Easy-to-use pouches make dosing simple!

Net Weight 4 lbs. - Contains (8) 8 oz. Pouches

Lowers pH & total alkalinity

Improves swimmer comfort

Prevents stain & scale

PRINCIPAL FUNCTIONING AGENT:
SODIUM BISULFATE 95%
CONSTITUENTS INEFFECTIVE AS ADJUVANTS: 5%
TOTAL: 100%

Not for aquatic environments such as lakes, streams, ponds.

KEEP OUT OF REACH OF CHILDREN

DANGER CORROSIVE

Read all Precautionary Statements and first aid information before use.

MADE IN THE USA
WHY YOU SHOULD USE THIS PRODUCT:
This product lowers the pH and total alkalinity of swimming pool water. The ideal pH range is 7.2 - 7.8. Maintaining pH in the proper range will allow your sanitizer to work more effectively, reduce equipment corrosion, reduce eye irritation and skin dryness. Help reduce pH drift when adjusting pH by testing the total alkalinity each week and maintain it between 60 and 120 ppm.

For crystal clear water, follow our hth® 4 step pool care program:
Step 1: Test and adjust pool water balance, Step 2: Sanitize, Step 3: Shock treat your pool at least once a week, and Step 4: Add algaecide regularly.

DIRECTIONS FOR USE:
To lower pH:
1. Test the pH each time sanitizer is added using a reliable test kit.
2. Be sure the skimmer is empty and does not contain any chemical residue or debris.
3. Skimmer Application - Pour the contents of 1 pouch directly into the pool skimmer while the pump is running. Allow the chemical to dissolve before adding additional pouches or other pool products. Only add 1 pouch at a time.
4. Pool Application - Add appropriate number of pouches to the deep end of the pool with the circulation system on. Dispose any undissolved chemical from the bottom of the pool with a pool brush until the chemical is completely dissolved. If multiple pouches are added at one time, they should be distributed around the deep end and should not be concentrated in one place.
5. Add the appropriate number of pouches as designated in the table below to lower and maintain the pH between 7.2 and 7.8.
6. To lower total alkalinity:
Maintain total alkalinity between 60 - 120 ppm.
1. Add four pouches of this product for each 10,000 gallons of pool water to lower total alkalinity 10 ppm. Only add 1 pouch at a time.
2. Follow the directions above for Skimmer Application or Pool Application.
3. Keep the circulation pump running.
4. Repeat each day until the desired alkalinity level is achieved.

NOTE: Follow label directions for each product and allow each product to dissolve and disperse before adding additional products to the pool. Always check and adjust total alkalinity before adjusting pH levels. Use a test kit or test strips that measures all these ranges.

PRECAUTIONARY STATEMENTS: HAZARDS TO HUMANS AND DOMESTIC ANIMALS. DANGER:
Corrosive. Causes skin burns and permanent eye damage. May be fatal if swallowed or inhaled. Do not get in eyes, on skin or on clothing. Wear goggles or face shield and rubber gloves when handling. Avoid breathing dust. Remove and wash contaminated clothing before reuse.

PHYSICAL AND CHEMICAL HAZARDS:
Do not mix with other chemicals.

IMPORTANT NOTE: Forms sulfuric acid upon exposure to water. In case of contamination or decomposition, do not reuse container. If possible, isolate container in open air or well-ventilated area.

STORAGE AND DISPOSAL:
Keep dry and in original container in a cool, dry, well-ventilated place. Do not store with chlorine, bromine, or oxidizing agents. Keep container tightly closed when not in use. Do not contaminate food or feed by storage, disposal or cleaning of equipment. Use entire contents, then triple rinse and offer for recycling, or dispose in accordance with state and local regulations. Do not reuse empty container.

IN CASE OF EMERGENCY CALL: 1-800-654-6911
