DIRECTIONS FOR USE:

For INDUSTRIAL, INSTITUTIONAL AND AGRICULTURAL USE

MEETS OSHA'S BLOODBORNE PATHOGENS ACT REQUIREMENTS

DO NOT DISPENSE INTO WASTE WATER SYSTEMS OR DISCHARGE INTO ANY WATERS WITHOUT PREVIOUS PERMIT FROM YOUR STATE REGULATORY AGENCY.

1. Rinse equipment and utensils in cold water prior to sanitization.
2. Sanitize equipment and utensils by immersing them in a solution consisting of 1 ounce Premise® Disinfectant per 5 gallons of water provides 25 ppm titratable iodine and does not require a rinse at a 1:100 dilution.
3. Rinse equipment and utensils free of wash water prior to sanitation.

NOTE TO PHYSICIAN

In case of accidental ingestion, give plenty of water. Call a Poison Control Center or doctor for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless directed to do so by a Poison Control Center or physician.

NOTE: When using Premise™ Disinfectant against Trichophyton mentagrophytes, in a solution containing equal parts Premise™ Disinfectant and water. This contact time will not control other common types of viruses and bacteria listed on this label. To be effective against the HIV-1 virus on pre-cleaned Premise™ Disinfectant and water. This contact time will not control other common types of viruses and bacteria listed on this label. To be effective against the HIV-1 virus on pre-cleaned Premise™ DISINFECTANT.

SPECIAL INSTRUCTIONS FOR CLEANING AND DECONTAMINATION AGAINST HIV-1 ON SURFACES AND OBJECTS

Routine use of shoe bath sanitizers helps reduce the spread of disease causing organisms between poultry houses, barns, feeding areas and between pens. Use in brooder areas in replacement of disinfectants. Use Premise™ Disinfectant when safe to enter the building and is ready to be used. To prevent cross contamination gloves must be sanitized prior to entering or re-entering a poultry house. Use Premise™ Disinfectant for health and eye protection.

For general decontamination applications, use Premise™ Disinfectant in a solution containing 1 ounce of Premise™ Disinfectant per 5 gallons of water. Allow equipment to contact surface for 20 or a minimum of 30 seconds. Do not rinse.

STORAGE AND DISPOSAL

PROHIBITIONS: Do not contaminate water, food, or feed by storage or disposal. Open dumping is prohibited.

PESTICIDE DISPOSAL: Pesticides are hazardous substances. Improper disposal of excess pesticide spray mixture or rinsate is a violation of Federal law. If these wastes cannot be disposed of by use according to label instructions, contact your State or Local Pesticide Control Authority or the Environmental Protection Agency (EPA) Regional Office for guidance.

CONTAINER DISPOSAL: Noncompliance. Do not return or refill the container. Triple rinse container (or equivalent) promptly after use. The used container should be thoroughly rinsed with water. Remove and discard exterior labels. Clean equipment used to clean the container. Rinse container thoroughly with water. Do not reuse solution to sanitize equipment.

SANITIZING FOOD-GRADE EGG SHELLS: Use Premise™ Disinfectant in a solution containing 1 ounce of Premise™ Disinfectant per 5 gallons of water. Solution temperatures should be warmer than the eggs, but not to exceed 103°F (40°C). Allow eggs to remain in the solution for 15 seconds, then rinse eggs in cold water before handling or processing.

DEODORIZING: Premise™ Disinfectant destroys many odors as it sanitizes and disinfects. For general decontamination applications, use Premise™ Disinfectant in a solution containing 1 ounce of Premise™ Disinfectant per 5 gallons of water. Allow equipment to contact surface adequately for 1-2 minutes. Do not rinse.
