CHIL-D GUARD™ ZIPPER

Reseal after each use

1. SLIDE TO OPEN
2. PRESS DOWN
3. ALIGN TO NOTCH

90 YEARS OF HTH
PERFECT POOLS

PRE-MEASURED • WATER SOLUBLE

Improves swimmer comfort
Prevents corrosion of metal and plaster surfaces

Easy-to-use pods make dosing simple!
Net Weight 4 lbs. - Contains (8) 8 oz. Pods

PRINCIPAL FUNCTIONING AGENT:
SODIUM CARBONATE 99%
CONSTITUENTS INEFFECTIVE AS ADJUVANTS: 1%
TOTAL: 100%

Not for aquatic environments such as lakes, streams, ponds.
KEEP OUT OF REACH OF CHILDREN
WARNING
CAUSES MODERATE TO SEVERE EYE IRRITATION. MAY CAUSE SKIN OR RESPIRATORY IRRITATION.
Read all Precautionary Statements and First Aid on back panel before use.
MADE IN THE USA
PRE-MEASURED • WATER SOLUBLE

pH Up

Why you should use this product:
This product increases the pH and total alkalinity of swimming pool water. The ideal pH range is 7.2 - 7.8. Maintaining pH in the proper range will allow your sanitizer to work more effectively, reduce equipment corrosion, reduce eye irritation and skin dryness. Help reduce pH drift when adjusting pH by testing the total alkalinity each week and maintain it between 60 and 120 ppm.

For crystal clear water, follow our hth® 4 step pool care program:
Step 1: Test and adjust pool water balance, Step 2: Sanitize, Step 3: Shock treat your pool at least once a week, and Step 4: Add algaecide regularly.

Acceptable Range for Balance

<table>
<thead>
<tr>
<th>Total Alkalinity</th>
<th>pH</th>
<th>Calcium Hardness</th>
<th>Available Chlorine</th>

</thead>
<tbody>
<tr>
<td>60-120 ppm</td>
<td>7.2-7.8</td>
<td>Above 200 ppm</td>
<td>1-4 ppm</td>
</tr>
</tbody>
</table>

DIRECTIONS FOR USE:
1. Test the pH each time sanitizer is added using a reliable test kit.
2. Be sure the skimmer is empty and does not contain any chemical residue or debris.
3. Skimmer Application - Add 1 pod directly into the pool skimmer while the pump is running. Allow the pod to dissolve before adding additional pods or other pool products. Only add 1 pod at a time.
4. Pool Application - Add appropriate number of pods to the deep end of the pool with the circulation system on. Disperse any undissolved chemical from the bottom of the pool with a pool brush until the chemical is completely dissolved. If multiple pods are added at one time, they should be distributed around the deep end and should not be concentrated in one place.
5. Add the appropriate number of pods as in the table to raise the pH level to between 7.2 and 7.8.

FIRST AID:
IF IN EYES: Hold eye open and rinse slowly and gently with water for 15 - 20 minutes. Call a poison control center or doctor for treatment advice.
IF ON SKIN OR CLOTHING: Take off contaminated clothing. Rinse skin immediately with plenty of water for 15 - 20 minutes. Call a poison control center or doctor for treatment advice.
IF SWALLOWED: Call a poison control center or doctor immediately for treatment advice. Have person sip a glass of water if able to swallow. Do not induce vomiting unless told to do so by the poison control center or doctor. Do not give anything by mouth to an unconscious person.
IF INHALED: Move person to fresh air. If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth if possible. Call a poison control center or doctor for treatment advice.

IN CASE OF EMERGENCY CALL: 1-800-654-6911

Do not mix with other products or dissolve before use.
