DuPont Crop Protection  Chestnut Run Plaza, 974 Centre Road  Wilmington, DE 19805 USA

Curzate® 60DF
EPA Reg. No. 352-592
EPA Section 24(c) Special Local Need Registration SLN No. WA-200001

For Control of Downy Mildew in Cabbage, Swiss Chard and Table Beet Grown for Seed
This label for Curzate 60DF expires and must not be distributed or used in accordance with this SLN registration after December 31, 2024

(For Distribution and Use Only in the State of Washington)

ATTENTION
• It is a violation of Federal law to use this product in a manner inconsistent with its labeling.
• This labeling must be in the possession of the user at the time of application.
• Follow all applicable directions, restrictions, Worker Protection Standard requirements, and precautions on the EPA registered label.

DIRECTIONS FOR USE
For the use of Curzate® 60DF fungicide on, cabbage, Swiss chard and table beet grown for seed production only for the control of downy mildew. Consult the Curzate 60DF EPA-registered label for additional requirements, restrictions and precautions.

HOW TO USE
Use Rate, tank mixes and timing
• Apply Curzate 60DF fungicide at 3.2 ounces per application per acre in sufficient water to obtain thorough spray coverage of the crop.
• Use Curzate 60DF only in combination with another registered protectant fungicide, such as mancozeb or chlorothalonil.
• Applications can be made prior to or after transplanting.
• Initial applications should start when local conditions indicate that downy mildew infection is imminent.
• Make applications on a 5-7 day interval as long as disease conditions exist.
• Do not exceed 5 applications of Curzate 60DF per 12 month period.
• For conventional ground application equipment, including tractor-mounted sprayers, boom or backpack sprayers, use a minimum of 20 gals/acre.
• For hard-to-wet foliage, a spray adjuvant may be used to help increase spray coverage and retention.

Restrictions/Precautions:
• Do not apply by air.
• For use under this SLN label do not apply this product through any type of irrigation system.
• Potatoes, tomatoes, cucurbit crops, lettuce (head and leafy), peppers, spinach, hops, bulb crops and other crops in leafy greens subgroup 4A may be re-planted any time after CURZATE® 60DF applications. All other crops cannot be planted until 30 days after CURZATE® 60DF application.
• All cabbage, Swiss chard and table beet seed screenings shall be disposed of in such a way that they cannot be distributed or used for food or feed. The seed conditioner shall keep records of screening disposal for three years from the date of disposal and shall furnish the records to the WSDA forthwith upon request. Disposal records shall consist of documentation from a controlled dumpsite, incinerator, or other equivalent disposal site and shall show the lot numbers, amount of material disposed of, its grower(s), and the date of disposal.
• No portion of the cabbage, Swiss chard and table beet seed plant, including but not limited to green chop, hay, pellets, meal, whole seed, cracked seed, roots, bulbs, leaves and seed screenings may be used or distributed for food or feed purposes.
• Cabbage, Swiss chard and table beet seed shall bear a tag or container label which forbids use of the seed for human consumption or animal feed.
• Cabbage, Swiss chard and table beet seed may not be distributed for human consumption or animal feed.

WSDA Aquatic Advisory
This pesticide is toxic to fish and aquatic invertebrates. Curzate 60DF should not be used under this SLN label where impact on listed threatened or endangered species is likely. You may refer to the WSDA Natural Resources Assessment Section web site (https://agr.wa.gov/departments/land-and-water/natural-resources/endangered-species-program) for additional information related to pesticide use and endangered species protection. Information from EPA about no-spray buffers zones is available at https://agr.wa.gov/departments/land-and-water/natural-resources/endangered-species-program/buffers. Pesticide applicators may use the Washington Department of Fish and Wildlife's SalmonScape mapping tool at https://apps.wdfw.wa.gov/salmonscape to determine if listed salmonid species occur in or near a proposed application site.

WSDA Container Disposal Guidance:

Completely empty the contents of the pesticide container into application equipment, and apply to a labeled crop or site. The empty container may be disposed of in a sanitary landfill. Burning is not a legal method of container disposal in Washington.

This bulletin contains new or supplemental instructions for use of this product which do not appear on the EPA-registered package label. Follow the instructions carefully.

Read the Limitation of Warranty and Liability on the section 3 Federal product label before buying or using this product. If terms are not acceptable, return the unopened package at once to seller for full refund of purchase price paid. Otherwise, use by Buyer or any other User constitutes acceptance of the terms of the Limitation of Warranty and Liability on the Section 3 Federal product label.
