poolife pods™ pH Minus
Lowers pH Levels
To keep your pool water comfortable for bathers and to protect pool surfaces and equipment from damage, the pH of pool water should be maintained between 7.2 and 7.8. Help prevent erratic changes when adjusting pH by testing the Total Alkalinity each week and maintaining it between 60 and 120 ppm.

Directions for Use:
1. Test the pH each time sanitizer is added using a reliable test kit.
2. Be sure the skimmer is empty and does not contain any chemical residue or debris.
3. (Skimmer Application) - Add 1 pod directly into the pool skimmer while the pump is running. Allow the pod to dissolve before adding additional pods or other pool products. Only add 1 pod at a time.
4. (Pool Application) - Add appropriate number of pods to the deep end of the pool with the circulation system on. Disperse any undissolved pods before adding additional pods. Only add 1 pod at a time.
5. Add the appropriate number of pods as designated in the table below to lower and maintain the pH between 7.2 and 7.8.

PRECAUTIONARY STATEMENTS: HAZARDS TO HUMANS AND DOMESTIC ANIMALS. DANGER: Corrosive. Causes skin burns and permanent eye damage. May be fatal if swallowed or inhaled. Do not get in eyes, on skin, clothing, or face. Avoid contact with skin and eyes. Do not breathe dust. Wear self-contained breathing apparatus (SCBA) with full face shield and rubber gloves when handling. Keep container closed at all times. Do not mix with other chemicals.

PHYSICAL AND CHEMICAL HAZARDS: Do not mix with other chemicals. IMPORTANT NOTE: Forms sulfuric acid upon exposure to water. In case of contamination or decomposition, do not reseal container. If possible, isolate container in open air or well-ventilated area.

FIRST AID:
IF IN EYES: Hold eye open and rinse slowly and gently with water for 15 – 20 minutes. Call a poison control center or doctor for treatment advice.
IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15 – 20 minutes. Call a poison control center or doctor for treatment advice.
IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.
IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth if possible. Call a poison control center or doctor for treatment advice.

NOTE TO PHYSICIAN: Probable mucosal damage may contraindicate the use of gastric lavage.

IN CASE OF EMERGENCY CALL: 1-800-654-6911
Have the product container or label with you when calling a poison control center or doctor or going for treatment.

STORAGE AND DISPOSAL:
Keep dry and in original container in a cool, dry, well-ventilated place. Do not store with chlorine, bromine, or oxidizing agents. Do not contaminate waterways. Rinse and offer for recycling, or dispose in accordance with state and local regulations. Do not reuse empty container.
To keep your pool water comfortable for bathers and to protect pool surfaces and equipment from damage, the pH of pool water should be maintained between 7.2 and 7.8. Help prevent erratic changes when adjusting pH by testing the Total Alkalinity each week and maintaining it between 60 and 120 ppm.
