MYCOSTAT® 3

SAPSTAIN CONTROL FOR FRESH CUT LUMBER

Controls the growth of mold and fungus that may cause discoloration and/or deterioration of freshly cut or kiln dried lumber during storage and shipment.

ACTIVE INGREDIENTS:

Propiconazole .................................................. 6.0%
3-ldoo-2-propynyl butylcarbamate .......................... 4.0%
Didecyl dimethyl ammonium chloride ...................... 41.7%

OTHER INGREDIENTS: (w/w) .................................. 48.3%

TOTAL................................................................. 100.0%

KEEP OUT OF REACH OF CHILDREN

DANGER - POISON
PELIGRO CORROSIVE TO EYE AND SKIN

See side panel for additional precautionary statements.

FIRST AID

IF IN EYES:

Hold eye open and rinse slowly and gently with water for 15-20 minutes.

Remove contact lenses, if present, after the first 5 minutes, then continue rinsing eye.

Call a poison control center or doctor for treatment advice.

IF ON SKIN OR CLOTHING:

Take off contaminated clothing.

Rinse skin immediately with plenty of water for 15-20 minutes.

Call a poison control center or doctor for treatment advice.

IF INHALED:

Move person to fresh air.

If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible.

Call a poison control center or doctor for further treatment advice.

IF SWALLOWED:

Call a poison control center or doctor immediately for treatment advice.

Have person sip a glass of water if able to swallow.

Do not induce vomiting unless told to do so by the poison control center or doctor.

Do not give anything by mouth to an unconscious person.

DIRECTIONS FOR USE

FOR INDUSTRIAL USE ONLY. It is a violation of Federal Law to use this product in a manner inconsistent with this labeling. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application.

MYCOSTAT® 3 is used to control sapstain, mold and decay on green or freshly cut or kiln dried lumber and wood products such as logs, poles, posts, beams, composites, wickers and wood chips/sawdust or other similar by-products intended for non-food contact. Lumber and wood products should be treated immediately after sawing or cutting. A delay in treatment of 24 hours or more permits stain, mold and decay growth to start which can result in increased treatment requirements. To achieve adequate control, MYCOSTAT® 3 is applied by dipping or spraying the wood until complete surface wetting is achieved. Treated lumber should be protected from rain and removal contact. Wearing protective clothing while treating MYCOSTAT® 3 Solutions does not guarantee adequate control. MYCOSTAT® 3 is approved for use on green or freshly cut and/or kiln dried lumber and wood products.

SAFETY PRECAUTIONS:

Environmental Hazards:

This pesticide contains a toxic chemical. Do not apply directly to water. Do not contaminate water when disposing of equipment wastewaters. Do not discharge effluent containing this product into lakes, streams, ponds, estuaries, oceans or other waters unless in accordance with the requirements of a National Pollution Discharge Elimination System (NPDES) permit and the permitting authority has been notified in writing prior to discharge. Do not discharge effluent containing this product into sewers systems without previous notification to the local sewage treatment plant authority. For guidance contact your State Water Board or Regional Office of the EPA.

Treatment lumber must be stored under cover, indoors, or at least 100 feet from any pond, lake, stream, wetland, or river to prevent possible runoff of the product into the waterway. Treated lumber stored outdoors within 100 feet of a pond, lake, stream, or river must either be covered with plastic or surrounded by a berm to prevent surface water runoff into the nearby waterway. If a berm is used around the site, it must consist of impermeable material (clay, asphalt, concrete) and be of sufficient height to prevent runoff during heavy rainfall events.

NOTICE OF WARRANTY AND DISCLAIMER

Diacon Technologies Ltd. warrants that this product conforms to the chemical description on the label thereof and is reasonably fit for purposes stated on such label only when used in accordance with the directions under normal use conditions. It is impossible to eliminate all risks inherently associated with the use of this product. Ineffectiveness or other unintended consequences may result because of such factors as weather conditions, quality of equipment, skill, or the manner of use or application, all of which are beyond the control of Diacon Technologies Ltd. In no case shall Diacon Technologies Ltd. be liable for consequential, special or indirect damages resulting from the use or handling of this product. All such risks shall be assumed by the Buyer.

Diacon Technologies Ltd. MAKES NO WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE NOR ANY OTHER EXPRESS OR IMPLIED WARRANTY EXCEPT AS STATED ABOVE.
