CAUCIÓN

Causa moderada inflamación ocular. Evite el contacto con ojos o ropa. Lave con jabón y agua después de manipular y antes de comer, beber, chupar bocadillos o usar la ropa.

HAZARDOS AMBIENTALES

Este producto es tóxico para el equipo invertebrado acuático. Para proteger el entorno, no permita que el pesticida entre o se disipe en las cañadas, drenajes, desagües, regaderas o corrientes. Aplicando este producto en el clima caluroso y húmedo puede ayudar a asegurar que el viento o la lluvia no lo lleve o sea lavado del área tratada. Rinse el equipo aplicador sobre el área tratada ayudará a evitar el drenaje o la contaminación de cuerpos de agua o drenajes.
HOW TO CLEAN SPRAYER
To clean sprayer after use, rinse sprayer and all sprayer parts with water 3 times. Spray rinse water on bare soil or gravel. After cleaning, sprayer may be used for other products.

HOW IT WORKS
Compare-N-Save Quick Acting Weed & Grass Killer is absorbed by the weed's leaves. It moves through the weed to the root, stopping the function of an essential enzyme found in plants (but not humans or animals). Weeds die, roots and all - so weeds don't grow back. Kills only what you spray. Any product not absorbed by the plant will be deactivated after it hits the soil. Weeds usually yellow and wilt within hours with complete kill in 1 to 2 weeks.

HOW TO SPRAY
- Spray the weeds or grasses you want to kill until thoroughly wet.
- When spot-treating weeds around desirable plants, shield plants from drift with a piece of cardboard or plastic.
- If desirable plants are accidentally sprayed, rinse off immediately with water or cut off treated area.

IMPORTANT: Do not spray plants or grasses you like - they will die. Do not use for spot weed control in lawns since Compare-N-Save Quick Acting Weed & Grass Killer kills lawn grasses.

WHEN TO APPLY
Use anytime weeds and grasses are actively growing. For best results, apply during warm, sunny weather (above 60° F) to accelerate systemic movement from foliage to roots.
Apply when air is calm to prevent drift to desirable plants.
RAINPROOF Protection: Rain or watering 30 minutes after application will NOT wash away effectiveness.
Apply when weeds are small and before seeds form. Hard to kill weeds may require a repeat application.

APPLICATION RESTRICTIONS:
- Do not apply this product in a way that will contact any person or pet, either directly or through drift. Only the person applying this product may be in the area during application.
- Do not mix, store or apply in a galvanized or unlined steel (except stainless steel) sprayer.
- Do not apply through any irrigation system.
- DO NOT USE for spot weed treatment after planting any fruits or vegetables.

Do not allow people and pets to enter treated areas until spray has dried.

WHEN TO REPLANT
All ornamental flowers, trees and shrubs may be planted 1 day after application.
Lawn grasses, herbs, vegetables, and fruits may be planted 3 days after application.

ADDITIONAL USES
To Kill Vines
- If vines are growing up poles, fences, or tree trunks with mature bark, cut vines to a height of 3 to 4 feet and spray vines thoroughly.

To Kill Stumps
- Cut living stump close to ground.
- Drill 4 to 5 holes into freshly cut stump.
- Immediately pour undiluted product into holes.

IMPORTANT: Some trees may share the same root system. Adjacent trees having a similar age, height and spacing may signal a shared roots system. Injury may occur to non-treated trees when one or more trees sharing common roots are treated.

To Kill Kudzu
- For best results, apply in mid to late summer when vines are mature and actively growing.

To Kill Wild Blackberry
- Spray anytime plants are actively growing.
- Dead canes should be cut down and removed.
- Reapplication is often required to kill deep roots.

To Kill Poison Ivy & Poison Oak
- Contact with these plants anytime of the year can cause an allergic reaction.
- Spray anytime plants are actively growing, but at least 4 weeks before the first killing frost in the fall. Reapply, if new growth appears.
- Handle dead plants with rubber gloves.
- Dispose of plants and rubber gloves in tightly sealed garbage bags.

For Lawn Replacement
Use Compare-N-Save Quick Acting Weed & Grass Killer to kill an old, unwanted lawn and weeds before planting a new lawn OR prior to laying a patio, sidewalk, or driveway.
- Skip one mowing before spraying.
- Use 6 fl oz (12 Tbs) per gallon of water for each 300 sq. ft. Apply evenly over treatment area.
- If soil is dry, water before application and 2 to 3 days after application.
- If green patches remain after 7 days, reapply.
- Wait 3 days after last application to rake, till or replant with seed or sod.

For Flowerbed and Garden Plot Preparation
Use Compare-N-Save Quick Acting Weed & Grass Killer to kill weeds, grasses and brush before planting flowers, fruits, vegetables, trees or shrubs.
- If soil is dry, water before application and 2 to 3 days after application.
- Use 6 fl oz (12 Tbs) per gallon of water for each 300 sq. ft. Apply evenly over treatment area.
- Wait 1 to 3 days after last application before planting garden. See “WHEN TO REPLANT” section for details.
