## GENERAL INFORMATION

This product is to be used as a cattle feed-through pesticide for the control of horn flies. All feed ingredients listed on this product label must adhere to the specifications and limits (if applicable) ascribed by the Food and Drug Administration for the use of pesticides in cattle feed.

This product contains ethoxyquin, a preservative. The amount of ethoxyquin may vary according to the individual manufacturer's formulation and will not exceed the 150 ppm maximum limit established for ethoxyquin by FDA, per 21 CFR 573.380.

**FEEDING AND MANAGEMENT INSTRUCTIONS**

Feed this product to cattle only. When used as directed, Protector PG-IGR tub will provide sufficient (S)-methoprene insect growth regulator to prevent the emergence of adult horn flies from manure of treated cattle. Existing adult horn flies will not be affected. Start feeding before horn flies appear and continue use until cold weather marks the end of the horn fly season. Allow free choice to cattle. Cattle should consume an average of 0.4 oz of Protector PG-IGR tub per 100 lbs. of cattle body weight per day, which is equivalent to 4 oz per day for a 1,000-pound cow.

1. Assure cattle are not starved for nutrients in Protector PG-IGR tub by providing them prior to feeding this product.
2. This product contains added copper. Do not feed to cattle in close proximity to sheep or other species that have a low tolerance to supplemental copper.
4. Remove all other self-limiting nutritional supplements while cattle are consuming this product.
5. Locate tubs where cattle congregate (watering, loafing, shade areas).
6. Replenish Protector PG-IGR tub on a regular basis as needed.
7. If intake of Protector PG-IGR tub is below 0.4 oz per 100 pounds cattle body weight per day, increase the number of feeding locations and/or change location(s) to areas more frequently by cattle.
8. If intake of Protector PG-IGR tub is above 0.4 oz per 100 pounds cattle body weight per day, reduce the number of feeding locations and/or change location(s) to areas less frequented by cattle.
9. Introduction of this product after adult fly instillation is established will require treatment of cattle with adulticides if elimination of the adult fly population is desired.

## STORAGE AND DISPOSAL:

Do not contaminate water, food, or feed by storage or disposal.

Storage: Store in a cool, dry place.

Pesticide Disposal: Wastes resulting from the use of this product may be disposed of on site or at an approved waste disposal facility.

Container Handling: Nonrefillable container. Do not reuse or refill this container. Triple rinse (or equivalent). Then offer for recycling if available, or puncture and dispose of in a sanitary landfill or by incineration or if allowed by state and local authorities by burning. If burned, stay out of smoke.
