Pond-Klear™
Aquatic Herbicide

For the Management of Undesirable Aquatic Vegetation in Slow Moving Waters.
Controls nuisance watermeal and duckweed.

ACTIVE INGREDIENT:
Flumioxazin* ........................................ 44.0%
OTHER INGREDIENTS: ............................... 56.0%
TOTAL ............................................. 100.0%

*2-[7-fluoro-3,4-dihydro-3-oxo-4-(2-propynyl)-2H-1,4-benzoxazin-6-yl]-4,5,6,7-tetrahydro-1H-isoindole-1,3(2H)-dione
Contains 4 pounds flumioxazin per gallon.

KEEP OUT OF REACH OF CHILDREN
CAUTION
Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle. (If you do not understand the label, find someone to explain it to you in detail.)
Read all Precautionary and First Aid Statements inside booklet before use.

Before After

NET CONTENTS: 16 fl. oz.

Flexo Print Specifications:
- .125" Bleeds
- .09375" Copy Safety to Trim
- Minimum Point Size For One Color Type, 6-Point
- Tint Match Type (More than One Color, No Background) 7-Point
- Minimum Point Size For Type Reversed Out of 1-Color, 7-Point
- Minimum Point Size For Type Reversed Out of More than 1-Color, 8-Point
- Positive Printing Lines No Smaller than .5-Point
- Reverse Printing Lines No Smaller than 1-Point
- 3% Minimum Highlight Dot For Graduations / Vignettes / Drop Shadows
- UPC Symbols: 3.5 Thousandths Bar Width Reduction No Smaller than 80%

FIRST AID

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15 – 20 minutes. IF IN EYES: Hold eye open and rinse slowly and gently with water for 15 – 20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

IN CASE OF EMERGENCY CALL: 1-800-654-6911

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Harmful if inhaled or absorbed through the skin. Causes moderate eye irritation. Avoid breathing spray mist. Avoid contact with skin, eyes or clothing.

PERSONAL PROTECTIVE EQUIPMENT (PPE)

Mixers, loaders, applicators, and other handlers must wear long-sleeved shirt and long pants, shoes and socks and waterproof gloves.

Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry.
ENVIRONMENTAL HAZARDS

- This product can be toxic to non-target plants and aquatic invertebrates. Do not apply to water except as specified on the label. Lift off and rainfall may be hazardous to non-target plants and aquatic organisms in neighboring areas, if not used in accordance to label directions. Do not apply where runoff is likely to occur.
- Do not apply where either runoff or drift to water from treated areas. Do not contaminate water when disposing of equipment washwaters or rinsate.
- Treatment of aquatic weeds and algae can result in oxygen loss from decomposition of dead algae and weeds. This oxygen loss can cause fish and invertebrate suffocation. To minimize hazard, do not treat more than 1/2 of the water body to avoid depletion of oxygen due to decaying vegetation. Wait at least 10 to 14 days between treatments. Begin treatment along the shore and proceed outwards in bands to allow fish to move into untreated areas.
- This pesticide is toxic to plants and should be used strictly in accordance with the drift and run-off precautions on this label in order to minimize off-site exposures.
- Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

PHYSICAL OR CHEMICAL HAZARDS

- Do not mix or allow coming in contact with oxidizing or reducing agents. Hazardous chemical reaction may occur.

PRODUCT INFORMATION

PondKlear™ Aquatic Herbicide is a fast acting contact herbicide in Liquid concentrate use in Quiescent or slow moving bodies of water, Canals, Drainage ditches, Lakes, Reservoirs, Marshes, Golf Course, and Ponds. This product can be used to control submerged, emergent, and floating aquatic weeds. It is most effective when applied to young, actively growing weeds in water with a pH of less than 8.5. Waters treated with this product may be used for swimming, fishing, animal consumption or further potable water treatment.

APPLICATION INFORMATION

- Do not exceed 400 ppb of this product (flumioxazin) during any one application.

APPLICATION RESTRICTIONS

- Do not re-treat the same section of water with this product within 28 days after application.
- Do not use in water utilized for crawfish farming.
- Treated water may be used for irrigation purposes on turf and landscape ornamentals as outlined in the Irrigation Restrictions Following Application table.

APPLICATION INFORMATION

- There is no post-application holding restriction against use of treated water for drinking or recreational purposes (e.g. swimming, fishing).
- Treated water may be used for irrigation purposes on turf and landscape ornamentals as outlined in the Irrigation Restrictions Following Application table.

APPLICATION RESTRICTIONS

- Do not apply this product in an area where fish, forage, or crops that might be damaged, or rendered unfit for sale, use or consumption.

APPLICATION INFORMATION

- Do not apply this product in a manner inconsistent with its labeling.

APPLICATION RESTRICTIONS

- Do not apply this product under circumstances where drift may occur (e.g., spraying during conditions of low humidity and/or high temperatures).

APPLICATION INFORMATION

- Do not make ground applications into areas of temperature inversions. Inversions are characterized by stable air and increasing temperatures with increasing distance above the ground. Mist or fog may indicate the presence of an inversion in humid areas. Where permissible by local regulations, the applicator may detect the presence of an inversion by producing smoke and observing a smoke layer near the ground surface.

APPLICATION RESTRICTIONS

- Do not apply this product in a manner inconsistent with its labeling.

APPLICATION INFORMATION

- Do not apply this product to areas of temperature inversions. Inversions are characterized by stable air and increasing temperatures with increasing distance above the ground. Mist or fog may indicate the presence of an inversion in humid areas. Where permissible by local regulations, the applicator may detect the presence of an inversion by producing smoke and observing a smoke layer near the ground surface.

APPLICATION RESTRICTIONS

- Do not apply this product in a manner inconsistent with its labeling.

APPLICATION INFORMATION

- Do not apply this product to areas of temperature inversions. Inversions are characterized by stable air and increasing temperatures with increasing distance above the ground. Mist or fog may indicate the presence of an inversion in humid areas. Where permissible by local regulations, the applicator may detect the presence of an inversion by producing smoke and observing a smoke layer near the ground surface.

APPLICATION RESTRICTIONS

- Do not apply this product to areas of temperature inversions. Inversions are characterized by stable air and increasing temperatures with increasing distance above the ground. Mist or fog may indicate the presence of an inversion in humid areas. Where permissible by local regulations, the applicator may detect the presence of an inversion by producing smoke and observing a smoke layer near the ground surface.
Do not apply to intertidal or estuarine areas. Do not re-treat the same section of water with this product more than 6 times per year.

Treated water may not be used for irrigation purposes on turf and landscape ornamentals as outlined in the Irrigation Restrictions Following Application table.

SPRAY DRIFT MANAGEMENT
Avoid spraying at the application site is the responsibility of the applicator. The interaction of many equipment and weather-related factors determines the potential for spray drift. The applicator is responsible for considering all these factors when making decisions.

Do not exceed 400 ppb of this product (Rumoxazin) during any one application.

APPLICATION INFORMATION
- There is no post-application holding restriction against use of treated water for drinking or recreational purposes (e.g. swimming, fishing).
- Treated water may be used for irrigation purposes on turf and landscape ornamentals as outlined in the Irrigation Restrictions Following Application table.

APPLYING THE PRODUCT
- Always read the entire label before using this product.
- Do not apply in a manner inconsistent with its labeling.
- Do not apply this product more than 6 times per year.
- Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans, or other waters unless in accordance with the requirements of a National Pollutant Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product to sewer systems without previously notifying the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.
- Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the State or Tribal agency responsible for pesticide regulation.
- Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirements specific to your State or Tribe, consult the State or Tribal agency responsible for pesticide regulation.

Do not apply when weather conditions favor drift from treated areas. Do not apply to water except as specified on the label. Drift and runoff may be hazardous to non-target plants and aquatic organisms in neighboring areas. Do not apply in accordance to label directions. Do not apply where runoff is likely to occur. Do not apply where runoff is likely to occur. Do not apply where runoff is likely to occur. Do not apply where runoff is likely to occur. Do not apply where runoff is likely to occur. Do not apply where runoff is likely to occur.

APPLICATION RESTRICTIONS
- Do not apply on turf and landscape ornamentals.
- Do not apply to water except as specified on the label. Drift and runoff may be hazardous to non-target plants and aquatic organisms in neighboring areas. Do not apply in accordance to label directions. Do not apply without written notification in the water body. Do not apply in water except as specified on the label. Drift and runoff may be hazardous to non-target plants and aquatic organisms in neighboring areas.
- Do not apply when weather conditions favor drift from treated areas. Do not apply to water except as specified on the label. Drift and runoff may be hazardous to non-target plants and aquatic organisms in neighboring areas. Do not apply in accordance to label directions. Do not apply without written notification in the water body. Do not apply in water except as specified on the label. Drift and runoff may be hazardous to non-target plants and aquatic organisms in neighboring areas.
To delay herbicide resistance consider:

- Avoiding the consecutive use of this product or other Group 14 herbicides that might have a similar target site of action, on the same weed species.
- Using tank mixes or premixes with herbicides from different target site of action Groups as long as the involved products are all registered for the same use, have different sites of action and are both effective at the tank mix or prepack rate on the weed(s) of concern.
- Basing herbicide use on a comprehensive integrated pest management (IPM) program.
- Monitoring treated weed populations for loss of efficacy.
- Contacting your local extension specialist, certified crop advisors and/or manufacturer for herbicide resistance management and/or integrated weed management recommendations for specific crops and resistant weed biotypes.

HELPFUL HINTS

- When making solution, use dilution water having a pH greater than 8.5. The pH of water surrounding mats of submerged vegetation can exceed 8.5 by early to mid-day, due to photosynthetic processes. Application of this product under these conditions may provide only partial weed control, and regrowth is likely.
- Clean spray equipment by flushing with clean water immediately after treatment.

TANK MIXES

This product may be tank mixed with 2,4-D, diquat, glyphosate, or copper algaecides for enhanced control. Mix and apply immediately. It is the pesticide user’s responsibility to ensure that all products are registered for the intended use. Read and follow the applicable restrictions for use on all product labels involved in tank mixing. Users must follow the most restrictive directions for use and precautionary statements of each product in the tank mixture. Contact Applied Biochemists for more information, 1-800-558-5106.

ADJUVANTS AND THIS PRODUCT

JAR TEST TO DETERMINE COMPATIBILITY OF ADJUVANTS AND THIS PRODUCT

Perform a jar test before mixing commercial quantities of this product, when using this product for the first time, when using new adjuvants or when a new water source is being used.

1. Add 1 pint of the water to a quart jar. Use water from the same source and temperature as which will be used in the spray tank mixing operation.
2. Add 1 milliliter of this product to the quart jar for every 1 ft. oz. of this product per acre being applied (4 ml if 12 fl. oz. per acre is the desired rate of this product), gently mix until product goes into suspension.
3. Add 1 milliliter of non-ionic surfactant, gently mix. Place cap on jar, invert 10 times, let stand for 15 minutes, evaluate.

An ideal tank mix combination will be uniform. If any of the following conditions are observed question the choice of adjuvant:

a) Layer of oil or globules on the mixture's surface.

b) Flocculation: fine particles in suspension or as a layer on the bottom of the jar.

c) Clarification: Thickening texture (coagulated) like gelatin.

Sprayer Cleanup

If spray equipment is dedicated to application of aquatic herbicides, the following steps are to clean the spray equipment:

1. Completely drain the spray tank and rinse the application equipment thoroughly, including the inside and outside of the tank and all in-line screens.
2. Fill the tank with clean water and flush all hoses, booms, screens and nozzles.
3. Top off tank with clean water.
4. Circulate through sprayer for 5 minutes.
5. Then flush all hoses, booms, screens and nozzles for a minimum of 15 minutes.
6. Drain tank completely.
7. Remove all nozzles and screens and rinse them with clean water.

FLOATING AND EMERGED WEEDS USING SURFACE APPLICATION

1. Determine the dimensions of the intended treatment area using the appropriate formula below: Square pond: average length (ft.) x average width (ft.) / 10,800 = ½ acre Oval pond: (average length (ft.) x average width (ft.) x 0.6) / 10,800 = ½ acre

2. Dilute 1.5 fl. oz. of PondKlear™ Aquatic Herbicide in 4 gallons of water per ¼ acre.

3. Apply as a broadcast spray with a backpack or handgun sprayer directly to the foliage of actively growing weeds. This product will control the following species: Alligator Weed (Alternanthera philoxeroides), Duckweed (Lemna spp.), Frogs-bit (Limonium spongia), Mosquito Fern (Azolla spp.), Salvinia (Salvinia spp.), Water Lettuce (Pistia stratiotes), Watermeal (Molla spp.), and algae (Phycophora) and (Cladophora).
Avoiding the consecutive use of this product or other Group 14 herbicides. When making solution, use dilution water having a pH greater than 8.5. The pH of water surrounding mats of submerged vegetation can exceed 8.5 by early to mid-day, due to photosynthetic processes. Application of this product under these conditions may provide only partial weed control, and regrowth is likely. Clean spray equipment by flushing with clean water immediately after treatment.

**HELPFUL HINTS**

- When making solution, use dilution water having a pH greater than 8.5.
- Apply in early morning to actively growing weeds and early in the season.
- This product is a Group 14 herbicide.
- Any weed population may contain or develop plants naturally resistant to this product and other Group 14 herbicides.
- Weed species with acquired resistance to Group 14 herbicides may eventually dominate the weed population if Group 14 herbicides are used repeatedly in the same field or in successive years as the primary method of control for targeted species. This may result in partial or total loss of control of those species by this product or other Group 14 herbicides.
- To delay herbicide resistance consider:
  - Basing herbicide use on a comprehensive Integrated Pest Management (IPM) program.
  - Monitoring treated weed populations for loss of field efficacy.
  - Contacting your local extension specialist, integrated weed management recommendations for specific crops and resistant weed biotypes.

**TANK MIXES**

This product may be tank mixed with 2-4-D, dipropa, or copper algaeicides for enhanced control. Mix and apply immediately. It is the pesticide user’s responsibility to ensure that all products are registered for the intended use. Read and follow the applicable restrictions of use on all product labels involved in tank mixing. Users must follow the most restrictive directions for use and precautionary statements of each product in the tank mixture. Contact Applied Biochemists for more information, 1-800-558-5106.

**ADDITIVES**

When applying this product to the foliage of floating or emerged aquatic weeds, mix with an admixture approved for use in aquatic sites. Mix this product with a non-ionic surfactant containing at least 80% active ingredient. Follow admixture manufacturer’s label rates. Verify mixing compatibility by a jar test before using.

**JAR TEST TO DETERMINE COMPATIBILITY OF ADJUVANTS AND THIS PRODUCT**

Perform a jar test before mixing commercial quantities of this product, when using this product for the first time, when using new admixtures or when a new water source is being used.

1. Add 1 pint of the water to a quart jar. Use water from the same source and temperature as which will be used in the spray tank mixing operation.
2. Add 1 milliliter of this product to the quart jar for every 1 fl. oz. of this product per acre being applied (4 ml if 12 fl. oz. per acre is the desired rate of this product), gently mix until product goes into suspension.
3. Add 1 milliliter of non-ionic surfactant, gently mix. Place cap on jar, invert 10 times, let stand for 15 minutes, evaluate.

An ideal tank mix combination will be uniform. If any of the following conditions are observed question the choice of adjuvant:

- a) Layer of oil or globules on the mixture’s surface.
- b) Flocculation: fine particles in suspension or as a layer on the bottom of the jar.
- c) Clabbering: Thickening (coagulated) like gelatin.

**Sprayer Cleanup**

If spray equipment is dedicated to application of aquatic herbicides, the following steps are to clean the spray equipment:

1. Completely drain the spray tank and rinse the application equipment thoroughly, including the inside and outside of the tank and all in-line screens.
2. Fill the tank with clean water and flush all hoses, booms, screens and nozzles.
3. Top off tank with clean water.
4. Circulate through sprayer for 5 minutes.
5. Then flush all hoses, booms, screens and nozzles for a minimum of 15 minutes.
6. Drain tank completely.
7. Remove all nozzles and screens and rinse them with clean water.

**FLOATING AND EMERGED WEEDS USING SURFACE APPLICATION**

- Determine the dimensions of the intended treatment area using the appropriate formula below:
  - Square pond: average width (ft.) x average length (ft.) x 0.800 = ¼ acre
  - Oval pond: average length (ft.) x average width (ft.) x 0.6/0.800 = ¼ acre
- Dilute 1.5 fl. oz. to 3.0 fl. oz. of PondKlear™ Aquatic Herbicide in 4 gallons of water per ¼ acre.
- Apply as a broadcast spray with a backpack or handgun sprayer directly to the foliage of actively growing weeds. This product will control the following species: Aligator Weed (Alternanthera philoxeroides), Duckweed (Lemna spp.), Water Lettuce (Pistia stratiotes), Watermeal (Mollisia spp.), and algae (Pithophora) and (Cladophora).

If spray equipment will be used for purposes other than applying aquatic herbicides, it must be thoroughly cleaned following application of this product. The following steps must be used to clean the spray equipment:

1. Completely drain the spray tank and rinse the application equipment thoroughly, including the inside and outside of the tank and all in-line screens.
2. Fill the tank with clean water and flush all hoses, booms, screens and nozzles.
3. Top off tank with clean water.
4. Circulate through sprayer for 5 minutes.
5. Then flush all hoses, booms, screens and nozzles for a minimum of 15 minutes.
6. Drain tank completely.
7. Remove all nozzles and screens and rinse them with clean water.

**ADJUVANTS AND THIS PRODUCT**

- Use a jar test to determine compatibility of adjuvants and this product.
- Perform a jar test before mixing commercial quantities of this product, when using this product for the first time, when using new admixtures or when a new water source is being used.
- Add 1 milliliter of this product to the quart jar for every 1 fl. oz. of this product per acre being applied (4 ml if 12 fl. oz. per acre is the desired rate of this product), gently mix until product goes into suspension.
- Add 1 milliliter of non-ionic surfactant, gently mix. Place cap on jar, invert 10 times, let stand for 15 minutes, evaluate.

An ideal tank mix combination will be uniform. If any of the following conditions are observed question the choice of adjuvant:

- a) Layer of oil or globules on the mixture’s surface.
- b) Flocculation: fine particles in suspension or as a layer on the bottom of the jar.
- c) Clabbering: Thickening (coagulated) like gelatin.

**Sprayer Cleanup**

If spray equipment is dedicated to application of aquatic herbicides, the following steps are to clean the spray equipment:

1. Completely drain the spray tank and rinse the application equipment thoroughly. This product will control the following species: Aligator Weed (Alternanthera philoxeroides), Duckweed (Lemna spp.), Water Lettuce (Pistia stratiotes), Watermeal (Mollisia spp.), and algae (Pithophora) and (Cladophora).
Example: If using a 5-gallon backpack sprayer, dilute 1.5 to 3.0 fl. oz. of product in 4 gallons of water (use water having a pH of 5 to 7). Apply solution evenly to the weeds in each 1/4 acre of pond surface area. Mix additional product and water as necessary to treat the whole pond. Ensure thorough coverage of target plant foliage.

Proper coverage is essential for effective control. Apply in a manner that will ensure even distribution of the chemical within the treatment area. If a second application is required to provide control, make treatment when weeds are first observed, but no sooner than 28 days after the last treatment.

**Submerged and Floating Weeds Using Subsurface Application**

1. Determine the dimensions of the intended treatment area using the appropriate formula below:
   - Square pond: average length (ft.) x average width (ft.) x average depth (ft.) / 43,560 = acre-feet
   - Oval pond: (average length (ft.) x average width (ft.) x average depth (ft.) x 0.8) / 43,560 = acre-feet
   - Dilute 16 fl. oz. (200 ppb flumioxazin) to 32 fl. oz. (400 ppb flumioxazin) of PondKlear™ Aquatic Herbicide in 4 gallons of water per acre-foot.
   - Apply evenly as subsurface application with a backpack or handgun sprayer. This product will control the following species: Coontail (Ceratophyllum demersum), Duckweed (Lemna spp.), Fanwort (Cabomba caroliniana), Hydrilla (Hydrilla verticillata), Hydroptilis (Hydrophyllus polydactyla), Naiad, Southern (Najas guadalupensis), Pondweed, Curly leaf (Potamogeton crispus), Pondweed, Sago (Potamogeton pectinatus), Pondweed, Variable-leaf (Potamogeton diversifolius), Salvinia (Salvinia spp.), Water Lettuce (Pistia stratiotes), Watermead ( Wolffia spp.), Watermilfoil, Eurasian (Myriophyllum spicatum), and Watermilfoil, Variable-leaf (Myriophyllum heterophyllum).

**Example:** Using a 5-gallon backpack sprayer, dilute 16 to 32 fl. oz. of product in 4 gallons of water (use water having a pH of 5 to 7). Apply solution evenly to the weeds in the water column by inserting the spray nozzle underneath the surface to achieve a target concentration of 200 ppb to 400 ppb. Mix additional product and water as necessary to treat the whole pond.

**STORAGE & DISPOSAL**

Do not contaminate water, food or feed by storage or disposal. Open dumping is prohibited.

**PESTICIDE STORAGE:** Keep container closed when not in use. Keep pesticide in original container. Do not put concentrate or dilute into food or drink containers. Do not reseal or refill container. Do not contaminate feed, feedstuffs, or drinking water. Do not store or transport near feed or food.

**PESTICIDE DISPOSAL:** Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

**CONTAINER DISPOSAL:** Nonrefillable container. Do not reseal container. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Then offer for recycling or reconditioning if available or puncture and dispose of in approved landfill, incineration, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.

**WARRANTY DISCLAIMER**

To the extent permitted by applicable law neither the manufacturer nor the seller makes any warranty, expressed or implied concerning the use of this product in a manner that is not consistent with the use expressly set forth on the label. To the extent permitted by, and consistent with, applicable law, buyer assumes any risk of use of this product that is not consistent with label use instructions. Read and follow the label directions.
Example: If using a 5-gallon backpack sprayer, dilute 1.5 to 3.0 fl. oz. of product in 4 gallons of water (use water having a pH of 5 to 7). Apply solution evenly to the weeds in each 1/4 acre of pond surface area. Mix additional product and water as necessary to treat the whole pond. Ensure thorough coverage of target plant foliage.

Proper coverage is essential for effective control. Apply in a manner that will ensure even distribution of the chemical within the treatment area. If a second application is required to provide control, make treatment when weeds are first observed, but no sooner than 28 days after the last treatment.

SUBMERSED AND FLOATING WEEDS USING SUBSURFACE APPLICATION

1. Determine the dimensions of the intended treatment area using the appropriate formula below:
   - Square pond: average length (ft.) x average width (ft.) x average depth (ft.) / 43,560 = acre-feet
   - Oval pond: (average length (ft.) x average width (ft.) x average depth (ft.) x 0.8) / 43,560 = acre-feet
   - Dilute 16 fl. oz. (200 ppb flumioxazin) to 32 fl. oz. (400 ppb flumioxazin) of PondKlear™ Aquatic Herbicide in 4 gallons of water per acre-foot.
   - Apply evenly as subsurface application with a backpack or handgun sprayer. This product will control the following species:
     - Coontail (Ceratophyllum demersum)
     - Duckweed (Lemna spp.)
     - Fanwort (Cabomba caroliniana)
     - Hydrilla (Hydrilla verticillata)
     - Hydrophila (Hygrophila polysperma)
     - Naiad, Southern (Najas guadalupensis)
     - Pondweed, Curlyleaf (Potamogeton crispus)
     - Pondweed, Sago (Potamogeton pectinatus)
     - Variable-Leaf (Potamogeton divergens)
     - Salvinia (Salvinia spp.)
     - Water Lettuce (Pistia stratiotes)
     - Watermeal (Wolffia spp.)
     - Watermilfoil, Eurasian (Myriophyllum spicatum)
     - Watermilfoil, Variable-Leaf (Myriophyllum heterophylum)

Example: Using a 5-gallon backpack sprayer, dilute 16 to 32 fl. oz. of product in 4 gallons of water (use water having a pH of 5 to 7). Apply solution evenly to the weeds in the water column by inserting the spray nozzle underneath the surface to achieve a target concentration of 200 ppb to 400 ppb. Mix additional product and water as necessary to treat the whole pond.

STORAGE & DISPOSAL

Do not contaminate water, food or feed by storage or disposal. Open dumping is prohibited.

PESTICIDE STORAGE: Keep container closed when not in use. Keep pesticide in original container. Do not put concentrate or dilute into food or drink containers.

PESTICIDE DISPOSAL: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

CONTAINER DISPOSAL: Nonrefillable container. Do not reuse container. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank or store rinseate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Then offer for recycling or reconditioning if available or puncture and dispose of in approved landfills, or incineration, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.

WARRANTY DISCLAIMER

To the extent permitted by applicable law neither the manufacturer nor the seller makes any warranty, expressed or implied concerning the use of this product in a manner that is not consistent with the use expressly set forth on the label. To the extent permitted by, and consistent with, applicable law, buyer assumes any risk of use of this product that is not consistent with label use instructions. Read and follow the label directions.

CONTAINER DISPOSAL: Nonrefillable container. Do not reuse container. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank or store rinseate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Then offer for recycling or reconditioning if available or puncture and dispose of in approved landfills, or incineration, or, if allowed by state and local authorities, by burning. If burned, stay out of smoke.

FIRST AID

IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible.

IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15 – 20 minutes. IF IN EYES: Hold eye open and rinse slowly and gently with water for 15 – 20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

IN CASE OF EMERGENCY CALL: 1-800-654-6911

PRECAUTIONARY STATEMENTS

HAZARDS TO HUMANS AND DOMESTIC ANIMALS

CAUTION: Harmful if inhaled or absorbed through the skin. Causes moderate eye irritation. Avoid breathing spray mist. Avoid contact with skin, eyes or clothing.

PERSONAL PROTECTIVE EQUIPMENT (PPE)

Mixers, loaders, applicators, and other handlers must wear long-sleeved shirt and long pants, shoes and socks and waterproof gloves.

Follow manufacturer’s instructions for cleaning/maintaining PPE. If no such instructions for washables exist, use detergent and hot water. Keep and wash PPE separately from other laundry.
