HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION:
Handle with care. Causes redness or irritation. Avoid contact with eyes, mouth, and clothing. Wash thoroughly with soap and water after handling and before eating, drinking, and chewing gum, using tobacco or going to the toilet. Remove contaminated clothing and wash before reuse.

ENVIRONMENTAL HAZARDS:
This product is toxic to fish. Fish hatchery plants should not be discharged to lakes, ponds, or public water.

STORAGE AND DISPOSAL:
Do not contaminate water, food, or by direct disposal. Storage: Store in original container. Store in a cool dry place away from the reach of children. Keep container closed when not in use. Disposal: Return to supplier container. If empty, close container and refill. Container is not recyclable. If container is not recyclable, store for disposal. If bottle-filled: Call your local solid waste agency or 1-800-CLEANUP for disposal instructions. Never place unused product down any indoor or outdoor drain.

FIRST AID:

1. SWALLOWED:
   Call a Poison Control Center or doctor immediately for treatment. Have person sip a glass of water if able to swallow. Do not give anything by mouth to an unconscious person. Do not induce vomiting unless told to do so by the Poison Control Center or doctor.

2. FOR SKIN OR CLOTHING:
   Take off contaminated clothing. Wash clothes immediately with plenty of water for 15-30 minutes. Call a Poison Control Center or doctor immediately for treatment advice.

3. FOR INHALATION:
   Hold open and move person with open mouth for 15-30 minutes. Remove contact lenses. If present, after the first five minutes, remove contact lenses. Call a Poison Control Center or doctor for treatment advice.

4. FOR SKIN:
   Wash the person to flush the alkali if present. If person is not breathing, call 911 or ambulance, then give artificial respiration, preferably by mouth to mouth if possible. Call a Poison Control Center or doctor for treatment advice.

5. FOR EYES:
   Remove the person to flush the alkali if present. If person is not breathing, call 911 or ambulance, then give artificial respiration, preferably by mouth to mouth if possible. Call a Poison Control Center or doctor for treatment advice.

EMERGENCY CONTACT INFORMATION:
Have the product container or label with you when calling a Poison Control Center or doctor. It may also contain: 1-800-424-9308 (CHEMTREC), 1-800-222-1222 (TOXIC HOTLINE), or 1-800-222-1222 (THE SPCA). (International, call locally accepted for emergency medical treatment information.)

Do not contaminate water, food, or by direct disposal. Storage: Store in original container. Store in a cool dry place away from the reach of children. Keep container closed when not in use. Disposal: Return to supplier container. If empty, close container and refill. Container is not recyclable. If container is not recyclable, store for disposal. If bottle-filled: Call your local solid waste agency or 1-800-CLEANUP for disposal instructions. Never place unused product down any indoor or outdoor drain.

ACTIVE INGREDIENTS:
Sodium Algaecide (unchlorinated)……………….11.6%
INERT (or OTHER) INGREDIENTS…………………88.4%

90-DAY ALGAE PREVENTION & CONTROL*

KEEP OUT OF REACH OF CHILDREN

CAUTION:
Additional Caution: Call 911 or your local police if you suspect an attack on your property or if you suspect a chemical spill.

DIRECTIONS FOR USE:
It is a violation of federal law to use this product in a manner inconsistent with its labeling.

DOSEAGE RATES:

EVEN THIRTY MONTHS:
16 fl. oz. of Algae Break 90 per 10,000 gallons of pool water (or 500 mL per 40,000 L) will prevent algal growth in all pool types. SEVERE ALGAE TREATMENT:
32 fl. oz. of Algae Break 90 per 10,000 gallons of pool water (or 1 L per 40,000 L).

GENERAL DIRECTIONS:
1. Maintain pool water in the pH range 7.2 to 7.8. Total alkalinity 80 ppm to 120 ppm. Adjust pH to 7.2 for severe algae.
2. Ensure that filtration system is working properly.
4. Calculate the volume of Algae Break 90 required for the pool.
5. Add the product directly to pool deep end preferably in front of a water return. Dilute in a bucket of pool water when adding to pools with plaster finishes.

Algae Break 90 must be used along with adequate levels of an EPA registered sanitizer (e.g. chlorine) to control bacteria.
