Bactericide for use on tomato plants
[Biological control for bacterial canker disease on tomatoes]

Active Ingredient:
Bacteriophage active against *Clavibacter michiganensis subsp. michiganensis* .................. 0.0005%
Other Ingredients: .................................................. 99.9995%
Total: ................................................................. 100.0000%
*Contains at least 3.8 x 10^11 PFU per gallon (Contains at least 9.46 x 10^11 PFU per quart,
Contains at least 1.0 x 10^12 PFU per liter)

KEEP OUT OF REACH OF CHILDREN

CAUTION

See attached booklet for additional Precautionary Statements.

FIRST AID
If in eyes: Hold eye open and rinse slowly and gently with water for 15-20 minutes. Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye. Call a poison control center or doctor for treatment advice.
Hotline Number: Have the product container or label with you when calling a poison control center or doctor, or going for treatment. For non-emergency information concerning this product, call the National Pesticide Information Center (NPIC) at 1-800-858-7378, Monday through Friday, 8:00 a.m. to 12:00 p.m. Pacific Time (NPIC Web site: www.npic.orst.edu). For emergencies, call your poison control center at 1-800-222-1222.

PRECAUTIONARY STATEMENTS
HAZARDS TO HUMANS AND ANIMALS
CAUTION: Causes moderate eye irritation. Avoid contact with eyes or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco or using the toilet.
CHEMIGATION:
Do not apply this product through any irrigation system. State and Tribe, consult the agency responsible for pesticide regulation or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirement specific to your state, please see the tank mix must be in accordance with the more restrictive label limitations and precautions. The AgriPhage-CMM cannot be mixed with another product with a prohibition against mixing. Use of AgriPhage-CMM is a bactericide that is comprised of a formulation of bacteriophage to be used as a preventive and curative product for the control of bacterial canker (caused by the bacterium Clavibacter michiganensis subsp. michiganensis) and for the control of bacterial canker (caused by the bacterium Clavibacter michiganensis subsp. michiganensis) and for the control of bacterial canker (caused by the bacterium Clavibacter michiganensis subsp. michiganensis) and for the control of bacterial canker (caused by the bacterium Clavibacter michiganensis subsp. michiganensis). The AgriPhage-CMM must be applied up to and including the day of harvest. (continued)
Field Treatment - Ground Application

RATE Pre-Harvest Interval (PHI) APPLICATION NOTES

Do not apply to plants under stress or at harvest. Always apply to healthy tissue. Throughout the growing season, always apply applications at the lower rate of 1 pint of AgriPhage-CMM per acre for the first 3 applications. As plants increase in size and foliage, or after the second application, increase application rate to 2 pints of AgriPhage-CMM per acre to ensure adequate coverage. Additional applications may be required for severe or high disease pressure situations.

Begin applications as a preventive to protect the growing leaf tissue or as a curative when the first disease symptoms are visible. Continue throughout the growing season.

Begin at the lower application rate of 1 pint of AgriPhage-CMM per acre at planting (below the second tie). As plants increase in size and foliage (at or above the second tie), increase application rate to 2 pints of AgriPhage-CMM per acre to ensure adequate coverage.

Repeat application 1-3 times per week. Use sufficient spray solution to ensure complete coverage. Avoid excessive amounts of spray solution that result in runoff.

AgriPhage-CMM may be applied up to and including the day of harvest.

STORAGE AND DISPOSAL

Do not contaminate water, food, or feed by storage and disposal.

Pesticide Storage:
Store this product at 39.2°F (4°C). Direct sunlight and/or extreme heat will cause degradation of the product and decrease product efficacy.

Pesticide Disposal:
Wastes resulting from the use of this product must be disposed of on site or at an approved waste disposal facility.

Container Handling:
Non-refillable container. Do not reuse or refill this container. Triple rinse container (or equivalent) promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container 1/4 full with water and recap. Shake for 10 seconds. Pour rinseate into application equipment or a mix tank or store rinseate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Then offer for recycling if available or recondition if appropriate, or pour and dispose of in a sanitary landfill, or by incineration, or if allowed by state and local authorities, by burning. If burned, stay out of smoke.

WARRANTY STATEMENT:
OmniLytics, Inc. warrants that this material conforms to the description on the label and is reasonably fit for the purposes referred to in the Directions for Use. To the extent consistent with applicable law, OmniLytics, Inc. makes no other express or implied warranty of fitness or merchantability or any other express or implied warranty. To the extent consistent with applicable law, in no case or circumstance shall OmniLytics, Inc. or seller be liable for consequential, special or indirect damages resulting from the use or handling of this product including but not limited to, loss of profits, lost revenue, shredders, stock cost, or any other expenses incurred in planting, cultivating or harvesting the product. This warranty is of no further force or effect if the product is applied in a manner not consistent with the directions for use.

Bactericide for use on tomato plants

(Streptomyces viridans, Bacillus subtilis)
