STRYCHNINE MILO – HAND-BAITING

ACTIVE INGREDIENT
Strychnine alkaloid ................................................................. 0.5%
OTHER INGREDIENTS .............................................................. 99.5%
TOTAL .................................................................................. 100.0%

KEEP OUT OF REACH OF CHILDREN
DANGER – PELIGRO
POISON

FIRST AID
Have the product container or label with you when calling a poison control center or doctor, or when going for treatment. For a medical emergency involving this product, call the Poison Control Center at 1-800-222-1222.
For non-emergency information concerning this product, call the National Pesticide Information Center at 1-800-858-7378.

If swallowed:
• CALL A PHYSICIAN OR POISON CONTROL CENTER IMMEDIATELY FOR TREATMENT ADVICE.
• If less than ten (10) minutes have passed since the poison was taken, give 1 to 2 glasses of water and induce vomiting by touching back of throat with finger. Repeat until vomit fluid is clear. Have victim lie down in a quiet, darkened room and keep victim warm and quiet.
• If victim is unconscious, do not give anything by mouth and do not induce vomiting.

If inhaled:
• Remove person to fresh air.
• If not breathing, give artificial respiration.
• Call a poison control center or doctor for further treatment advice.

If in eyes:
• Hold eyes open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.
• Call a poison control center or doctor for further treatment advice.

If on skin:
• Wash with plenty of soap and water.
• Call a poison control center or doctor for further treatment advice.

NOTE TO PHYSICIAN
A. Administer 100% OXYGEN by positive pressure to provide as much pulmonary gas exchange as possible, despite seizures.
B. Administer ANTICONVULSANT DRUGS intravenously to control convulsions.

NOTICE: It may be difficult or impossible to stop the seizure activity without stopping respiration. Be prepared to maintain pulmonary ventilation mechanically. Tracheotomy may be necessary if seizures are prolonged.

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

DANGER

DANGER: Convulsive Poison! Fatal if swallowed or inhaled. Harmful if absorbed through skin. Do not get in eyes or on clothing. Avoid contact with skin. Do not breathe dust. Do not apply this product in a way that will contact any person or pet. Wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet. Remove contaminated clothing and wash clothing before reuse.

PERSONAL PROTECTIVE EQUIPMENT (PPE)
Applicators and other handlers must wear:
- long-sleeved shirt and pants,
- cotton gloves, and
- shoes plus socks.

When loading a bait-dispensing probe and when disposing of non-rigid containers (e.g., bags), handlers must wear:
- long-sleeved shirt and long pants,
- waterproof gloves,
- shoes plus socks,
- goggles or face shield, and
- a minimum of a NIOSH approved particulate filtering facepiece respirator with any N, R, or P filter (TC-84A);
  or an elastomeric NIOSH approved particulate respirator with any N, R, or P filter (TC-84A); or a NIOSH approved powered air purifying respirator with an HE filter (TC-21C).

Follow manufacturer’s instructions for cleaning and maintaining PPE. If there are no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

USER SAFETY RECOMMENDATIONS
Remove clothing immediately if pesticide gets inside. Wash thoroughly before putting on clean clothes.

Remove PPE immediately after handling this product. Wash the outside of waterproof gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

ENVIRONMENTAL HAZARDS
This product is toxic to fish, birds and other wildlife. Do not allow bait to be exposed on soil surface. Do not apply directly to water, or to areas where surface water is present, or to intertidal areas below the mean high water mark. Do not contaminate water by the cleaning of equipment or the disposal of wastes. Do not apply directly to food or feed crops.

ENDANGERED SPECIES CONSIDERATIONS
NOTICE: The killing of an endangered species during strychnine baiting operations may result in a fine and/or imprisonment under the Endangered Species Act. Before baiting, the user is advised to contact the regional U.S. Fish and Wildlife Service (Endangered Species Specialist) or the local Fish and Game Office for specific information on endangered species. Strychnine baits should not be used in the geographic ranges of the following species except under programs and procedures approved by the U.S. Environmental Protection Agency: California Condor, San Joaquin Kit Fox, Morro Bay Kangaroo Rat, Gray Wolf, Grizzly Bear and Salt Marsh Harvest Mouse.
DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Sale, distribution and use of this product must be in accordance with the provisions of the final order on Strychnine by the Administrator of the U.S. Environmental Protection Agency.

USE RESTRICTIONS
This product may be only be used in manual, below-ground applications to pocket gophers' burrow systems located in rangelands, pastures, croplands, forests, and non-agricultural areas to control the following pocket gophers: *Cratogeomys spp.*, *Geomys spp.*, and *Thomomys spp.* (but excluding the Mazama pocket gopher (*T. mazama*) within Thurston and Pierce Counties, Washington). Bait must be placed directly into pocket gophers' underground burrow systems. Do not apply this product by use of a mechanical burrow builder. Do not apply this product at residential sites. Strychnine baits should not be used in the geographic ranges of any state or federally protected pocket gopher subspecies or populations.

Do not apply this product above ground level, to the ground surface, or on any food or feed crop. Do not apply this product in a way that will contact workers, other persons, or domestic animals. Keep pets and other people out of the area during application.

BAITING
Make at least 2 baits sets per active burrow system. Additional sets, up to 7 per system, may be needed for systems with large numbers of mounds. Depending upon pocket gopher population levels, 1 pound (0.45 kg) of bait will treat 1 to 8 acres (0.41 to 3.24 ha) when applied by hand. Apply this product using either of the methods described below.

Probe Method: Pocket gophers' fan-shaped dirt mounds have a horseshoe-shaped depression or burrow plug on the flat side of the fan. Locate gophers' main underground runway by using a gopher-probe product, a rod, or a smooth strong stick to probe the ground surrounding the mound. Begin probing on the plug side, about a foot away from the mound. The optimum probing distance may vary from species to species and place to place. When soil resistance against the probe decreases abruptly, the main runway has been entered.

Remove probe and enlarge probe hole slightly if necessary to accommodate baiting. Deposit 1 teaspoonful of bait through probe hole and into main runway. If a bait-dispensing probe is used, deposit 1 teaspoon amount of bait through the probe before removing it. Cover probe hole with dirt and other materials, taking care not to let soil cover bait. Immediately collect and remove any bait that spills on the ground surface.

Lateral Tunnel Method: Remove plug from the flat side of the burrow fan. Using a long-handled spoon, insert 1 teaspoonful of bait into the main runway system. Close the tunnel with soil. Do not permit soil to cover bait. Immediately collect and remove any bait that spills on the ground surface.

STORAGE AND DISPOSAL

DO NOT CONTAMINATE WATER, FOOD, OR FEED BY STORAGE OR DISPOSAL.

LEAKS, FIRE OR SPILLS: For leaks, fire or spills only, call 1-800-535-5053 and have product container or label with you when obtaining advice.

PESTICIDE STORAGE: Store only in original container, in a dry place inaccessible to children, pets and domestic animals.

PESTICIDE DISPOSAL: Pesticide wastes are acutely hazardous. Improper disposal of excess pesticide, spilled bait, or rinsate is a violation of Federal Law. If these wastes cannot be disposed of by use according to label instructions contact your State Pesticide or Environmental Control Agency, or the Hazardous Waste representative at the nearest EPA Regional Office for guidance.

CONTAINER DISPOSAL: Nonrefillable container. Do not reuse or refill this container. Offer for recycling, if available. Empty the container as much as possible through use of the product as directed by its label. If container is not to be recycled, dispose of bag in a sanitary landfill or by incineration, if allowed by State and local authorities.
