This Product May Only be Used Inside and Within 100 Feet of Man-Made Structures and For All Burrow Baiting

ACTIVE INGREDIENT: Diphacinone (CAS #82-66-6): 0.005%
OTHER INGREDIENTS: 99.995%
TOTAL 100.000%

*Not permitted for use against the following species in California: Cotton rat, Eastern harvest mouse, Golden mouse, Polynesia rat, Meadow voles, White-throated woodrat, Southern phallic woodrat, and Mexican woodrat

KEEP OUT OF REACH OF CHILDREN

CAUTION

See back panels for First Aid and additional precautionary statements.

EPA REG. NO. 12455-81-3240
EPA EST. NOs. 12455-WI-1k, 12455-WI-2p, 12455-WI-3w
Superscript is first letter of the lot number.

Net Weight: 4 lbs (1.8kg)
**DIRECTIONS FOR USE**

It is a violation of Federal law to use this product in a manner inconsistent with its labeling.

**READ THIS LABEL:** Read this entire label and follow all use directions and use precautions. Use only for the sites, pests, and application methods described on this label.

**IMPORTANT:**

1. Do not expose children, pets, or nontarget animals to rodenticides. To help prevent accidents:
   1. Store unused product out of reach of children and pets.
   2. Apply bait in locations out of reach of children, pets, domestic animals and nontarget wildlife, or in tamper-resistant bait stations. These stations must be resistant to destruction by dogs and by children under six years of age, and must be used in a manner that prevents such children from reaching into bait compartments and obtaining bait. If bait can be shaken from bait stations when they are filled, units must be secured or otherwise immobilized. Storage bait stations are needed in areas open to hoofed livestock, raccoons, bears, or other potentially destructive animals, or in areas prone to vandalism.
   3. Dispose of product container and unused, spoiled, or un consumed bait as specified on this label.

Bait stations are mandatory for outdoor, above-ground use. Tamper-resistant stations have been seen. Protect bait from rain and snow. Remove as much alternative food as meadow voles will most likely find and consume the bait. Generally, these areas are associated with these sites. Fence and perimeter baiting, beyond 100 feet from a structure as defined above, is prohibited. This product must not be applied directly to water or to areas that come into direct contact with food. When used in USDA inspected facilities, this product must be applied in tamper-resistant bait stations.

Do not place near or inside ventilation duct openings. Do not contaminate water, food or feed by storage or disposal. Do not contaminate water when disposing of equipment wash water or rinsate. This product is extremely toxic to mammals and birds and other wildlife. Dogs, cats, and Mexican woodrat* must wear waterproof gloves.

Do not place against poultry houses or the presence of these sites.

**APPLICATION DIRECTIONS**

**RATS:** Apply 4 to 16 oz. of bait (usually at intervals of 15 to 30 feet) per placement in infested areas. Maintain an uninterrupted supply of fresh bait for at least 10 days or until signs of activity cease.

**MICE AND MEADOW VOLES:** Apply 1/4 to 1/2 oz. (1 to 2 tablespoons) of bait at 8 to 12 foot intervals in infested areas. Larger placements (up to 2 oz.) may be needed on sites of very high activity. Maintain an uninterrupted supply of fresh bait for at least 5 days or until signs of mouse or meadow voles activity cease.

**FOLLOW-UP:** Replace contaminated or spoiled bait immediately. Using waterproof gloves, collect and dispose of all dead, exposed animals and leftover bait. To prevent reinfestation, limit sources of rodent food, water, and harborage as much as possible. If reinfestation does occur, repeat treatment. Where a continuous source of infestation is present, establish permanent bait stations and replenish as needed.

**PRECAUTIONARY STATEMENTS**

**Hazard to Humans and Domestic Animals**

CAUTION: Harmful if swallowed. Keep away from children, domestic animals and pets. All handlers (including applicators) must wear shoes plus socks, and gloves. Any person who retrieves carcasses or unused bait following application of this product must wear waterproof gloves.

**User Safety Requirements**

Follow manufacturer’s instruction for cleaning/ maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry. Remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash hands thoroughly after applying bait and before eating, drinking, chewing gum, using tobacco or using the toilet and change into clean clothing.

**STORAGE AND DISPOSAL**

Do not contaminate water, food or feed by storage or disposal. Pesticide Storage: Store only in original container in a cool, dry place inaccessible to children and pets. Keep containers closed and away from other chemicals.

**Pesticide Disposal:** Dispose of wastes resulting from the use of this product in trash or an approved waste disposal facility. Container Handling: Nonrefillable container. Do not reuse or refill this container. (Plastic): Offer for recycling or reconditioning; or puncture and dispose of in a sanitary landfill; or by incineration. In most states, burning is not allowed.

**WARRANTY:** To the extent consistent with applicable law, seller makes no warranty, expressed or implied, concerning the use of this product other than indicated on the label. Buyer assumes all risk of use and/or handling of this material when such use and/or handling is contrary to label instructions.

**ENVIRONMENTAL HAZARDS**

This product is extremely toxic to mammals and birds and other wildlife. Dogs, cats and other predatory and scavenging mammals and birds might be poisoned if they feed upon animals that have eaten this bait. Do not apply directly to water or to areas where surface water is present or to intertidal areas below the mean high water mark. Do not contaminate water when disposing of equipment. Do not contaminate water when disposing of equipment. Do not contaminate water when disposing of equipment.

**NOTICE TO PHYSICIAN**

If swallowed, this material may reduce the clotting ability of the blood and cause bleeding. If ingested, administer Vitamin K1 intramuscularly or orally. Repeat as necessary based on monitoring of prothrombin times.
