SitePro
Fertilizer with Surge®
Broadleaf Herbicide

Not for sale, distribution or use in Nassau or Suffolk Counties in New York State.

ACTIVE INGREDIENTS:
2,4-D, 2-ethylhexyl ester .................................................. 1.153%
Mecoprop-p acid ........................................................... 0.174%
Dicamba acid .............................................................. 0.073%
Sulfentrazone ............................................................ 0.034%

OTHER INGREDIENTS: 98.566%

TOTAL ......................................................... 100.000%

THIS PRODUCT CONTAINS:

15.30 lb 2,4-dichlorophenoxyacetic acid equivalent per ton or 0.765% (CAS 1928-43-4)
3.48 lb 2-(2-methyl-4-chlorophenoxy)propionic acid equivalent per ton or 0.174% (CAS 16484-77-8)
1.46 lb 3,6-dichloro-2-anisic acid equivalent per ton or 0.073% (CAS 1918-00-9)
0.68 lb N-(2,4-dichloro-5-(difluoromethyl)-4,5-dihydro-1,2,4-triazol-1-yl)-phenylpropane sulfonamide per ton or 0.034% (CAS 122850-33-5)

GUARANTEED ANALYSIS
Total Nitrogen (N)...................................................................... 21.00%
18.00% Urea Nitrogen
3.00% Water Insoluble Nitrogen
Available Phosphate (P₂O₅) ...................................................... 3.00%
Soluble Potash (K₂O) ........................................................ 5.00%
Calcium (Ca) ...................................................................... 1.52%
Derived from: Biosolids, Muriate of Potash, Polymer-Coated Sulfur-Coated Urea, Urea.
*0.40% Slow Release Urea Nitrogen from Polymer Coated Sulfur Coated Urea.

PRECAUTIONARY STATEMENTS

Hazards to Humans and Domestic Animals
CAUTION: Causes moderate eye irritation. Harmful if swallowed. Avoid contact with eyes or clothing.

Personal Protective Equipment (PPE)

Some materials that are chemical-resistant to this product are natural rubber. If you want more options, follow the instructions for category A on an EPA chemical-resistance category selection chart.

User Safety Recommendations

Follow manufacturer's instructions for cleaning/maintaining PPE. If no such instructions are available, use detergent and hot water. Use only chemical-resistant gloves.

User Safety Recommendations

Users should wash hands before eating, drinking, chewing gum, using tobacco, or using the toilet.

If swallowed: Call a poison control center or doctor for treatment advice.

If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses. If present, after the first 5 minutes, then continue rinsing eye.

If inhaled: Get fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen.

DIRECTIONS FOR USE

This pesticide is toxic to fish and aquatic invertebrates and may adversely affect non-target plants. Do not apply directly to water, to areas where surface water is present, or to intertidal areas below the mean high water mark. Drift and run-off may be hazardous to aquatic organisms in water adjacent to treated areas. Do not contaminate water when disposing of equipment wash waters or rinsates.

This chemical has properties and characteristics associated with chemicals detected in groundwater. The use of this chemical in areas where soils are permeable, particularly where the water table is shallow, may result in groundwater contamination. Application around a cistern or well may result in contamination of drinking water or groundwater.

User Safety Recommendations

Users should remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

PRECAUTIONS AND RESTRICTIONS:

Do not enter or allow people (or pets) to enter the treated area until dusts have settled. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application.

For use on turf being grown for sale or other commercial use as sod, or for commercial seed production, or for research purposes.

WHERE TO USE:

SitePro Fertilizer with Surge® Broadleaf Herbicide is a Surge® broadleaf herbicide containing 2,4-D, mecoprop-p, dicamba and sulfentrazone. This granular weed and feed provides plant nutrients and controls a broad spectrum of broadleaf weeds in turfgrass. The chemical may be applied according to soil tests or State Extension Service recommendations.

SitePro Fertilizer with Surge® Broadleaf Herbicide is intended to be applied by noncommercial users, lawn care operators, and landscape personnel. Cool season and warm season grasses established in institutional, ornamental, and residential sites may be treated.

Institutional sites are defined as areas associated with the household where the activities associated with the household are suggested.

SitePro Fertilizer with Surge® Broadleaf Herbicide is intended to be applied by noncommercial users, lawn care operators, and landscape personnel. Cool season and warm season grasses established in institutional, ornamental, and residential sites may be treated.
A uniform broadcast distribution of product on the treated area is essential. Do not exceed the specified application rate for any area. Do not apply product to bare ground. Do not use this product on dichondra, carpetgrass, creeping bentgrass, or turf containing desirable clovers.

California: No broadcast applications only between March 1 and September 1. While irrigation is necessary and important for plant growth, apply irrigation water efficiently so that no more than 120% of the net irrigation requirement is applied for any irrigation event. Apply efficient irrigation for six months following application of surfactant containing products.

New York: Only one application per year of this product is allowed. This product is not allowed to be sold or used in Nassau or Suffolk Counties.

HOW MUCH TO APPLY:
For Kentucky bluegrass, fescue spp., perennial ryegrass, common bentgrass, and zoysiagrass:
Apply 1 to 1.5 pounds of SitePro Fertilizer with Surgr® Broadleaf Herbicide per acre of established turfgrass. Or, the equivalent application rates are 3.0 to 4.0 pounds of product per 1,000 square feet of turfgrass.

For Kentucky bluegrass, fescue spp., perennial ryegrass, common bentgrass, and zoysiagrass:
Apply 1.5 to 2.5 pounds of SitePro Fertilizer with Surgr® Broadleaf Herbicide per acre of established turfgrass. Or, the equivalent application rates are 3.6 to 5.0 pounds of product per 1,000 square feet of turfgrass.

For St. Augustinegrass, centipedegrass, hybrid bentgrass, bentgrass, and colonial bentgrass:
Apply 8 to 10 pounds of SitePro Fertilizer with Surgr® Broadleaf Herbicide per acre of established turfgrass. Or, the equivalent application rates are 2.0 to 2.5 pounds of product per 1,000 square feet of turfgrass.

Do not apply this product on dichondra, carpetgrass, creeping bentgrass, or turf containing desirable clovers.

Do not use this product on 'Floratarre' St. Augustinegrass.

Do not use this product on flowers, vegetables, groundcovers, gardens or landscape plantings including shrubs and trees. Do not exceed specified dosage for any area.

Do not use this product on 'Floratarre' St. Augustinegrass.
