### DIRECTIONS FOR USE

- **Personal protection:** Use rubber gloves. Do not inhale vapors. Avoid contact with eyes, skin or mucous membranes. Use in a well-ventilated area.

- **Application:** Dilute 1 oz per gallon of water to kill Adenovirus Type 5 and type 7. Use a 10-minute contact time for disinfection against all other viruses, bacteria and fungi. For heavy duty use, add 2 oz per gallon of water (1:64).

- **Contact time:**
  - For Quaternary Disinfectant Cleaner:
    - in the presence of 5% serum contamination: 10 minutes for HBV and HCV with 1/2 - 2 oz. per gallon use-solution.
    - Use 2 oz per gallon of water to clean and deodorize surfaces. Apply using a standard sprayer or in a spray bottle.
  - For Influenza Virus Type A and Human Coronavirus, treated surfaces must remain wet for 1 minute. Wipe dry with a microfiber cloth.

- **Deodorizing directions:**
  - For mold and mildew, apply 2 oz of 1/2-2 oz. per gallon use-solution (500 ppm). Wipe dry with a microfiber cloth.
  - For exhaust systems, apply 2 oz of 1/2-2 oz. per gallon use-solution (500 ppm). Wipe dry with a microfiber cloth.

- **Tests confirm that the use solution of this product, when stored in a sealed container such as a spray bottle or bottle with a screw cap, remains active for at least 18 months.**

- **Effective against Carbapenem-resistant Enterobacteriaceae (CRE), including:**
  - Klebsiella pneumoniae - NDM-1 positive
  - Escherichia coli - NDM-1 positive
  - MRSA
  - Staphylococcus aureus

- **Effective against intermediate and resistant:***
  - Klebsiella pneumoniae - NDM-1 positive Intermediate Resistant – VISA
  - MRSA Intermediate Resistant – VISA
  - Staphylococcus aureus Intermediate Resistant – VISA
  - Staphylococcus aureus - MDR (resistant to tetracycline (Tc), penicillin (Pc), and trimethoprim-sulfamethoxazole (Tm-Szm))
  - ESBL Escherichia coli
  - Enterococcus faecalis – VRE
  - Enterococcus faecium – VRE
  - Staphylococcus epidermidis - VISA
  - Staphylococcus aureus – MRSA
  - Shigella dysenteriae
  - Serratia marcescens
  - Salmonella schottmuelleri
  - Salmonella typhi
  - Legionella pneumophilia
  - Pseudomonas aeruginosa
  - Salmonella enteritidis
  - Acinetobacter</drei>
