval. Use higher rate and shorter interval when disease pressure is high.

**DO NOT** apply within 14 days of grazing or harvest for forage and hay.

**DO NOT** use on rangeland.

**Resistance Management.** To limit the potential for development of resistance, **DO NOT** apply more than 20.7 fl ozs of Priaxor per acre per year (0.22 lb ai/year fluxapyroxad).

**DO NOT** make more than two (2) Priaxor applications per cutting or three (3) Priaxor applications per season.
Conditions of Sale and Warranty

The Directions For Use of this product reflect the opinion of experts based on field use and tests. The directions are believed to be reliable and must be followed carefully. However, it is impossible to eliminate all risks inherently associated with the use of this product. Crop injury, ineffectiveness or other unintended consequences may result because of such factors as weather conditions, presence of other materials, or use of the product in a manner inconsistent with its labeling, all of which are beyond the control of BASF CORPORATION (“BASF”) or the Seller. To the extent consistent with applicable law, all such risks shall be assumed by the Buyer.

BASF warrants that this product conforms to the chemical description on the label and is reasonably fit for the purposes referred to in the Directions For Use, subject to the inherent risks, referred to above.
