Drift-X™

Deposition Agent / Drift Reduction Agent

Principal Functioning Agents
Soybean oil, octadecanoic acid, 12-hydroxy-homopolymer, ester with alpha, alpha, alpha’-1,2,3-propanetriyltris[omega-hydroxy(poly(oxy-1,2-ethanediyl)], poly(oxy-1,2-ethanediyl), alpha-(1-oxo-9-octadecenyl)-omega-hydroxy-(Z)-...................................................... 100.0%
Total...............................................................................................................................................................................100.0%

California State Reg. No. 45989-50039-AA
Washington State Reg. No. 45989-17001

Hazard Statements
Causes skin irritation. Causes serious eye irritation. Harmful if swallowed.

Precautionary Statements
Wash thoroughly after handling. Do not eat, drink or smoke when using this product. Wear protective gloves and eye/face protection.
IF SWALLOWED: Rinse mouth. Call a poison center or doctor/physician if you feel unwell.
IF IN EYES: Rinse continuously with water for several minutes. Remove contact lenses if present and easy to do; continue rinsing. If eye irritation persists, get medical advice/attention.
IF ON SKIN: Wash skin with plenty of soap and water. If skin irritation persists, get medical advice/attention. Take off contaminated clothing and wash before reuse.
Refer to back label for more First Aid statements.

Storage and Disposal
Do not contaminate water, food or feed by storage or disposal of this product.
Storage: Do not store below 32°F or above 120°F. Store in a dry place. Store in tightly closed container in well-ventilated area.
Disposal: Do not reuse empty container. Triple rinse (or equivalent) during mixing and loading. Recycling decontaminated containers is the best option of container disposal. The Agricultural Container Recycling Council (ACRC) operates the national recycling program. To contact your state and local ACRC recycler visit www.acrecycle.org. Decontaminated containers may also be disposed of in a sanitary landfill. Dispose of contents/container in accordance with local and national regulations.

Environmental Hazards
Not for aquatic use. Do not contaminate water sources by cleaning of equipment or disposal of wastewaters.

KEEP OUT OF REACH OF CHILDREN
WARNING

Net Contents
2.5 Gallons (9.46 Liters) or 2 x 2.5 Gallons (18.93 Liters)
**First Aid**

**Eye Contact:** Rinse continuously with water for several minutes. Remove contact lenses if present and easy to do; continue rinsing. If eye irritation persists, get medical attention.

**If Swallowed:** Rinse mouth. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by a poison control center or doctor. Do not give anything by mouth to an unconscious person. If you feel unwell, call a poison control center or physician immediately for treatment advice.

**Inhalation:** Move person to fresh air and keep at rest in a position comfortable for breathing. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth if possible. If you feel unwell, call a poison control center or physician for further treatment advice.

**If on Skin or Clothing:** Rinse skin immediately with plenty of soap and water for 15 to 20 minutes. If skin irritation occurs, get medical attention. Take off contaminated clothing and wash before reuse.

**General Information**

Drift-X is a proprietary drift management adjuvant that is easy to use and does not require any special mixing or handling. When used properly, Drift-X reduces spray drift and enhances deposition by improving canopy coverage and penetration, reducing droplet bounce, and minimizing formation of small droplets that may be prone to off-target drift or evaporation. Drift-X improves spray coverage, and reduces drift and evaporation of pesticides, fertilizers and nutrients being applied by ground or air applications.

Note: Spray drift reduction is dependent upon many factors including equipment and weather conditions. For proper management of spray drift, all factors including nozzle type and configuration, boom height, wind speed and direction, humidity and temperature must be taken into consideration.

**Directions For Use**

Prior to use, read all directions on this label and on the label of the product to be applied. Always follow the pesticide label use directions for drift management and deposition adjuvants. Some pesticides or pesticide tank mix combinations may cause phytotoxicity to the foliage and/or fruit of susceptible crops when used with adjuvants. It is recommended that the applicator, user, advisor or crop consultant have experience with the combination before adding Drift-X to spray mixes.

Drift-X may be used with flat fan, hollow cone, and coarse spray nozzles. It is suitable for use with the latest nozzle technology including air inclusion, air induction, and venturi-type air induction nozzles.

**Ground and Aerial Use Rates for Drift Management and Deposition**

<table>
<thead>
<tr>
<th>Spray Volume</th>
<th>Rate of Drift-X*</th>
</tr>
</thead>
<tbody>
<tr>
<td>&lt;10 GPA</td>
<td>2-3 oz./acre</td>
</tr>
<tr>
<td>10-25 GPA</td>
<td>3-4 oz./acre</td>
</tr>
</tbody>
</table>

*Rates work with all nozzle types.

For Spray Volumes Greater Than 25 GPA: Use Drift-X at a rate of 0.25% v/v (1 quart per 100 gallons of spray solution). Do not exceed a use rate of 1% v/v.

**Mixing Instructions**

- Fill sprayer 1/2 full with water. Add dry flowables or dispersible granules. Add emulsifiable concentrates. Continue to agitate and continue filling until tank is 3/4 full. Add Drift-X last while agitating and completing filling of tank.
- Do not mix with other adjuvants in undiluted form. Once diluted in the spray tank, Drift-X is compatible with most other additives, agrochemicals and fertilizers. Use a jar test to determine compatibility of tank mix constituents.
