- Established Warm Season Turfgrasses: Bermudagrass, buffalograss, zoysiagrass

Established Cool Season Turfgrasses: Kentucky bluegrass, rough bluegrass (Poa trivialis), perennial ryegrass, fine fescues, tall fescue, seashore paspalum

Established Warm Season Turfgrasses: Bermudagrass, buffalograss, zoysiagrass

How Much To Use

Use a drop or spray spreader designed to apply granular fertilizers. Avoid skips or excessive overlaps as poor weed control or turf injury may result. Apply 3.6 pounds of product per 1,000 square feet per application established to 10% a.a.

SUGGESTED SPREADER SETTINGS

1. Use 1 to 2 tablespoons of a standard granular fertilizer shake and spray spreader. Use additional spreaders are recommended for specific applications.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage or disposal.

Precautionary Statements

1. Physical Form: Powder
2. Odor: Odorless
3. Color: White

When To Apply

This product may be applied as a single application or as split applications in the spring, early summer, or fall.

Application Schedule

- For annual grasses such as Poa annua, Poa pratensis, Poa nigra, and Poa glauca: Apply in the spring and early summer.
- For bluegrass and fescue: Apply in the spring and early summer.
- For crabgrass: Apply in the spring and early summer.
- For dandelion: Apply in the spring and early summer.
- For foxtail (green, yellow, and glaucous): Apply in the spring and early summer.
- For bentgrass: Apply in the spring and early summer.
- For wild oat: Apply in the spring and early summer.

When applying to areas that are not to be planted for at least 12 inches tall. For dense populations, make a second application 3 to 4 weeks after the first application. For areas of open turf spaces - apply a single application to the areas of open turf spaces. For broadcast weed control: Spring applications: for chicory, hardhead, and wild oat; fall applications: for chicory, hardhead, knotweed, shepherdspurse, spurge, and other broadleaf weeds.

For best results, apply when the grass is hardy and actively growing with adequate soil moisture and soil temperatures (50°F to 70°F).

How To Apply

- This product is intended for use on the leaves of broadleaf weeds and should be applied when the grass is wet from dew or rain. When dry conditions exist, apply the product when the turf is moist. (e.g., rain or watering) turfgrasses 24 hours after application.

- For best results, irrigate after the application. However, do not irrigate (or water) sooner than 24 hours after application.

- Do not apply if the weather will rain for 24 hours after application.

- Do not spread granules onto flowers, vegetables, and ornamental shrubs.
- Turf species listed on this label can be seeded, sodded, sprigged, or plugged into the treated areas. Do not apply this product on turf species.
