SKU# 10523
Net Contents: 4.81 Gallons (18.21 Liters)

ACTIVE INGREDIENTS:

Peroxyacetic Acid

PHYSICAL AND CHEMICAL HAZARDS

STONG AGING ORDER: CORROSIVE. Mix only with water below pH 4.0. Product must be diluted in accordance with label directions prior to use. This product is not combustible, however, temperature exceeding 159°F. decomposition occurs releasing oxygen. The released oxygen could ignite combustible materials.

ENVIRONMENTAL HAZARDS

This product is toxic to fish, plants and aquatic invertebrates. Caution must be used when applying indoors because pets may be at risk. Do not discharge effluent containing this product into streams, lakes, ponds, ponds, reservoirs, or other waters unless in accordance with the requirements of the National Pollution Discharge Elimination System (NPDES) and Discharge Prevention System (DPS) or analogous or effective water pollution control programs.

In the event of a spill, use a containment system to prevent this product from entering waste systems without properly notifying the local sewer plant authorities. Entomologists, sanitizing, hygiene, etc., to help prevent cross-contamination from treated areas to treated areas.

DIRECTIONS FOR USE

This product is a violation of Federal law to use this product in a manner inconsistent with its labeling.

SANITATION

The peroxide solution, when used properly, is excellent for sanitizing areas and surfaces that are not food contact. Peroxyacetic Acid Antimicrobial Solution can be used in Foodservice, Meat and Poultry Facilities as a Sanitizer. Prior to sanitation, remove gross food waste and water, then use a 1:100 dilution of this product. For the solution, use a 1:10 dilution of the product to 5-galls of water (0.125% to 0.75% concentration) or, 50-150 ppm active peroxyacetic acid. At the direction for use, this product is effective against Staphylococcus aureus, Escherichia coli, Salmonella enteritidis, and Listeria monocytogenes. Use immersion, spray or circularize or spray as appropriate to the equipment. All surfaces must be sanitized to such a standard so that no residual activity in ppm or more, as gets from the product. A rinsing step is not required but may be needed for other purposes such as cleaning. Final sanitation of the resulting solution must be made daily or more often if the solution becomes diluted or soiled.
