In case of emergency call:

NOTE TO PHYSICIAN:

Have the product container or label with you when calling a poison control center or doctor for treatment advice. Have person sip a glass of water if able to swallow. Do not give anything by mouth to an unresponsive person. DO NOT INDUCE VOMITING unless told to do so by a Poison Control Center or doctor.

IF INHALED:

Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably mouth-to-mouth.

IF ON SKIN OR CLOTHING:

Call a poison control center or doctor for treatment advice. Wash thoroughly with soap and water after handling and before eating, drinking, or smoking. Wash contaminated clothing. Rinse skin with water for 15 minutes, then continue rinsing eye slowly and gently with water for 15 minutes. Hold eye open while rinsing.

FIRST AID:

The use of gastric lavage. Mucosal damage may contraindicate the use of gastric lavage. Use of vomiting pumping may increase risk of aspiration. TREATMENT: Treatment is symptomatic and supportive. Provide 5 to 10 ppm available chlorine. Additional shock treatments may also be required to correct problems such as pH imbalance. For best results, see the WATER BALANCE section on this package. Add 5-7 ounces of this product per 10,000 gallons of water to balace levels in the range of 7.2 to 7.6. Maintain pH in the range of 7.2 to 7.6. Maintain total chlorine residuals at 2 to 3 ppm. Maintain total alkalinity in the range of 60 to 120 parts per million. Maintain calcium hardness above 200 parts per million. Use a test kit or test strip, or other testing method.

ROUTINE CHLORINATION:

For preventative algae control, use your preferred algaecide product regularly. Follow label directions on the algaecide. For preventative algae control, use your preferred algaecide product regularly. Follow label directions on the algaecide. Add 5-7 ounces of this product per 10,000 gallons of water to balace levels in the range of 7.2 to 7.6. Maintain pH in the range of 7.2 to 7.6. Maintain total chlorine residuals at 2 to 3 ppm. Maintain total alkalinity in the range of 60 to 120 parts per million. Maintain calcium hardness above 200 parts per million. Use a test kit or test strip, or other testing method.

WATER BALANCE:

If any granules settle to the bottom of the pool, use brush to disperse. Water treatment products can cause unpleasant odors and eye irritation. Check the available chlorine with a pool test kit. Repeat treatment as needed. For best results, see the WATER BALANCE section on this package. If any granules settle to the bottom of the pool, use brush to disperse. IN CASE OF EMERGENCY CALL: IN CASE OF EMERGENCY CALL: IN CASE OF EMERGENCY CALL: IN CASE OF EMERGENCY CALL: IN CASE OF EMERGENCY CALL:

**FIRST AID: **

- **IF INHALED:** Move person to fresh air. Do not induce vomiting unless told to do so by medical personnel.
- **IF SWALLOWED:** 15-20 minutes. Call a poison control center or doctor, or go for treatment if needed.
- **IF ON SKIN OR CLOTHING:** Slowly and gently with water for 15-20 minutes. Remove contact with skin or clothing for 15-20 minutes. When washing hands, use soap and water. Do not use any water treatment products. If product is exposed to small amounts of water, it can react violently to produce heat and toxic gases and spatter. Do not add water to this product. Add only into water. Place handles of clothing to the inside of garment for 15-20 minutes. If necessary, repeat the treatment. To prevent possible staining or bleaching, take the following steps immediately after use: Do not wash or wear the item with any other items; Do not let it soak; Do not allow it to get wet or dry; Do not let it be exposed to direct sunlight; Do not let it be wet for an extended period of time.

**NOTICE:** The use of gastric lavage is not recommended unless specifically directed by a poison control center or medical personnel.

**WARNING:** Keep out of reach of children. This product is corrosive and reactive. May be fatal if swallowed. Strong oxidizing agent. This product can increase fire intensity. Keep away from heat or open flame. Do not allow to become wet or damp before use. Can react with other materials, including other water treatment products, to cause intense fire, explosion, and the release of toxic gases. Do not use this product in a container or dispensing device that has been previously used to store any other product. Do not use water treatment equipment or any other water treatment products for mixing this product. Follow label directions for each product. Use a clean, dry scoop to measure this product. Do not use the scoop for any other product. Use a test kit or test strip to measure the available chlorine. Use Pool Care Products to make adjustments. Use a chemical test kit to maintain the free available chlorine residual at 1-4 ppm. Follow "SHOCK TREATMENT/SUPERCHLORINATION" directions on this label. Add this product as close as possible to any algae on the sides or bottom of the pool. If necessary, repeat the treatment. To prevent possible staining or bleaching, take the following steps immediately after use: Do not wash or wear the item with any other items; Do not let it soak; Do not allow it to get wet or dry; Do not let it be exposed to direct sunlight; Do not let it be wet for an extended period of time.

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS:**

- Oxidizer: May cause severe burns and permanent blindness. Avoid contact with eyes, skin, and clothing. Do not breathe dust and fumes. Avoid breathing dust and fumes. Avoid contact with skin and clothing. Wear long sleeves and long pants. Do not get in eyes, on skin or on clothing. Do not handle with bare hands. Do not use in a breathing apparatus that measures all these ranges. Use Pool Care Products to make adjustments. In case of contamination or decomposition – Do not re-use this container. Rinse empty container with water, including any residue, and place in an appropriate approved landfill area. Dispose of the container and any remaining contaminated material in an approved landfill area.

**ENVIRONMENTAL HAZARDS:**

- Strong oxidizing agent: This product can increase fire intensity. Keep away from heat or open flame. Do not allow to become wet or damp before use.
