Purpose:
NUKE EM® can reduce populations of certain plant pests including Spider Mite, Whitefly, Aphid and Powdery Mildew. NUKE EM® kills larvae, juveniles and adult parasites. Do not spray on top of or mix with other insecticides. Mix and apply the same day.

Commercial Growers:
Match batch dates with quality control lab tests located on the Flying Skull website. Use clean spray equipment.

Directions:
1. Thoroughly shake the bottle.
2. Indoor: Water the growing media with a significant amount of runoff.
3. Outdoor: Water media in pots and water field if possible.

Outdoor:
Mixing Rates:
Normal Strength (start here then observe): Add 1 fl. oz. to 1 quart of water or 4 fl. oz. to 1 gallon of water.
Strong Strength (if needed then observe): Add 2 fl. oz. to 1 quart of water or 8 fl. oz. to 1 gallon of water.

Application Directions:
Spray leaves and stems.
For preventative applications, use Normal Strength every 5-7 days to help prevent infestations from incoming insects and Powdery Mildew.
For minor infestations, three (3) application days will be needed. Each application should be two to three (2-3) days apart.
For major infestations of Spider Mites, three (3) application days will be needed. Spray 2-3 times using Strong Strength on each application day, allowing plant to fully dry between sprays. Each application should be two to three (2-3) days apart.
NUKE EM® may be used prior to and the day of harvest. See website FAQ.

Spray prior to beneficial insect release.

Net Contents 1 Gallon (3.785 L)

The product is exempt from registration with the U.S. Environmental Protection Agency under FIFRA section 25(b) as a minimum risk pesticide.

Not for Sale in Mississippi, Indiana or New Mexico

Warranties, expressed or implied, is for the replacement of defective NUKE EM®.
